***the images or text included in the physical edition. In the age of MapQuest and GPS, we take cartographic literacy for granted. We should not; the ability to find meaning in maps is the fruit of a long process of exposure and instruction. A "carto-coded" America--a nation in which maps are pervasive and meaningful--had to be created. The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860, maps did more than communicate geographic information and political pretensions. They became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms, where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets, parlors and bookbindings. Between the decades leading up to the Revolutionary War and the Civil War, early Americans bonded with maps; Martin Bruckner's comprehensive history of quotidian cartographic encounters is the first to show us how.***

"Powerful and important . . . an instant classic." –The Washington Post Book World The award-winning look at an ugly aspect of American racism by the bestselling author of Lies My Teacher Told Me, reissued with a new preface by the author In this groundbreaking work, sociologist James W. Loewen, author of the classic bestseller Lies My Teacher Told Me, brings to light decades of hidden racial exclusion in America. In a provocative, sweeping analysis of American residential patterns, Loewen uncovers the thousands of "sundown towns"—almost exclusively white towns where it was an unspoken rule that blacks weren't welcome—that cropped up throughout the twentieth century, most of them located outside of the South. Written with Loewen's

trademark honesty and thoroughness, *Sundown Towns* won the Gustavus Myers Outstanding Book Award, received starred reviews in *Publishers Weekly* and *Booklist*, and launched a nationwide online effort to track down and catalog sundown towns across America. In a new preface, Loewen puts this history in the context of current controversies around white supremacy and the Black Lives Matter movement. He revisits sundown towns and finds the number way down, but with notable exceptions in exclusive all-white suburbs such as Kenilworth, Illinois, which as of 2010 had not a single black household. And, although many former sundown towns are now integrated, they often face "second-generation sundown town issues," such as in Ferguson, Missouri, a former sundown town that is now majority black, but with a majority-white police force.

*When you think of a map of the United States, what do you see? Now think of the Seattle that begot Jimi Hendrix. The Dallas that shaped Erykah Badu. The Holly Springs, Mississippi, that compelled Ida B. Wells to activism against lynching. The Birmingham where Martin Luther King, Jr., penned his most famous missive. Now how do you see the United States? Chocolate Cities offers a new cartography of the United States—a “Black Map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on cultural sources such as film, music, fiction, and plays, and on traditional resources like Census data, oral histories, ethnographies, and health and wealth data, the book offers a new perspective for analyzing, mapping, and understanding the ebbs and flows of the Black American experience—all in the cities, towns, neighborhoods, and communities that Black Americans have created and defended. Black maps are consequentially different from our current geographical understanding of race and place in America. And as the United States moves toward a majority minority society, Chocolate Cities provides a broad and necessary assessment of how racial and ethnic minorities make and change America’s social, economic, and political landscape.*

*The Social Life of Maps in America, 1750-1860*

The classic historical interpretation of the late nineteenth and early twentieth centuries in America sees this period as a political search for order by the middle class, culminating in Progressive Era reforms. In *The Middle-Class City*, John Hepp examines transformations in everyday middle-class life in Philadelphia between 1876 and 1926 to discover the cultural roots of this search for order. By looking at complex relationships among members of that city's middle class and three largely bourgeois commercial institutions--newspapers, department stores, and railroads--Hepp finds that the men and women of the middle class consistently reordered their world along rational lines. According to Hepp, this period was rife with evidence of creative reorganization that served to mold middle-class life. The department store was more

than just an expanded dry goods emporium; it was a middle-class haven of order in the heart of a frenetic city--an entirely new way of organizing merchandise for sale. Redesigned newspapers brought well-ordered news and entertainment to middle-class homes and also carried retail advertisements to entice consumers downtown via train and streetcar. The complex interiors of urban railroad stations reflected a rationalization of space, and rail schedules embodied the modernized specialization of standard time. In his fascinating investigation of similar patterns of behavior among commercial institutions, Hepp exposes an important intersection between the histories of the city and the middle class. In his careful reconstruction of this now vanished culture, Hepp examines a wide variety of sources, including diaries and memoirs left by middle-class women and men of the region. Following Philadelphians as they rode trains and trolleys, read newspapers, and shopped at department stores, he uses their accounts as individualized guidebooks to middle-class life in the metropolis. And through a creative use of photographs, floor plans, maps, and material culture, *The Middle-Class City* helps to reconstruct the physical settings of these enterprises and recreate everyday middle-class life, shedding new light on an underanalyzed historical group and the cultural history of twentieth-century America. This Philadelphia map features points of interest, airports, camping facilities, parks, selected local attractions and more. State maps feature insets of major cities. Our city map offers additional detail, with depiction of streets on one side and a large scale metro area road map on the other.

**An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In *The Culture Map*, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice. *Your City*. Judged A sharp tongued and fierce witted full-color collection of maps of America's greatest cities in all their brutally honest glory. When you move to a new city you look at a map to get you where you need to be, but a Google Map of San Francisco won't tell you where you can get "Real Dim Sum" or where "The Worst Trader Joes Ever" is. Or if you're visiting Chicago, you might want to see the Magnificent Mile, but not know it's right next to where "Suburbanites Buy Drugs"**

and “Retired Mafioso.” This is where Judgmental Maps comes in – a no holds barred look at city life that is at once a love letter and hate mail from the very people who live there. What started as a joke between comedian Trent Gillaspie and his friends in Denver, quickly grew into a viral sensation with a rabid and enthusiastic community labeling maps of their cities with names and descriptions we all think of, but are a bit too shy to say out loud. Collected here in a full color, beautifully packaged book with all new, never before published material, Judgmental Maps is laugh out loud funny from New York to Los Angeles, Minneapolis to Atlanta and offending everyone else in between.

Your City. Judged.

Identifies important overland wagon roads used by Americans from about 1735-1815.

Armed with hundreds of blank maps she had painstakingly printed by hand, Becky Cooper walked Manhattan from end to end. Along her journey she met police officers, homeless people, fashion models, and senior citizens who had lived in Manhattan all their lives. She asked the strangers to “map their Manhattan” and to mail the personalized maps back to her. Soon, her P.O. box was filled with a cartography of intimate narratives: past loves, lost homes, childhood memories, comical moments, and surprising confessions. A beautifully illustrated, PostSecret-style tribute to New York, Mapping Manhattan includes 75 maps from both anonymous mapmakers and notable New Yorkers, including Man on Wire aerialist Philippe Petit, New York Times wine critic Eric Asimov, Tony award-winning actor Harvey Fierstein, and many more. Praise for Mapping Manhattan: “What an intriguing project.”—The New York Times “A tender cartographic love letter to this timeless city of multiple dimensions, parallel realities, and perpendicular views.” —Brain Pickings “Cooper’s beautiful project linking the lives of New Yorkers is one that will continue to grow.” —Publishers Weekly online Mapping Manhattan
