50 Years

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.

333 Tips for Sailors

**For marine, boating, and climbing amateurs and professionals at all levels, splices--the strongest way of attaching or joining the end of a rope--are essential. Why? Because a splice gives the strongest way of attaching or joining the end of a rope to any object or to another rope. (Every knot, on the other hand, weakens a rope.) In this much-anticipated handbook, world-renowned expert Friedl guides you through modern splicing techniques with his clear directions, one-of-a-kind color diagrams, and 200+ color photos. The book is supplemented by four-plus hours of excellent video instruction. Throughout, every type of splice is shown by an expert climber and shipbuilder. Learn what to know before starting to splice, then build a solid understanding and competence of modern cordage, its construction, and its fiber materials. Friedl has over 35 years of sailing experience, including several Atlantic crossings, and is also a professional climber. He teaches seminars and workshops on modern splicing worldwide, and in 2006, Friedl made the modern soft shackle internationally known. Now, his much-anticipated book allows you, whether you are a hobbyist or a professional, to leverage splicing skills to become more self-reliant while making your maritime or climbing pursuits safer.**
