Roughly a billion people around the world continue to live in state of chronic hunger and food insecurity. Unfortunately, efforts to improve their livelihoods must now unfold in the context of a rapidly changing climate, in which warming temperatures and changing rainfall regimes could threaten the basic productivity of the agricultural systems on which most of the world's poor directly depend. But whether climate change represents a minor impediment or an existential threat to development is an area

of substantial controversy, with different conclusions wrought from different methodologies and based on different data. This book aims to resolve some of the controversy by exploring and comparing the different methodologies and data that scientists use to understand climate's effects on food security. It explains the nature of the climate threat, the ways in which crops and farmers might respond, and the potential role for public and private investment to help agriculture adapt to a warmer world. This broader understanding should prove useful to both scientists charged

The book clearly presents key areas to be considered by the board (there are over 50 in total) and range from board composition, to data security, diversity and inclusion, and succession planning. The questions are ones that boards, in any organisation, should be asking themselves, their fellow board members, service providers, executives, and other stakeholders to ensure that the right issues are raised, transparency and effective oversight are achieved, and the board is fulfilling its role in governing the organisation. In addition to being invaluable for board members, the book is also a

#### An Explanatory Guide

More than 120 countries have committed to net zero targets by 2050, requiring systemic economic transitions on an unprecedented scale and with the finance sector playing a leading role. Green finance will power the transition, ensuring capital flows to the firms, investments, projects and technologies looking to create a sustainable, low-carbon world. To achieve net zero, every professional financial decision must take climate change and broader sustainability factors into account. Green and Sustainable Finance provides a

comprehensive guide to the application of common green and sustainable principles and practices in banking, investment and insurance to help finance professionals embed these in their daily activities and decision-making. Focusing on the necessity of mainstreaming green and sustainable finance globally, this book includes a clear explanation of the science underpinning climate change. Green and Sustainable Finance covers a wide range of green finance products and services in retail, commercial and corporate banking, insurance, investment and fintech. It provides an overview of emerging regulation and international market frameworks and standards, particularly in relation to climate and environmental risk.

is a de facto standard of evaluation. This monograph surveys the research conducted and explains the methods and measures devised for evaluation of retrieval systems, including a detailed look at the use of statistical significance testing in retrieval experimentation. This monograph reviews more recent examinations of the validity of the test collection approach and evaluation measures as well as outlining trends in current research exploiting query logs and live labs. At its core, the modern-day test collection is little different from the structures that the pioneering researchers in the 1950s and 1960s conceived of. This tutorial and review shows that despite its age, this long-standing evaluation method is still a
