**In 1971 the United States had no diplomatic relations or established route of communications with China. Despite that, in a stunning act of diplomacy, President Richard Nixon announced that he would travel to China to meet with its leaders. Ron Walker, director of the White House Advance Office, was chosen to make it all happen. This is the story of Walker and his team. China Calls is based on the actual transcripts of telephone calls between the advance team in Peking and the White House in Washington. Much is known about Nixon's actual visit, but the story of how it all came together has never been told until China Calls. At twelve years old, Lev Parikian was an avid birdwatcher. He was also a fraud, a liar and a cheat. Those lists of birds seen and ticked off? Lies. One hundred and thirty species? More like sixty. Then, when he turned fifty, he decided to right his childhood wrongs. He would go birdwatching again. He would not lie. He would aim to see two hundred species of British bird in a year. *Why Do Birds Suddenly Disappear?* is the story of that year, a story about birds, family, music, nostalgia, the nature of obsession and obsession with nature. It's about finding adventure in life when you twig it's shorter than you thought, and about losing and regaining contact with the sights, sounds and smells of the natural world. It's a book for anyone who has ever seen a small brown bird and wondered what it was, or tried to make sense of a world in which we can ask, 'What's that bird?' and 'What's for lunch?' and get the same answer.

A compelling alternative view of the relationship between our politics and our economy. Throughout America, structural problems are getting worse. Economic inequality is near Gilded Age heights, the healthcare system is a mess, and the climate crisis continues to grow. Yet most ambitious policy proposals that might fix these calamities are dismissed as wastefully expensive by default. From the kitchen table to Congress, debates are punctuated with a familiar refrain: “How are you going to pay for that?” This question is designed to shut down policy pushes up front, minimizing any interference with the free market. It comes from neoliberalism, an economic ideology that has overtaken both parties. Proponents insist that markets are naturally-occurring and apolitical—and that too much manipulation of the economy will make our society fall apart. Ryan Cooper argues that our society already is falling apart, and the logically preposterous views of neoliberalism are to blame. Most progressives understand this instinctively, but many lack the background knowledge to make effective economic counterarguments. *How Are You Going To Pay For That?* is filled with engaging discussions and detailed strategies that policymakers and citizens alike can use to assail even the most entrenched lines of neoliberal logic, and start to undo these long-held misconceptions. Equal parts economic theory, history, and political polemic, this is an essential roadmap for winning the key battles to come.
