

Engineering Physics For Diploma

Ceramic Technology is a Book for Ceramic Technology Diploma & Engineering Course, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about, Engineering Physics, Engineering Drawing/Graphics, Computer Programming and Utilization, Environmental Conservation and Hazard Management, Engineering Mathematics, Applied Chemistry, Basics of Mechanical Engineering, Ceramic Materials, Workshop (Practical), Advanced Chemistry, Fundamentals of White Ware, Fundamentals of Refractory, Fuels and Furnaces, Management, Glass, Industrial Management, Applied Ceramics, Quality Control, Industrial Training and lots more.
 Textile Engineering is a simple e-Book for Textile Diploma & Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about Engineering Physics, Engineering Graphics/Drawing, Basics of Chemistry, Elements of Textile Technology, Organic Chemistry, Fiber Science and Technology, Computer Utilization, Mechanical Engineering for Textiles, Dyeing Technology (Natural Textile), Printing Technology (Natural Textile), Electrical and Electronics Engineering for Textiles, Finishing Technology, CAD (Computer Aided Design and Color), Quality and Process Control, Industrial Management, Technology of Technical Textiles and lots more.
 Marine Engineering is a Book for Marine Diploma & Engineering Course, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about General Physiology with Alcohol and Drug Prevention, Spherical Trigonometry, Analytical Geometry with Solid Geometry, Aptitude for the Service, Engine Watch keeping, Engine Officers, Ship and Ships Routine, Ship Construction and Ship Stability, Engineering Drawing, Marine Pollution and Prevention Auxiliary Machinery, Mechanics and Hydrinechanics, Marine Power Plant, Marine Vocabulary and Terms, Plane Trigonometry, Marine Power Plant and Diesel, Engineering Physics, Fuel Oils and Lubricants, Electro Technology, Machine Shop, Integral Calculus, Heat Balance, Basic Safety and lots more.
 Environmental Engineering Diploma Engineering MCQ
ENGINEERING PHYSICS BASICS
 Diploma and Engineering MCQ
ENGINEERING PHYSICS-I (BASIC PHYSICS)
 Textile Engineering Diploma Engineering MCQ
 New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.
 According to the syllabus of 2nd semester University of Mumbai.

This text/reference provides students, practicing engineers, and scientists with the fundamental physical laws and modern applications used in industry. Unlike many of its competitors, modern physics theory (e.g., quantum physics) and its applications are discussed in detail, including laser techniques and fiber optics, nuclear fusion, digital electronics, wave optics, and more. An extensive review of Boolean algebra and logic gates is also included. Because of its in-text examples with solutions and self-study exercise sets, the book can be used as a refresher for engineering licensing exams or as a full year course. It emphasizes only the level of mathematics needed to master concepts used in industry.

Engineering Physics Practical
Applied Physics for Polytechnics
Textbook Of Engineering Physics
FOR DIPLOMA I YEAR
Marine Engineering
Textile Engineering is a Book for Textile Diploma & Engineering Course, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about Engineering Physics, Engineering Graphics/Drawing, Basics of Chemistry, Elements of Textile Technology, Organic Chemistry, Fiber Science and Technology, Computer Utilization, Mechanical Engineering for Textiles, Dyeing Technology (Natural Textile), Printing Technology (Natural Textile), Electrical and Electronics Engineering for Textiles, Finishing Technology, CAD (Computer Aided Design and Color), Quality and Process Control, Industrial Management, Technology of Technical Textiles and lots more.
It comprises of 12 chapters written in according with the syllabus framed by the corresponding boards of andhra pradesh
Mechanical Engineering is a simple e-Book for Mechanical Diploma & Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about Engineering Physics, Applied Mechanics, Engineering Drawing/Graphics, Material Science, Mechanical Drafting, Communication Skills, Basic Civil Engineering, Manufacturing Engineering, Fluid Mechanics, Thermal Engineering, Thermodynamics Theory of Machines, Strength of Materials, CADD, Applied Electronics and Electrical Engineering, Metrology and Instrumentation, CADD (Computer Aided Machine Design and Drawing), Plant Maintenance and Safety, Thermal Engineering, Computer Aided Manufacturing, Design of Machine Elements, Tool Engineering, Manufacturing Engineering, Industrial Manufacturing, Industrial Design and lots more.
ENGINEERING PHYSICS-II (BASIC PHYSICS)
IB Physics Course Book
Heat, Light, Sound and Thermodynamics for the Examinations of B. Sc. (Engg.), A.M.I.E.(I), A.M. Ae. S.I., Diploma & N.C.C.
For Diploma Students
Engineering Physics Practicals
Power Electronics is a simple e-Book for Power Electronics Diploma & Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about Engineering Chemistry, Basics of Electrical Engineering, Computer Programming and Utilization, Engineering Physics, Basics of Electronic Engineering, Digital Electronics, DC Machines and Transformers, Electrical Power: Generation and Transmission, Advanced Electronic Devices and Circuits, Elements of Power Electronics, Linear Electronic Circuits, DC Motor Drives DC Power Electronic Converters, AC Rotating Machines, Electrical Network and Circuits, Measuring Instruments and Transducers, AC Motor Drives, Applied Power Electronics, AC Power Electronic Converters, Microcontroller for Power Electronics, Control System for Power Electronics, Programmable Logic Controllers, Power Electronics for Renewable Energy and lots more.
Plastic Technology is a simple e-Book for Plastic Technology Diploma & Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about Engineering Physics, Basic Polymer Chemistry, Computer Programming and Utilization, Basics of Mechanical Engineering, Engineering Drawing/Graphics, Basics of Electrical Engineering, Polymer Chemistry, Environment Conservation and Hazard Management, Basic Mould Design, Plastic Materials, Mould Fabrication Technology, Technology for Injecting Moulding, Compression Transfer and Injection Moulding of Thermose, Design for Injecting Mould, Plastic Extrusion Technology, Hydraulic and Pneumatic Systems, Process Instrumentation and Maintenance, Blow Rotational and Thermoforming Process, Industrial Management, Design for Blow and Thermoforming Moulds, Mould Fabrication Technology, Plastic Materials, Plastic Testing and Quality Management and lots more.
In recent decades imaging has proved one of the most rapidly expanding areas of medicine. The present day trainees entering radiology are no longer trained by radiologists who cover and are well informed on most aspects of their speciality as with previous generations. Instead they encounter a confusing array of subspecialists divided both by systems and by techniques. The system specialists include neuroradiologists, vascular radiologists, gastrointestinal radiologists, chest radiologists, and skeletal radiologists. Technique specialists include experts in nuclear medicine, ultrasound, computed tomography and magnetic resonance, and there are subspecialists in both groups, not to mention others like pediatric radiologists who fit into neither classification. It is our experience that this plethora of experts each with his own individual approach is bewildering and intimidating to the novice radiologist. The numerous monographs on individual subjects and techniques and the large textbooks so valuable to the more advanced radiologist are also confusing and unhelpful to the new recruit. It was for these reasons that we decided to embark on this new Short Textbook. The aim was to produce a concise and integrated volume which could provide the beginner with a balanced and realistic view of the true place of different imaging techniques in current practice. Details of technique are generally excluded; most will be inevitably absorbed with increasing practical experience. The emphasis throughout is on clinical usage, and the relative and often changing importance of different methods in specific clinical contexts.

Applied Physics for Engineers
For Polytechnic First Year Common to All Branches
Marine Engineering Diploma Engineering MCQ
A Physics Course-Book (II) For DIPLOMA ENGINEERING
Applied Physics 2
S. Chand's Physics, designed to serve as a textbook for students pursuing their engineering degree course, B.E. in Gujarat' Technical University. The book is written with the singular objective of providing the students of GTU with a distinct source material as per the syllabus. The philosophy of presentation of the material in the book is based upon decades of classroom interaction of the authors. In each chapter, the fundamental concepts pertinent to the topic are highlighted and the in-between continuity is emphasized. Throughout the book attention is given to the proper presentation of concepts and practical applications are cited to highlight the engineering aspects. A number of problems are solved. New problems are included in order to expedite the learning process of students of all hues and to improve their academic performance. The fundamental concepts are emphasized in each chapter and the details are developed in an easy-to-follow style. Each chapter is divided into smaller parts and sub-headings are provided to make the reading a pleasant journey from one interesting topic to another important topic.
This Book Is Based On The Common Core Syllabus Of Up Technical University. It Explains, In A Simple And Systematic Manner, The Basic Principles And Applications Of Engineering Physics. After Explaining The Special Theory Of Relativity, The Book Presents A Detailed Analysis Of Optics,Scalar And Vector Fields Are Explained Next, Followed By Electrostatics. Magnetic Properties Of Materials Are Then Described. The Basic Concepts And Applications Of X-Rays Are Highlighted Next, Quantum Theory Is Then Explained, Followed By A Lucid Account Of Lasers. After Explaining The Basic Theory, The Book Presents A Series Of Interesting Experiments To Enable The Students To Acquire A Practical Knowledge Of The Subject.A Large Number Of Questions And Model Test Papers Have Also Been Added. Different Chapters Have Been Revised And More Numerical Problems As Per Requirement Have Been Added. The Book Would Serve As An Excellent Text For First Year Engineering Students. Diploma Students Would Also Find It Extremely Useful.
This fourth edition of Physics for the IB Diploma has been written for the IB student. It covers the entire new IB syllabus including all options at both Standard and Higher levels. It includes a chapter on the role of physics in the Theory of Knowledge along with many discussion questions for TOK with answers. There are a range of questions at the end of each chapter with answers at the back of the book. The book also includes worked examples and answers throughout, and highlights important results,laws, definitions and formulae. Part I of the book covers the core material and the additional higher level material (AHL). Part II covers the optional subjects.

APPLIED PHYSICS VOL (II)
A Short Textbook of Clinical Imaging
S.Chand's Engineering Physics Vol-II
Engineering Physics Theory And Experiments
 Compact & Precise Notes for Applied Physics 2, for Students of Polytechnic Diploma
 Ceramic Technology is a simple e-Book for Ceramic Technology Diploma & Engineering Course Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about, Engineering Physics, Engineering Drawing/Graphics, Computer Programming and Utilization, Environmental Conservation and Hazard Management, Engineering Mathematics, Applied Chemistry, Basics of Mechanical Engineering, Ceramic Materials, Workshop (Practical), White Ware, Fundamentals of Refractory, Fuels and Furnaces, Management, Glass, Industrial Management, Applied Ceramics, Quality Control, Industrial Training and lots more.
 This book is intended as a textbook for the first-year undergraduate engineering students of all disciplines. The text, written in a student-friendly manner, covers a wide range of topics of engineering interest both from the domains of applied and modern physics. It is meticulously tailored to cover the syllabi needs of almost all the Indian universities and institutes. With its exhaustive treatment of different topics in one volume, it relieves the engineering students of the arduous task of referring to several books. Besides, the text also includes worked examples and answers throughout, and highlights important results, laws, definitions and formulae.
 (Physics) students of different universities. KEY FEATURES Simple and clear diagrams throughout the book help students in understanding the concepts clearly. Numerous in-chapter solved problems, chapter-end unsolved problems (with answers) and review questions assist students in assimilating the theory comprehensively. A large number of objective type questions at the end of each chapter help students in testing their knowledge of the theory.
 For First Year of Diploma Course in Engineering and Technology
 Physics for the IB Diploma
 Ceramic Technology Diploma Engineering MCQ
 Textile Engineering
 Physics for the IB Diploma Full Colour
 This new book serves the purposeful need for students of diploma in engineering whose courses of study follows this book in two volume . Vol (I) deals with basic physics in which we have discussed Units & Measurement , Heat , Light & Modern physics .The volume (II) widely covers with Applied Physics in which we have discussed Kinematics and some chapter of General Physics like Angular motion &Simple Harmonic motion and kinetics . This volume also covers the study of Non - destructive testing of materials as well as Acoustics of building . Chapter 1.2 (i) explains about rest & motion in one dimension in a given frame of reference of the observer in brief . On the basis of the above definition the observer frame of reference has been divided into two categories in chapter 1.2(ii) as Inertial & Non -inertial frame of reference in which it has been briefly explained using Newton law of motion as inertial frame of reference on the other hand a frame of reference in which Newton law of motion cannot be defined is called Non-inertial frame of reference with an example as Earth is an Inertial frame of reference but since it is revolving around the sun it may not be strictly speaking to be an Inertial frame of reference . In chapter 1.2(iii) the of Definition of Distance, Displacement, Speed , Velocity and Acceleration has been illustrated with suitable diagram .After a brief introduction about the above physical quantities used to define the motion of a body Rectilinear Motion has been described with following equation as v = u + at , S = ut + ½ a t2 & v2= u2+ 2as in chapter 1.2(iv) . Chapter 1.2(v) aims to study a body which is travelling a distance travelled in nth second .On the basis of which it became simpler to describe the uniform motion of a body in different interval of time . The above equation of motion may be illustrated using Time –position graph in chapter 1.2(vi) and Velocity-Time Diagrams for uniform velocity in chapter 1.2(vii).Further in chapter 1.2(viii) the motion of a Uniform acceleration and uniform retardation and equations of motion for motion under gravity has been described extensively . In the next chapter 1.3: (i) Angular Motion is being defined with following parameter as angular displacement , angular velocity and acceleration . chapter 1.3(ii) gives Relation between angular velocity and linear velocity . Chapter 1.3(iii) deals with the study of Concept of Force in which different types of forces in nature may have been classified. Chapter 2.2(ii) discusses two types of forces as Contact & Non-contact forces . Further study has been given with 2.2(iii) study the definition of momentum & 2.2(iv) Laws of conservation of linear momentum . An extensive study of effect of force on basis of time of influence has been discussed as impulse & impulsive force in chapter 2.2(v) .Chapter 2.2(vi) is a brief study of Newton's laws of motion with equations & applications. Chapter 2.2(vii) is the study of Motion of lift . In the next unit chapter 2.3(i) has been covered with the definition of work, Power & Energy . Chapter 2.3 (ii) is Equation for P.E. & chapter 2.3(iii) is study of Work-Energy Principle with chapter 2.3(iv) is Representation of work by using graph & 2.3 (v) is graphical study of Work Done by torque Chapter3.2(ii) explains the definition of material science as branch of applied science relation with solid state physics or solid state chemistry in which one can study about structure of material and their properties as a interdisciplinary study about materials for applicable purposes . Further chapter 3.2 (ii) illustrate classification of materials in two categories in which material has been classified (a) Metals (e.g. Iron ,Gold , Aluminum , Silver Copper etc) & (b)Non-Metals (e.g. Leather, Rubber , plastics ,asbestos ,carbon etc) . A detail study has been focussed on Testing methods of materials in chapter 3.2 (III) for which the requirement of testing of materials is subjected for quality maintenance of the material in engineering for application purposes . A wide range of method has been described in detail for most cheap and suitable application of maintained quality of the material in industries .Despite its advantages the limitations of N.D.T method has that has been covered in chapter 3.2(IV) . The different names of N.D.T. Methods used in industries has been discussed in chapter 3.2(V) as X-ray radiography , Gamma-ray radiography , Magnetic particle inspection , Ultrasonic testing , Damping method & Electrical Method . Factors on Which selection of N.D.T depends has been discussed in chapter 3.2(vi) as Load ,Temperature , Composition , Grain-size, Thickness of the material & Service condition . For application point of view Study of principle, Set up & Procedure has been extensively covered in for X-ray radiography, Gamma-ray radiography, Magnetic particle inspection, Ultrasonic testing , Damping method & Electrical Method . Chapter 3.2(vii) Working , advantages ,limitations , Applications and Application code of N.D.T. methods as Penetrant method, Magnetic particle method ,Radiography, Ultrasonic , Thermography has been covered in this chapter ... Chapter 4.2(i) is the of study Acoustics the branch of physics in which we study about sound . The next chapter 4.2(ii) studies about Characteristics of audible sound and chapter 4.2(iii) Intensity & Loudness of sound ,Weber and Fechner's Law . Further chapter 4.2(iv) discusses the Limit of intensity and loudness and chapter. Chapter 4.2(v) is the study of Echoes & chapter 4.2(vi) is the study of Reverberation & Reverberation time (Sabine's formula) Timbre(quality of sound) of sound have been studied in chapter 4.2(vii) How Pitch or frequency of sound is related to audible sound wave and music system is the study part of 4.2(viii) . The Factors affecting Acoustical planning of auditorium reverberation has been briefly outlined in chapter 4.2(x). In an auditorium design the Creep Focusing is an important study of for checking the long term deformation in building has been given in chapter 4.2(v) . The characteristics of sound wave as standing wave has been studied in chapter 4.2(xi) . The coefficient of sound wave absorption has been studied in chapter 4.2(xii) .The Sound insulation & Noise pollution and the different ways of controlling these factor has been given in 4.2(xiv) & 4.2(xv) . The chapter 4.3 (ii) is the study of Definition of luminous intensity, intensity of illumination with their SI units . Chapter 4.3(iii) is the study Inverse square law and Photometric equation . In photometry chapter 4.3(iv) Bunsen's photometer-ray diagram has been introduced & Chapter 4.3(v) is the study of Need of indoor Lighting . Chapter4.3(vii) is the study of Indoor lighting schemes and factors affecting Indoor Lighting .

This book aims at providing a complete coverage of the needs of First Year students as per S.B.T.E.'s revised syllabus. The entire revised syllabus has been covered keeping in view the non-availability of the complete subject matter through a single source. The difficult articles have been explained in a simple language providing, wherever necessary, neat and well explained diagrams so that even an average student may be able to follow it independently. A sufficient number of solved examples and problems with answers and SBTE questions are given at the end of each topic. Formulae specifying symbol meaning are enlisted before solving the examples.
 Environmental Engineering is a simple eBook for Environmental Diploma Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest Important about Engineering Physics, Engineering Drawing Graphics, Communication Skills, Environmental Conservation and Hazard Management, Elements of Mechanical Engineering, Building Drawing, Applied Chemistry, Applied Mechanics, Workshop (Practical), Building Materials, Surveying, Structural Mechanics, Hydraulics, Environmental Science, Environmental Pollution, Structural Design and Drafting, Construction Technology, Water Supply and Sewerage System, Estimating and Costing, Chemical Treatment of Water and Waste Water, Industrial Water Pollution, Solid Waste Management, Biological Treatment of Waster Water, Environmental Monitoring, Air Pollution and Control and lots more.

 Mechanical Engineering
Engineering Physics is a complete textbook written for the diploma students according to the syllabi followed in the Indian institutes offering diploma courses in engineering. The book aims to provide a thorough understanding of the basic concepts, theories and principles of Engineering Physics, in as easy and straightforward manner as possible, to enable the average students grasp the intricacies of the subject. Special attempts have been made to design this book, through clear concepts, proper explanations with necessary diagrams and mathematical derivations to make the book student friendly. Besides, the book covers some advanced topics such as communication systems, ultrasonics and laser technology with their wide range of applications in several fields of science, technology, industry and medicine, etc. The book not only provides a clear theoretical concept of the subject but also includes a large number of solved problems followed by unsolved problems to reinforce theoretical understanding of the concepts. Moreover, the book contains sixteen chapters and each chapter contains glossary terms, short questions, and long questions for practice. KEY FEATURES • Logically organised content for sequential learning • Learning outcomes at the beginning of each chapter • Important concepts and generalisations highlighted in the text • Chapter-end quick review
The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. The only DP Chemistry resource that includes support directly from the IB, focused exam practice, TOK links and real-life applications drive achievement.
Now in its 50th edition, British Qualifications 2020 is the definitive one-volume guide to every recognized qualification on offer in the United Kingdom. With an equal focus on both academic and professional vocational studies, this indispensable guide has full details of all institutions and organizations involved in the provision of further and higher education, making it the essential reference source for careers advisers, students, and employers. It also contains a comprehensive and up-to-date description of the structure of further and higher education in the UK, including an explanation of the most recent education reforms, providing essential context for the qualifications listed. British Qualifications 2020 is compiled and checked annually to ensure the highest currency and accuracy of this valuable information. Containing details on the professional vocational qualifications available from over 350 professional institutions and accrediting bodies, informative entries for all UK academic universities and colleges, and a full description of the current structural and legislative framework of academic and vocational education, it is the complete reference for lifelong learning and continuing professional development in the UK.

 Marine Engineering is a simple e-Book for Marine Diploma & Engineering Course, Revised Syllabus in 2018, It contains objective questions with underlined bold correct answers MCQ covering all topics including all about the latest & Important about General Physiology with Alcohol and Drug Prevention, Spherical Trigonometry, Analytical Geometry with Solid Geometry, Aptitude for the Service, Engine Watch keeping, Engine Officers, Ship and Ships Routine, Ship Construction and Ship Stability, Engineering Drawing, Marine Pollution and Prevention Auxiliary Machinery, Mechanics and Hydrinechanics, Marine Power Plant, Marine Vocabulary and Terms, Plane Trigonometry, Marine Power Plant and Diesel, Engineering Physics, Fuel Oils and Lubricants, Electro Technology, Machine Shop, Integral Calculus, Heat Balance, Basic Safety and lots more.
 Physics for the IB Diploma, Sixth edition, covers in full the requirements of the IB syllabus for Physics for first examination in 2016. This Exam Preparation Guide contains up-to-date material matching the 2016 IB Diploma syllabus and offers support for students as they prepare for their IB Diploma Physics exams. The book is packed full of Model Answers, Annotated Exemplar Answers and Hints to help students hone their revision and exam technique and avoid common mistakes. These features have been specifically designed to help students apply their knowledge in exams. The book also contains lots of questions for students to use to track their progress. The book has been written in an engaging and student friendly tone making it perfect for international learners.
 A Txtbook of Engineering Physics is written with two distinct objectives:to provied a single source of information for engineering undergraduates of different specializations and provied them a solid base in physics.Successiv editions of the book incorporated topic as required by students pursuing their studies in various universities.In this new edition the contents are fine-tuned,modernized and updated at various stages.
