In Spain's Golden Fleece, Carla Rahn Phillips and William D. Phillips, Jr., offer the first authoritative history of Spain's vital wool industry. They show how wool was crucial both to Spain's domestic income and to the flourishing European textile industries that depended on the incomparable wool of Spanish Merino sheep. The authors begin by offering a broad and longterm look at the growth, dominance, and decline of the herding economy. They explain the components of wool production, from herding to shearing to preparing the wool for market. And they examine the evolution of the woolen textile industry in Spain and the export trade in raw wool.

seven hundred years before the Industrial Revolution, the stage was set for Europe's transformation from a backward agrarian society to a powerful industrialized society. An economic historian of international reputation, Carlo M. Cipolla explores the process that made this transformation possible. In so doing, he sheds light not only on the economic factors but on the culture surrounding them.

**of Religion, Psychical
Research** Edited by Andrew
Teverson, Alexandra Warwick and
Leigh Wilson This is the first
critical edition of the works of
Andrew Lang (1844-1912), the
Scottish writer whose enormous
output spanned the whole range
of late-nineteenth century
intellectual culture. Neglected
since his death, partly because of
the diversity of his interests and
the volume of his writing, his
cultural centrality and the
interdisciplinary nature of his
work make him a vital figure for
contemporary scholars. This
volume covers Lang's wide and
influential engagement with the
central areas of late nineteenth-
century anthropology. Lang made
decisive interventions in debates

around the meaning of folk tales and the origins of religion, as well as being an important figure in the investigation of spiritualist claims through psychical research. The work reproduced here includes journalism, essays, extracts from books and previously unpublished letters which together articulate and challenge some of the central ideas and discussions of the period, including evolution, the relation between modern and non-modern cultures, the nature of scientific claims to truth, and the consequences of materialism. The volume will provide new and illuminating ways of understanding and assessing the period for scholars across a range of disciplines, including those

interested in the histories of the fairy story, of science, of the occult, of colonialism and of anthropology. Key Features:
Unpublished archival material
Critical introductions to the major areas of his work

Printer of the Sixteenth Century

Humanism and Religion in Early Modern Spain brings together twenty-five essays by renowned historian Terence O'Reilly. The essays examine the interplay of religion and humanism in a series of writings composed in sixteenth-century Spain. It begins by presenting essential background: the coming together during the reign of the Emperor Charles V of Erasmian humanism and various movements of religious reform, some of them heterodox. It then moves on to the reign of Philip II, focusing on the mystical poetry and prose of St John of the Cross. It explores the influence on his writings of his humanist learning – classical, biblical and patristic. The third part of the book concerns a verse-epistle by John's contemporary, Francisco de Aldana. One chapter presents the text with a parallel version in English, whilst two others trace

its debt to Florentine Neoplatonism, particularly the thought of Marsilio Ficino. The final part is devoted to the humanism of the poet and Scripture scholar Luis de León, and specifically to the confluence in his work of biblical and classical motifs. This book is essential reading for scholars and students of early modern Spanish history, as well those interested in literary studies and the history of religion.

The Origin and Early History of Insurance

File Type PDF Espagne Ancienne A C Dition

Early Modern European Society, Third Edition

A new edition of a seminal work--one that explores crucial changes within Europe from the fifteenth to the eighteenth century The early modern period was one of profound change in Europe. It was witness to the development of science, religious reformation, and the birth of the nation state. As Europeans explored the world--looking to Asia and the Americas for new peoples and lands--their societies grew and adapted. Eminent historian Henry Kamen explores in depth the issues that most affected those living in early modern Europe--from leisure, work, and migration to religion, gender, and discipline--and the way in which population change impacted the aristocracy, the bourgeoisie, and the

poor. The third edition of this pioneering study includes new and updated material on gender, religion, and population movement. Richly illustrated, this is essential reading for all those interested in early modern European society.

Donahue's comprehensive examination of areas such as festal terminology, the social roles of benefactors and beneficiaries, the kinds of foods offered at feasts, and the role of public venues in community banquets draws on over three hundred Latin honorary inscriptions to recreate the ancient Roman feast. Illustrations depicting these inscriptions, as well as the food supply trades and various festal venues, bring important evidence to the study of this vital and enduring social practice. A touchstone for scholars, the work remains fresh and relevant. This expanded edition of Donahue's work includes significant new material on current trends in food

studies, including the archaeology and bioarchaeology of ancient food and drink; an additional collection of inscriptions on public banquets from the Roman West; and an extensive bibliography of scholarship produced in the last ten years. It will be of interest not only to classicists and historians of the ancient world, but also to anthropologists and sociologists interested in food and social group dynamics.

A novel of the Spanish Civil War—a modern classic, an international bestseller, and a searing exploration of the unknowability of history. In the waning days of the Spanish Civil War, an unknown militiaman discovered a Nationalist prisoner who had fled a firing squad and taken refuge in the forest. But

instead of killing him, the soldier simply turned and walked away. The prisoner, Rafael Sánchez Mazas—writer, fascist, and founder of the Spanish Falange—went on to become a national hero and ultimately a minister in Franco's first government. The soldier disappeared into history. Sixty years later, Javier Cercas—or at least, a character who shares his name--sifts through the evidence to establish what really happened that day. Who was the soldier? Why didn't he shoot? And who was the true hero in the story? Every answer yields another question in this powerful and
