A good sketch starts with good bones. The fourth book in the Urban Sketching Handbook series uses drawings and simple steps to explain the often challenging and overwhelming concepts of perspective in practical and useful ways for on-site sketching. Most books are either too abstract or don't provide enough information that relates to what you actually do when you're out in the busy, wide world about to start a drawing. Where do you start? How do you edit what you see to flatten and shrink it onto your paper? How does perspective work? The Urban Sketching Handbook: Understanding Perspective helps you learn to think like an architect, to draw buildings and spaces by reducing what you see to simple, basic shapes, then adding layers in simple steps, and finally finishing your sketch with detail, tone, and color--in accurate perspective. Full of helpful tips, architect and illustrator, Stephanie Bower even de-constructs sketches to show you how to create them! Once you understand perspective, it will change the way you see the world--you'll see perspective everywhere. Some of the key concepts explored in this volume are: - Basic Terms - Basic Spatial Principles - Types of Perspective - Building a Sketch in Layers - Special Conditions

4e de couv.: Chungking Mansions, a dilapidated seventeen-story commercial and residential structure in the heart of Hong Kong's tourist district, is home to a remarkably motley group of people. Traders, laborers, and asylum seekers from all over Asia and Africa live and work there, and even backpacking tourists rent rooms in what is possibly the most globalized spot on the planet. But as Ghetto at the center of the world shows us, the Mansions is a world away from the gleaming headquarters of multinational corporations -instead it epitomizes the way globalization actually works for most of the world's people. Through candid stories that both instruct and enthrall, Gordon Mathews lays bare the building's residents' intricate connections to the international circulation of goods, money, and ideas.

Sketching is more popular than ever, but busy lives leave almost no room for sitting down with a pad and pen, and practicing. Many people give up on their potential hobby

(and artistic outlet) because they feel they just don't have the time to lay the groundwork. Here's a secret though: you do have time each day to practice, you just need to incorporate sketching into your daily life. Sketch Now, Think Later covers the tools, techniques and tips that author and Urban Sketching Correspondent of Boston Mike Daikubara has developed in his more than 15 years as a practicing artist, and will show you how to fully dive into any sketching situation with limited time and tools, and still be able to produce memorable, great looking, fun sketches!

The Islamic Revolution in 1979 transformed Iranian society and reshaped the political landscape of the Middle East. Four decades later, Darioush Bayandor draws upon heretofore untapped archival evidence to reexamine the complex domestic and international dynamics that led to the Revolution. Beginning with the socioeconomic transformation of the 1960s, this book follows the

Shah's rule through the 1970s, tracing the emergence of opposition movements, the Shah's blunders and miscalculations, the influence of the post-Vietnam zeitgeist and the role of the Carter administration. The Shah, the Islamic Revolution and the United States offers new revelations about how Iran was thrown into chaos and an ailing ruler lost control, with consequences that still reverberate today.

Environmental Integration in Competition and Free-Movement Laws engages in a comprehensive analysis of the obligation of Article 11 TFEU (integration of environmental protection requirements) in the three core areas of EU internal market law: competition, state aid, and free movement. It develops a theoretical framework for integrating environmental and other policies and compares how environmental integration takes place within competition, state aid, and free movement law. In turn, it paves a way for a more transparent and consistent integration of environment protection in these three core areas of law. Structured in three parts, this volume (I) offers a detailed analysis of the historical development of environmental integration including discussions of the various intergovernmental conferences which led to a number of Treaty changes, shaping the obligation itself. (II) It investigates which provisions and concepts within competition law, state aid law, and the market freedoms can be interpreted in order to provide a clear demarcation of environmental protection and these areas of law. (III) It analyses how competition, state aid, and free movement law allow for a balancing of the environment against restrictions in cases of conflict.

This open access book draws a theoretically productive triangle between urban studies, theories of cosmopolitanism, and migration studies in a global context. It provides a unique, encompassing and situated view on the various relations between cosmopolitanism and urbanity in the contemporary world. Drawing on a variety of cities in Latin America, Europe, Asia, Africa and North America, it overcomes the Eurocentric bias that has marked debate on cosmopolitanism from its inception. The contributions highlight the crucial role of migrants as actors of urban change and targets of urban policies, thus reconciling empirical and normative approaches to cosmopolitanism. By addressing issues such as cosmopolitanism and urban geographies of power, locations and temporalities of subaltern cosmopolites, political meanings and effects of cosmopolitan practices and discourses in urban contexts, it revisits contemporary debates on superdiversity, urban stratification and local incorporation, and assess the role of migration and mobility in globalization and social change.

The power of reportage drawing is in the immediacy of the images that are created and the feeling of the illustrator's presence on location. Comparable in some ways to photojournalism, reportage illustrators are acting as visual journalists, proactively creating narrative work about issues and subjects, translating what they witness into handmade imagery. There is evidence that illustrations connect to people in powerful ways whether they are drawings created while embedded with troops in Afghanistan, documenting during a courtroom trial or recreating the energy of the crowd at a rock concert. This area of applied illustration also provides career opportunities for students and takes them out of the classroom and into different environments and situations. With practical information about tools, techniques and coping in various situations as well as inspirational interviews and advice from reportage artists working in the field, this book will fill a gap in this growing market.

Thank you for taking this journey with us. We hope this book brings a new awareness of the opportunity we have to help those with autism learn to communicate and realize their ambitions. about the Golden Hat Foundation and ways you can help, please visit our website: www.goldenhatfoundation.org “I simply couldn’t conceive of how devastating it would be not to be able to hear my children’s voices. Not to be able to communicate with them, to hear them learn, grow, and express themselves verbally. How fortunate, how blessed I am. This overwhelmed me. I can talk to my children, I can respond to their needs and comfort them when they tell me they are unwell. I can tell them stories and hear them tell theirs.”

Kate Winslet Imagine what it would be like not to be able to communicate with those we love. For many individuals living with nonverbal autism and their families, this is their everyday reality. The Golden Hat is an intimate response to this reality created by Kate Winslet, Margret Ericsdottir, and her son Keli, who has nonverbal autism. Kate and Margret’s stories, their personal email correspondence, and Keli’s poetry give us a profound insight into the world of those living with autism. Kate has shared this story with some of the world’s most famous people, posing the question: “What is important to you to express?” Their responses are a collection of intimate self-portraits and unique quotes. Among them are: Christina Aguilera Zac Efron Julianne Moore Maria Sharapova Kobe Bryant James Franco Rosie O’Donnell Ben Stiller Michael Caine Ricky Gervais Michael Phelps Meryl Streep Kim Cattrall Tom Hanks John C. Reilly Justin Timberlake George Clooney Elton John Tim Robbins Naomi Watts Leonardo DiCaprio Jude Law Kristin Scott Thomas Oprah Winfrey Put together by Kate, Margret, and the dedicated team who work daily on the Golden Hat Foundation, this project has been a labor of love. All the author proceeds from this groundbreaking book will benefit the Golden Hat Foundation, founded by Kate Winslet and Margret Ericsdottir to build innovative living campuses for people with autism and raise public awareness of their intellectual capabilities.

Mathematics in the constructions of bridges, in particular in Italy in the Sixties was presented by Tullia Iori. A very particular contribution on Origami by a mathematician, Marco Abate and an artist, Alessandro Beber. And many other topics. As usual the topics are treated in a way that is rigorous but captivating, detailed and full of evocations. This is an all-embracing look at the world of mathematics and culture. The world, life, culture, everything has changed in a few weeks with the Coronavirus. Culture, science are the

main ways to safeguard people's physical and social life. Trust in humanity's creativity and ability. The motto today in Italy is Everything will be fine. This work is addressed to all those who have an interest in Mathematics.

Using the ecosystem concept as his starting point, the author examines the complex relationship between premodern armed forces and their environment at three levels: landscapes, living beings, and diseases. The study focuses on Europe's Meuse Region, well-known among historians of war as a battleground between France and Germany. By analyzing soldiers' long-term interactions with nature, this book engages with current debates about the ecological impact of the military, and provides new impetus for contemporary armed forces to make greater effort to reduce their environmental footprint.

This collection deals with an ancient institution in Eastern Polynesia called the rahui, a form of restricting access to resources and/or territories. While tapu had been extensively discussed in the scientific literature on Oceanian anthropology, the rahui is quite absent from secondary modern literature. This situation is all the more problematic because individual actors, societies, and states in the Pacific are readapting such concepts to their current needs, such as environment regulation or cultural legitimacy. This book assembles a comprehensive collection of current works on the rahui from a legal pluralism perspective. This study as a whole underlines the new assertion of identity that has flowed from the cultural dimension of the rahui.

Today, rahui have become a means for indigenous communities to be fully recognised on a political level. Some indigenous communities choose to restore the rahui in order to preserve political control of their territory or, in some cases, to get it back. For the state, better control of the rahui represents a way of asserting its legitimacy and its sovereignty, in the face of this reassertion by indigenous communities.

This manual is intended to fill a gap in the area of Romance studies. There is no introduction available so far that broadly covers the field of Catalan linguistics, neither in Catalan nor in any other language. The work deals with the language spoken in Catalonia and Andorra, the Balearic Islands, the region of Valencia, Northern Catalonia and the town of l'Alguer in Sardinia. Besides introducing the ideologies of language and nation and the history of Catalan linguistics, the manual is divided into separate parts embracing the description – grammar, lexicon,

variation and varieties – and the history of the language since the early medieval period to the present day. It also covers its current social and political situation in the new local and global contexts. The main emphasis is placed on modern Catalan. The manual is designed as a companion for students of Catalan, while also introducing specialists of other languages into this field, in particular scholars of Romance languages.

This book is a thorough, practical review of the challenges facing clinicians treating skin microbes and how to combat these therapeutic dilemmas. It expresses the critical public health concern of antimicrobial resistance and shows how microorganisms are developing the ability to halt the progress of antimicrobials like antibiotics, antivirals, and antifungals. Chapters are grouped together in five sections for ease of use. The first three sections of the book convey foundational information on the mechanisms of antibiotics, antivirals, and antifungals resistance, as well as the implications of lack of vaccination. The fourth section then turns to the specifics of drug resistance for protozoan and helminth infections focusing primarily on initial and subsequent resistance to treatment. The book closes with a discussion on the potential solutions of innovative therapy including new delivery mechanisms, broad-spectrum antibiotics, phytochemicals, and biofilms. Chapters feature magnified, microscopic photos for identifying structures as they appear on the skin. Part of the Updates in Clinical Dermatology series, *Overcoming Antimicrobial Resistance of the Skin* is an important resource relevant during the COVID-19 pandemic, and is written for all medical healthcare professionals.
