Overtourism has become a major concern for an increasing number of destinations as tourism numbers continue to grow, stimulated by general economic and technological growth and the expansion of the global middle class. This, coupled with relentless promotion of tourism by many organisations and destinations, has increased tourism, despite growing opposition to excessive development. This book is the first academic volume to deal with this topic and contains chapters by experienced researchers in the tourism field, taking a multidisciplinary approach to review and explain the subject. The introductory section begins with an overview of the current situation and the forces enabling the appearance of overtourism. This is followed by a number of case studies from a range of destinations around the world, both urban and rural, which share the same problems. The concluding section includes a discussion of potential mitigation methods and approaches and a final assessment of future developments. The focus and relevance of this book are not just for academics, as it offers insights into destinations, enablers and solutions for how to address the issue of overtourism on a wide variety of scales. This book offers globally relevant perspectives on destinations as varied as Venice and Barcelona, that have gained global media attention, as well as less publicised rural areas and developing destinations.

Musical Rhythm in the Age of Digital Reproduction presents new insights into the study of musical rhythm through investigations of the micro-rhythmic design of groove-based music. The main purpose of the book is to investigate how technological mediation - in the age of digital music production tools - has influenced the design of rhythm at the micro level. Through close readings of technology-driven popular music genres, such as contemporary R&B, hip-hop, trip-hop, electro-pop, electronica, house and techno, as well as played folk music styles, the book sheds light on how investigations of the musical-temporal relationships of groove-based musics might be fruitfully pursued, in particular with regard to their micro-rhythmic features. This book is based on contributions to the project Rhythm in the Age of Digital Reproduction (RADR), a five-year research project running from 2004 to 2009 that was funded by the Norwegian Research Council.

Simon. Something frightful has happened to Jamie. Please come . . . When James Asher is found unconscious in the cemetery of the Church of St. Clare Pieds-Nus with multiple puncture-wounds in his throat and arms, his wife, Lydia, knows of only one person to call: the vampire Don Simon Ysidro. Old friend and old adversary, he is the only one who can help Lydia protect her unconscious, fevered husband from the vampires of Paris. Why James has been attacked - and why he was called to Paris in the first place - Lydia has no idea. But she knows that she must find out, and quickly. For with James wavering between life and death, and war descending on the world, their slim chance of saving themselves from the vampires grows slimmer with each passing day . . .

A secret village of elves living in the cupboard must fend off vacuum witches and deep-freeze trolls in the battles of the kitchen wars The people who live in the house have no idea that an entire village of elves resides in their china cupboard, behind the soup bowls and bread-and-butter plates. And when the humans start their spring-cleaning by taking everything out of the cabinets, the king elf's crown disappears. Now the elven community is in a terrible state, and the only way to save the realm is to find what their ruler has lost. Luckily Prince Coriander has returned, after years of training at the elf school, to hunt down the crown. But the kitchen holds hidden dangers—Fendire, the infrared dragon who lurks behind the gas burners; deep-freeze trolls who can swallow an elf in a single mouthful; very scary kelpies in the dishwasher; and the great cat Mistigris. The prince soon finds himself battling a furnace dragon, retrieving his mother's ring from the bottom of the dishwasher, and rescuing a nixie girl who lives in the kitchen sink—all while racing to discover who will become the new king of the elves! This ebook features illustrations by Jo Worth and a personal history of Joan Aiken including rare images from the author's estate.

This collective volume seeks to approach the practice of language diversity in multi-ethnic urban societies of Austria-Hungary and place it both within its local and its larger European context, and within the broader studies of multilingualism and multiculturalism.

Language Diversity in the Late Habsburg Empire

In 2012, Samuel Zuder (*1965) set out to one of the most fascinating places in the world. According to legend, the yogi Milarepa was the only one to have scaled it in the twelfth century, although thousands of pilgrims circumambulated it: Mount Kailash--also known as the "Jewel of Snow" due to its unusually symmetrical form--in the middle of the rocky desert of Tibet's Changthang plateau. Venerated by four

religious orientations--Hinduism, Buddhism, Jaina, and Bön--the photographer harnessed the magnetism of this site, its promise of happiness and enlightenment, in his images. With his large-format, analogue camera, Zuder accompanied pilgrims over a period of several weeks on their approximately fifty-three-kilometer-long path around Mount Kailash--which they regard as the origin of the world--to capture its silent grandeur.

"This imaginative, wordless book of color photographs is a visual treat, offering witty and subtle sets of images for enriching the eyes of children and adults....[A] satisfying, intriguing book."--School Library Journal. Shadows and reflections are all around us -- under our feet, over our heads, directly in front of us. But only Tana Hoban can make us look at -- and see -- what is right before our eyes. She makes us look with our minds and hearts and imaginations -- and our surroundings are forever changed.

One of the biggest stumbling blocks we hit when setting out to make our dreams come true is appreciating what is going well. Most of us have an unfortunate tendency to dwell on the problems rather than on the good things in our lives ... and then we wonder why things just seem to keep getting worse instead of better. In *The Power of Appreciation in Everyday Life*, psychologist Noelle Nelson explains how you can achieve success in every area of your life through transforming your beliefs with appreciation.

Translating Chinese Art and Modern Literature examines issues in cross-cultural dialogue in connection with translation and modern Chinese art and literature from interdisciplinary perspectives. This comprises the text-image dialogue in the context of Chinese modernity, and cross-cultural interaction between modern literature in Chinese and other literatures. This edited collection approaches these issues with discrete foci and approaches, and the ten chapters in this volume are to be divided into two distinct parts. The first part highlights the mutual effects between literary texts and visual images in the media of book, painting, and film, and the second part includes contributions by scholars of literary translation.

Precision medicine is rapidly becoming the standard-of-care for the treatment of cancer patients. This is made possible, in part, by the ready availability and reasonable costs of comprehensive DNA and RNA sequencing assays. However, precision medicine is complex and incorporates entirely new types of data and treatment paradigms that are outside of the training of most oncologists in practice today. Precision Medicine Oncology: A Primer is a concise review of the fundamental principles and applications of precision medicine, intended for clinicians, particularly those working in oncology. It provides an accessible introduction to the technological advances in DNA and RNA sequencing, gives a detailed overview of approaches to the interpretation of molecular test results and their point-of-care implementation for individual patients, and describes innovative clinical trial designs in oncology as well as characteristics of the computational infrastructures through which massive quantities of data are collected, stored, and used in precision medicine oncology.

In this compelling time-slip novel, a girl and a boy from the present day are carried through the Circle of Time to the twenty-second century. There they are caught up in the struggle of a peace-loving people trying to protect their simple and humane way of life from the assaults of a barbaric mechanized society who would conquer and enslave them. Through rich layers of time and meaning, Margaret Anderson has woven an intriguing tale in which the present becomes the past and the future is now.

Here are eight gloriously imaginative stories for eight satisfying sessions of bedtime reading. There's a flying apple pie, a cat that's bigger than an elephant, a house that lays an egg, storybook animals that leap out of their books at night, and a wealth of other wonderful characters and ideas, all with the colorful, dreamlike quality of the very best fairy tales. Joan Aiken's delicious prose is a joy to read aloud to very young listeners yet simple enough for the independent reader to savor on his or her own. Kevin Hawkes's illustrations--nearly 60 of them--capture with great flair and fun the magical adventures and the triumph of the good over the bad.

Coinciding with the diffusion of cubism and with the arrival of artists fleeing war to the Iberian Peninsula, such as Gleizes, Picabia, and the Delaunays, Spanish dance emerges as a model for abstract and decorative rhythm. Numerous artists used the dancers image to disarrange the figure, traveling from figuration to stylization or abstraction: among them, Picasso, Severini and Lipchitz. The same follows for the guitar, an element in numerous compositions, which is not foreign for its identification to the feminine body. Culturally Spanish subject matters, or castizo themes, were turned into a successful genre, between the advertising and tourist gaze, studies on folklore and reflections on identity. They were also years of fiestas and excesses, and flamenco made its appearance in many of these. Costumes and cross-dressing often acquire a Spanish character.

Felix Brooke, the orphaned son of an English soldier and an aristocratic Spanish mother, has been raised in the strict, loveless household of his grandfather in Villaverde, Spain. When Felix gains possession of a letter that contains a clue to the whereabouts of his father's family, he gladly runs away from home to pursue the trail. His journey from Spain to far-off England begins the adventure of a lifetime.

A study of the various ways in which field archaeologists set about making and using classifications to meet a variety of practical needs. The authors discuss how humans form concepts. They then describe and analyse in detail a specific example of an archaeological classification, and go on to consider the theoretical generalizations that can be derived from the study of actual in-use classifications.

Penguin Readers is an ELT graded reader series. Please note that the eBook edition does NOT include access to the audio edition and digital book. Written for learners of English as a foreign language, each title includes carefully adapted text, new illustrations and language learning exercises. Titles include popular classics, exciting contemporary fiction, and thought-provoking non-fiction, introducing language learners to bestselling authors and compelling content. The eight levels of Penguin Readers follow the Common European Framework of Reference for language learning (CEFR). Exercises at the back of each Reader help language learners to practise grammar, vocabulary, and key exam skills. Before, during and after-reading questions test readers' story comprehension and develop vocabulary. Plastic, a Level 1 Reader, is A1 in the CEFR framework. Short sentences contain a maximum of two clauses, introducing the past simple tense and some simple modals, adverbs and gerunds. Illustrations support the text throughout, and many titles at this level are graphic novels. We all use a lot of plastic every day. It is cheap and strong, and plastic things last. But where does plastic come from? And what can we do to recycle all the plastic in our world? Visit the Penguin Readers website Register to access online resources including tests, worksheets and answer keys. Exclusively with the print edition, readers can unlock a digital book and audio edition (not available with the eBook).

The hilarious adventures of an elderly pony named Mr. Mendelson and his 2 piano-playing field mice friends In a wild, remote place called Midnight Park, there lives an elderly Orkney pony named Mr. Mendelson. He is only 3 feet tall, is black all over, and has a big, handsome head. For years, Mendelson has been ridden by Sam, who is now old enough to go away to boarding school. But before he leaves, Sam asks his grandfather to buy Mendelson a piano. Not for Mendelson, because everyone knows horses can't play the piano, but for Mendelson's friends Gertrude and Bertha—2 talented field mice who were taught to play by a musician who lives in the park. Delighted when the piano is placed under a large oak tree, the mice promise Mendelson a concert at 6 p.m. every night. With 7 enchanting tales, Mice & Mendelson takes readers into the rich world of these farmyard friends. In 1 story, the old pony gets a bad case of the hiccups. In another, he learns to tell time with the help of Gertrude and Bertha, who wind his watch every day. In further adventures, Mendelson saves the moon from drowning in the pond and the village Christmas trees from being stolen. But what Mendelson really wants is to learn how to fly, and surprisingly his wish almost comes true—no thanks to the wicked ways of the scheming gypsy Dan Sligo! This ebook features illustrations by Babette Cole and a personal history of Joan Aiken including rare images from the author's estate.

Sequential images are as natural at conveying narratives as verbal language, and have appeared throughout human history, from cave paintings and tapestries right through to modern comics. Contemporary research on this visual language of sequential images has been scattered across several fields: linguistics, psychology, anthropology, art education, comics studies, and others. Only recently has this disparate research begun to be incorporated into a coherent understanding. In *The Visual Narrative Reader*, Neil Cohn collects chapters that cross these disciplinary divides from many of the foremost international researchers who explore fundamental questions about visual narratives. How does the style of images impact their understanding? How are metaphors and complex meanings conveyed by images? How is meaning understood across sequential images? How do children produce and comprehend sequential images? Are visual narratives beneficial for education and literacy? Do visual narrative systems differ across cultures and historical time periods? This book provides a foundation of research for readers to engage in these fundamental questions and explore the most vital thinking about visual narrative. It collects important papers and introduces review chapters summarizing the literature on specific approaches to understanding visual narratives. The result is a comprehensive "reader" that can be used as a coursebook, a researcher resource and a broad overview of fascinating topics suitable for anyone interested in the growing field of the visual language of comics and visual narratives.

Real estate agent Jenna Meyers is in a good position to work a side job as a private investigator searching for the money stolen from a bank. On a routine visit to a potential listing, Jenna discovers a grisly scene in an abandoned home. Her first thought is Squatters. A closer look reveals the house had been used as a place of torture. A chance sighting of someone lurking in the woods nearby leaves Jenna fearful for her life. When Sebastian McKinnon catches wind of the torture site, he vows to protect Jenna, convinced the victim tortured could have been his missing father. If the maniac conducting the torture thinks Jenna saw him, he might come after her, giving Sebastian the chance to capture him and learn the whereabouts of the Iron Horse Ranch patriarch. Together, Sebastian and Jenna struggle to find answers and stay alive while a fire storm builds in the Crazy Mountains of Montana.
