Housed in the former 16th-century convent of Santo Domingo church, now the Regional Museum of Oaxaca, Mexico, is an important collection of textiles representing the area’s indigenous cultures. The collection includes a wealth of exquisitely made traditional weavings, many that are now considered rare. The Unbroken Thread: Conserving the Textile Traditions of Oaxaca details a joint project the Getty Conservation Institute and the National Institute of Anthropology and History (INAH) of Mexico to conserve the collection and to document current use of textile traditions in daily life and ceremony. The book contains 145 color photographs of the valuable textiles in the collection, as well as images of local weavers and project participants at work. Subjects include anthropological research, ancient and present-day weaving techniques, analyses of natural dyestuffs, and discussions of the ethical and practical considerations involved in working in Latin America to conserve the materials and practices of living cultures.

Self-individualization has been interpreted as the process in which the all-embracing Self unfolds into an infinite variety of different individ uals, plants, animals and men. A comparison of the different ways in which the Self manifests itself in the biological and psychological devel opmental processes, or in a visionary image of the undivided Self, reveals the same basic structure of expression. The Self, the one, is represented by a circular domain, and comprises a basic inner duality, the two, creating a paradox of conflicting opposites. In the undivided Self the two give rise to a trinity in which, however, a quatemity is hidden. The latter expresses itself in this world as the four basic forces, the four Elements or the four main archetypes, specifying the possibilities or development in space and time. Self-individualization starts with the first appearance of a primary structure of an individual sub-Self. This is the fifth basic force, the fifth Element. Further development is character ized by four generative principles: 1st, the principle of wholeness: connection and integration (being oriented to remaining whole or restoring wholeness); 2nd, the principle of complementarity and com pensation; 3rd, the principle of periodic shift between opposing influences); 3rd, the enstructuring principle (causing the relative stability of the spatial appear ance of the manifest structure), and 4th, the principle of gesture (resulting in a gradual stepwise development of that structure into a full-grown individual).

Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

The Britannica Enciclopedia Moderna covers all fields of knowledge, including arts, geography, philosophy, science, sports, and much more. Users will enjoy a quick reference of 24,000 entries and 2.5 million words. More then 4,800 images, graphs, and tables further enlighten students and clarify subject matter. The simple A-Z organization and clear descriptions will appeal to both Spanish speakers and students of Spanish.

In November 2015, Buenos Aires, Argentina became the location of several important events for geo-professionals, with the simultaneous holding of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE), the 8th South American Congress on Rock Mechanics (SCRM) and the 6th International Symposium on Deformation Characteristics of Geomaterials, as well as the 22nd Argentinean Congress of Geotechnical Engineering (CAMSIGXXII). This synergy brought together international experts, researchers, academics, professionals and geo-engineering companies in a unique opportunity to exchange ideas and discuss current and future practices in the areas of soil mechanics and rock mechanics, and their applications in civil, energy, environmental, and mining engineering. This book presents the invited lectures of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE) and the 8th South American Congress on Rock Mechanics (SCRM). It includes the Casagrande Lecture delivered by Luis Valenzuela and 21 Plenary, Keynote and Panelist Lectures from these two Buenos Aires conferences.

Chronicles the life and rule of the Spanish dictator, from his early years to his military career to his leadership of the nation.

In today's increasingly electronic world, we say our personality traits are "hard-wired" and we "replay" our memories. But we use a different metaphor when we speak of someone "reading" another's mind or a desire to "turn over a new leaf"—these phrases refer to the "book of the self," an idea that dates from the beginnings of Western culture. Eric Jager traces the history and psychology of the self-as-text concept from antiquity to the modern day. He focuses especially on the Middle Ages, when the metaphor of a "book of the heart" modeled on the manuscript codex attained its most vivid expressions in literature and art. For instance, medieval saints' legends tell of martyrs whose hearts recorded divine inscriptions; lyrics and romances feature lovers whose hearts are inscribed with their passion; paintings depict hearts as books; and medieval scribes even produced manuscript codices shaped like hearts. "The Book of the Heart provides a fresh perspective on the influence of the book as artifact on our language and culture. Reading this book broadens our appreciation of the relationship between things and ideas."—Henry Petroski, author of The Book on the Bookshelf

VOCES DE HISPANOAMÉRICA, the market-leading anthology, features the most distinguished authors of Spanish-American literature from the pre-colonial period to the present. Introductory essays and literary selections, combined with many historical and literary references, make this text an invaluable resource. Through detailed essays that focus on each historical period, this 5th edition provides the necessary background information for you to effectively study, analyze, and evaluate literary works. Landscapes of Desire in the Poetry of Vittorio Sereni is the first book-length study in English on Vittorio Sereni (1913-83), one of the major figures of Italian twentieth-century poetry. It looks at how Sereni constructs a new identity for the lyric 'I' through analysing the poet's relationship to landscape (both geographical and poetic), and his dialogue with the Italian poetic tradition, rooted in the notion of desire and a deep-seated preoccupationwith absence and loss. It argues that these facets of Sereni's poetry endow his subject with a psychological and linguistic complexity that earns him a place alongside some of the more experimental figures oftwentieth-century poetry, while reinforcing at the same time his debt to tradition and his vital contribution to the development and adaptation of the lyric form.

In the middle of the night, a woman awakens to find a stranger in her bedroom. Though she cannot determine who he is—or, indeed, whether he is even real at all and not just an extension of her dreams or her writing—she is drawn into a conversation...

Focusing on Shelley's 'Italian experience', the present study both addresses itself to the living context which nurtured Shelley's creativity, and explores a neglected but essential component of his work. The poet's four years of self-exile in Italy (1818-1822) were, in fact, the most decisive of his career. As he responded to Italy, his poetry acquired a new subtlety and complexity of vision. Endowed with remarkably keen powers of absorption, the poet imaginatively reshaped the rich cultural heritage of Italy and the vital qualities of its landscape and climate.

Political Crises, Social Conflict and Economic Development

*En nuestra historia de España se ha ocultado que hubo un día no muy lejano, en un territorio que no era ni patria, una guerra. La guerra de Ifni de 1957–1958 en la que hubieron 300 muertos, más de 500 heridos, 40 prisioneros con una mujer y dos niños, 34 muertos mutilados, dejados sin recibir sepultura en el territorio de Ifni ocupado por el Ejército de Liberación marroquí. Los cuerpos nunca se recuperaron. La guerra de IFNI, ES LA GUERRA QUE NO FUE. Según el Régimen franquista un mal sueño. Salimos de Sidi Ifni dejando todo el territorio de Ifni, ocupado por Marruecos desde el 23 de noviembre de 1957 por mandato de la ONU. Con el tratado de Retrocesión España abandonaba Sidi Ifni como Ifni. Así ni vencedores ni vencidos, España abandonaba Ifni cumpliendo el mandato de la ONU. Esta incongruencia es la que trato de explicar en este libro. Adolfo Cano*

*Political Crises, Social Conflict and Economic Development is a rare attempt to undertake comparative political economy analysis of the Andean region and thus represents a welcome contribution. . . It is clearly written and will engage scholars interested in Latin America from a wide range of disciplines. Jonathan di John, Journal of Agrarian Change This collection of essays on the political economy of the Andean region goes to the heart of the struggle these smaller economies face in completing crucial reforms and achieving higher growth. Andrés Solimano has brought together the best and the brightest talent from each country, the result being the most compelling analysis ever of how enclave development and a historical dependence on primary exports renders these countries distinctly Andean. As the essays argue, the political solutions and economic remedies must address this phenomenon, rather than mimicking those strategies of the larger emerging market countries in the region. Carol Wise, University of Southern California, US The contributors to this authoritative volume analyze the impact of political crises and social conflict on economic performance in the Andean region of Latin America. The blend of theory and case studies is also relevant for understanding other complex societies in the developing world and transition economies. The book provides illuminating insights on how to understand, and survive, the complicated interactions between volatile politics, unstable democracies, violence, social inequality and uneven economic performance. Recent political economy theories are combined with valuable quantitative and qualitative information on presidential crises, breakdowns of democracy, constitutional reforms, quality of institutions, and social inequality and exclusion to understand actual country realities. Part I provides the conceptual framework and a regional perspective of the book. Part II contains five political economy country studies Bolivia, Colombia, Ecuador, Peru and Venezuela written by leading scholars in the field and former senior policymakers, including a former President. Together, the chapters highlight the detrimental effects of political instability and social conflict on economic growth and stability, as well as the feedback effects from poor economic performance on political instability and institutional fragility. The country studies warn that narrow economic reforms that do not pay adequate attention to politics, institutions and social structures are bound to fail in bringing lasting prosperity and stability to complex societies. Examining new and rich information on episodes of political turmoil, military interventions, forced presidential resignations, constitutional reforms and social uprisings, this book will be required reading for all those interested in the interface of politics and economic development.*

***This book examines the emergence, development, and demise of a network of organizations of young leftist militants and intellectuals in South America. This new generation, formed primarily by people who in the late 1960s were still under the age of thirty, challenged traditional politics and embraced organized violence and transnational strategies as the only ways of achieving social change in their countries during the Cold War. This lasted for more than a decade, beginning in Uruguay as a result of the rise of authoritarianism in Brazil and Argentina, and expanding with Che Guevara's Bolivia campaign in 1966. These coordination efforts reached their highest point in Buenos Aires from 1973 to 1976, until the military coup d’état in Argentina eliminated the last refuge for these groups. Aldo Marchesi offers the first in-depth, regional and transnational study of the militant left in Latin America during the turbulent 1960s and 1970s.***

***The Routledge Encyclopedia of Films comprises 200 essays by leading film scholars analysing the most important, influential, innovative and interesting films of all time. Arranged alphabetically, each entry explores why each film is significant for those who study film and explores the social, historical and political contexts in which the film was produced. Ranging from Hollywood classics to international bestsellers to lesser-known representations of national cinema, this collection is deliberately broad in scope crossing decades, boundaries and genres. The encyclopedia thus provides an introduction to the historical range and scope of cinema produced throughout the world.***
