For 60 years Qumran research has been focused on epigraphy, exegesis, and the historical sources of the Dead Sea Scrolls. The manuscripts are now published and accessible, and research is turning in a positive way to the archaeology of the site and its context. The time has come to provide researchers with a complete documentation. The excavator, Roland de Vaux, had given preliminary reports and a valuable interpretation made in the immediate aftermath of the excavations. Since considerable progress has been made in the archeology of Hellenistic and Roman Palestine, however, Qumran has to be reassessed and the interpretation objectively verified.Volume IIIA presents an up-to-date archaeological reconsideration: a shorter and more precise chronology, in which the earthquake of 31 BC is deleted; the concept of an Essene community is challenged, owing to the lack of a suitable infrastructure; the cemetery itself is connected with a Jewish diaspora scattered around the Dead Sea. Other facilities strengthen the Jewish character of the site, however. The function of Qumran fits better with the rites of a pilgrimage on the occasion of the festivals of Passover and Pentecost.In the second part, the peripheral Essene facilities, expanded around an earlier Hellenistic center, are analyzed and described. The essay seeks to outline their internal consistency and to determine their function. The restoration of a stratigraphy, by cross-checking the excavation archives, leads to a redistribution of pottery in four levels in a more precise chronology.The reconsideration makes use of anthropology, which opens up the archaeological field and throws additional light on the manuscripts.

Charles Dickens, celebrated novelist and journalist, believed that his greatest ability as a writer was to make people laugh. Yet, to date, humor has been strangely marginalized in journalism, communication and media studies. This innovative book draws together the work of seventeen writers to show that, starting in the 1640s during the English Civil War, and continuing through to the present time, humor has indeed been an important ingredient of journalism. Countries studied include Australia, Britain, Canada, Chile and the United States. The Funniest Pages is divided into four sections: «Seriously Funny, From Past to Present,» «Unsolemn Columnists,» «This Sporting Life» and a final section, «Have Mouse, Will Laugh,» which looks at humor in online journalism. Chapters examine Joseph Addison, Richard Steele and the birth of social and political satire; Allen Ginsberg, Mad magazine, and the culture wars of the 1950s; John Clarke and the power of satire in journalism, and more.

In this volume, scholars of Judaism, Christianity, and late antique religion demonstrate how special attention to the ritual and rhetorical functions of space can improve modern interpretations of ancient literary, liturgical, and ritual texts. Each chapter is concerned with reconstructing the dynamic interaction between space and text. Demonstrating the pliability of the idea of space, the contributions span from Second Temple debates over Eden to Byzantine Christian hymnography. In so doing, they offer a number of answers to the seemingly simple question: What difference does space make for how modern scholars interpret ancient texts? Contributors: Mika Ahuvia, David Frankfurter, Gil P. Klein, Alexander Kocar, Derek Krueger, AnneMarie Luijendijk, Ophir Munz-Manor, Rachel Neis, Eshbal Ratzon.

This massive book is an intensive inquest into the fate of the human subject as it passes through the primitive, despotic, passional and capitalist regimes found in Deleuze and Guattari. Emphatic, acerbic, loquacious, impassioned, and marshaling a considerable array of theoretical and literary frameworks--from Schelling, Kantorowicz, Agamben, Hegel, Nietzsche, Badiou, Rosenzweig, L�vinas, Derrida, Blanchot, Kierkegaard, Marx, Lazzarato, Berardi, Zizek and Plotinus to Solzhenitsyn, Pessoa, Fuentes, Dostoyevsky, Kafka, Beckett, Mann, Schreber, Dante, Milton, Shakespeare, Sade, the Midrash and Kabbalah--and cavorting through vast expanses of world history, Bartosz Lubczonok scrutinizes the maladies of pain, resentment, bad conscience, ideology, immiseration, torture, death, depression and suicide that have and continue to afflict humanity, and the possibilities of its vertiginous liberation. All is here: the auto-genesis of God, the Crucifixion, the Holocaust, September 11. The Apotheosis of Nullity is a searing indictment of all forms of oppression and despotism, inclusive of neoliberal capitalism, and far surpasses any usage of Deleuze and Guattari to date. It is relentless.

Bonhoeffer's Intellectual Formation

The Book of Esther is one of the five Megillot. It tells the story of a Jewish girl in Persia, who becomes queen and saves her people from a genocide. The story of Esther forms the core of the Jewish festival of Purim. The commentary presents a literary analysis of the text, taking into account the inclusion and arrangement of different pericopes, and an analysis of the narration. Likewise, it will discuss the style, the syntax, and the vocabulary. The examination of the intellectual context of the book, biblical and extrabiblical textual traditions on which the book is based and with which it is in intertextual dialogue, leads to a discussion of the redactional process and the historical and social contexts in which the authors and redactors worked.

Happy Birthday Therapy explores the many dimensions of birthdays—from facing regrets to appreciating the present to embracing the future. The inimitable elf-help blend of charm and vibrance makes this birthday greeting an ideal gift for a friend—or for yourself!

The NEUROGES system is an objective and reliable interdisciplinary research tool for the analysis of body movement and gesture, field-tested cross-culturally in adults, children, and individuals with mental illness or brain damage. The book contains the complete research coding manual including interactive video learning tool and coding template.

In 1611 Edmond Richer, the syndic of the Faculty of Theology of Paris, published a short but incisive defence of the conciliarist doctrine under the title De ecclesiastica et politica potestate. He claimed that this doctrine had been almost uninterruptedly followed by the University of the Paris since the time of the Council of Constance in the early 15th century. Within two years, at least six Latin, French or bilingual editions of the treatise saw the light as well as an English and a Dutch translation. The book was condemned at a meeting of the French bishops in March 1612 and its author was dismissed from his position of syndic of the Faculty of Theology a few months later. He withdrew from public life but remained influential. He continued to write in defence of the conciliarist doctrine and the so-called liberties of the Gallican Church until his death in 1631. He vehemently opposed Cardinal Bellarmine's doctrine of the indirect power of popes in temporal matters but never subscribed to the doctrine of the divine power of kings. Most of his books were published posthumously. Philippe Denis retraces Edmond Richer's career and examines his ecclesiological and political thinking. Without taking all the syndic's opinions at face value, this volume commits itself to taking seriously Richer's declared intention, which was to vindicate the teaching of the School of Paris and that of Jean Gerson in particular. Philippe Denis places the heated, sometimes aggressive, debates between Richer and his adversaries in the context of a double progression: that of the doctrine of an absolute monarchy, a form of government which had been developing since the troubles of the League, and that of the Ultramontane ideas, often disputed but supported with growing vigour, in France and elsewhere, in the context of the reception of the Council of Trent.

New Concepts for Presence and Availability in Ubiquitous and Mobile Computing

Music and Ritual

Would you like to feel less stressed, live more calmly, and be more content? The simple ideas that mindfulness teaches can help you achieve all these things, by allowing you to live in the moment and embrace all that life has to offer. Bursting with tips, centering statements, and activities, How to Be Mindful will provide you with everything you need to make every day full of gratitude and peace.

Against a backdrop of liturgical change in the Orthodox Slavic world, this book addresses the performance practices of particular numbers as described in a selection of medieval Slavic service books. The feasts of the Holy Cross as observed during the week of September 14, during the Lenten fast and Good Friday serve as case studies

Cultural Writing. Published through Muske, whose purpose is to research, recover, document and conserve the world's ethnomusicological heritage and to disseminate it across a wide audience, the papers in MUSIC AND RITUAL "were first prepared for a panel...at the 2005 annual conference of the British Forum for Ethnomusicology....At the conference, it seemed timely to return to how performance informs, illustrates and interpenetrates ritual, without setting a clear, narrow, agenda in our call for papers...[These papers] explore questions raised by the performance of music and movement, and their interrelationships, in artistic practice beyond the European art and popular music canons"--from the Introduction by Keith Howard.

What's in a prefix? How to read a prefix as short as 're-'? Does 're-' really signify? Can it point into a specific direction? Can it reverse? Can it become the shibboleth of a 'postcritical' reboot? At first glance transparent and directional, 're-' complicates the linear and teleological models commonly accepted as structuring the relations between past, present, and future, opening onto errant temporalities.

Machine Learning for Cyber Physical Systems

A Biography of Shriman Tapasviji Maharaj, a Mahatma who Lived for 185 Years

The Ritual and Rhetorical Use of Space

How Pope Francis is Misleading His Flock

Genome Editing in Agriculture

In this first comprehensive study of Plato's conception of justice, apprehension of human dignity plays a crucial role for understanding an individual in relation to law and state. Plato's philosophy turns out to provide foundations for modern-day human rights protection rather than for totalitarian approaches.

Faithful Catholics are beginning to realize it's not their imagination. Pope Francis has led them on a journey from joy to unease to alarm and even a sense of betrayal. They can no longer pretend that he represents merely a change of emphasis in papal teaching. Assessing the confusion sown by this pontificate, Lost Shepherd explains what's at stake, what's not at stake, and how loyal believers should respond.

This Open Access proceedings presents new approaches to Machine Learning for Cyber Physical Systems, experiences and visions. It contains some selected papers from the international Conference ML4CPS – Machine

Learning for Cyber Physical Systems, which was held in Karlsruhe, October 23-24, 2018. Cyber Physical Systems are characterized by their ability to adapt and to learn: They analyze their environment and, based on observations, they learn patterns, correlations and predictive models. Typical applications are condition monitoring, predictive maintenance, image processing and diagnosis. Machine Learning is the key technology for these developments.

The book analyzes the whole range of Anglo-Romanian dealings in the aviation industry, considering both civilian and military technology, over a period overarching Détente and terminating after the collapse of Communism in Romania. It offers an unusual look at the reality of political and economic relations between the Blocs during the Cold War.

This book provides a unique perspective on journalism and communication education, drawing on extensive, detailed data across time to examine the evolution of education for journalism and related communication occupations such as public relations and advertising. It demonstrates how journalism and communication education adapted to forces within the university as well as forces from outside the university. Particular attention is given to the impact of the labor markets to which journalism and communication education is linked. The analysis shows dramatically how dependent employers are on journalism and communication education, how educational institutions have changed to accommodate female and minority students, and how the labor market has responded to the graduates produced. Part history, part sociological analysis, this book will change the reader's understanding of education for journalism, public relations, advertising and the related occupations. It also offers insights about what the future of education in these fields holds.

Metamathematics and the Philosophical Tradition is the first work to explore in such historical depth the relationship between fundamental philosophical quandaries regarding self-reference and meta-mathematical notions of consistency and incompleteness. Using the insights of twentieth-century logicians from Gödel through Hilbert and their successors, this volume revisits the writings of Aristotle, the ancient skeptics, Anselm, and enlightenment and seventeenth and eighteenth century philosophers Leibniz, Berkeley, Hume, Pascal, Descartes, and Kant to identify ways in which these both encode and evade problems of a priori definition and self-reference. The final chapters critique and extend more recent insights of late 20th-century logicians and quantum physicists, and offer new applications of the completeness theorem as a means of exploring "metatheoretical ascent" and the limitations of scientific certainty. Broadly syncretic in range, Metamathematics and the Philosophical Tradition addresses central and recurring problems within epistemology. The volume's elegant, condensed writing style renders accessible its wealth of citations and allusions from varied traditions and in several languages. Its arguments will be of special interest to historians and philosophers of science and mathematics, particularly scholars of classical skepticism, the Enlightenment, Kant, ethics, and mathematical logic.

This is your comprehensive guide to SAP Ariba: implementation, configuration, operations, and integration! Get step-by-step instructions for each functional area, from contract and invoice management to guided buying and beyond. See how each SAP Ariba application fits into your procurement landscape and how they connect to SAP S/4HANA and SAP ERP. Get your cloud procurement project started today! a. Neue Pflanzenzüchtungstechnologien wie CRISPR/Cas haben das Potenzial zur Verbesserung der Nachhaltigkeit in der Landwirtschaft. Mit den Techniken des Genome Editing können die Erträge bei gleichzeitig reduziertem Pestizideinsatz gesteigert werden. Auch an der Verbesserung des Nährwerts von Pflanzen wird weltweit geforscht. Ob die neuen Techniken allerdings in Europa zum Einsatz kommen, ist gegenwärtig fraglich. Soll Genome Editing wie die "klassische" Gentechnik reguliert werden? Und wie kann eine verantwortliche Auslegung des Vorsorgeprinzips beim Einsatz der neuen Technologien aussehen? Die politische Diskussion um die Bewertung der neuen Pflanzenzüchtungstechnologien ist in vollem Gange. Die Beiträge dieses Sammelbands präsentieren rechtliche, soziale und ethische Aspekten zum Thema, die auf einer Summer School des Instituts Technik-Theologie-Naturwissenschaften (TTN) an der Ludwig-Maximilians-Universität München zur Diskussion standen. Mit Beiträgen von Stephan Schleissing; Sebastian Pfeilmeier; Christian Dürnberger; Jarst van Belle; Jan Schaart; Robert van Loo; Katharina Unkel; Thorben Sprink; Aurélie Jouanin; Marinus J.M. Smulders; Hans-Georg Dederer; Brigitte Voigt; Felix Beck; João Otávio Benevides Demasi; Bartosz Bartkowski; Chad M. Were there figurines in Yehud during the Achaemenid period, and in particular in Jerusalem? A positive answer to this question disproves the general consensus about the absence of figurines in Yehud, which is built on the assumption that the figurines excavated in Judah/Yehud are chronologically indicative for Iron Age II in this area (aside from a few typological exceptions). Ephraim Stern and others have taken this alleged absence of figurines as indicative of Jewish monotheism's rise. Izaak J. de Hulster refutes this `no figurines -> monotheism' paradigm by detailed study of the figurines from Yigal Shiloh's excavation in the 'City of David' (especially their contexts in Stratum 9), providing ample evidence for the presence of figurines in post-587/586 Jerusalem. The author further reflects on the paradigm's premises in archaeology, history, the history of religion, theology, and biblical studies, and particularly in coroplastics (figurine studies).

This delightful and inspiring biography -- written by a devotee about his Spiritual Master -- details the process of kaya-kalpa (an ancient method of physical rejuvenation) in the ascetic Shriman Tapasviji.

Developers! Make the grade with this SAP Cloud Platform certification study guide. From application development and integration to mobile services and the Internet of Things, this guide will review the key technical and functional knowledge you need to pass with flying colors. Explore test methodology, key concepts for each topic area, and practice questions and answers to solidify your knowledge. Your path to SAP Cloud Platform certification begins here! a. Test Structure Prepare with up-to-date information on each topic covered in the C_CP_13 exam, including application development, extension, and integration. b. Then dial in with important terminology, and key takeaways for each subject. c. Q&A After reviewing chapters, test your skills with in-depth questions and answers for each section and improve your test-taking skills. 1) C_CP_13 2) Architecture 3) Development, extension, and integration 4) SAP Cloud Platform Mobile Services 5) SAP Cloud Platform Internet of Things 6) SAP Cloud Platform SDK 7) SAP Cloud Platform SDK for the Neo environment 8) Cloud Foundry 9) Java 10) SAP HANA XS 11) SAPUI5

This book examines the idiosyncratic risk, risk-return trade off and payout decisions for faith-based investors including Islamic Shariah compliant and ethical investors, who may be paying a cost for their belief system in the form of under-diversification of portfolios and additional monitoring costs owing to their unique risk profile. There is a growing number of investors who are motivated by social, environmental, and ethical considerations in their investment decisions. They apply a set of investment screens to include or exclude assets based on ecological, social, corporate governance or ethical criteria. This socially responsible investment (SRI), ethical investment or sustainable investment style is prevalent since religious or ethical values matter to investors even if the risk-adjusted returns are lower than those of conventional investments. The author addresses these issues for Islamic and socially responsible portfolios in detail by using proprietary data of Dow Jones Indices from the United States. The findings are a unique and valuable addition to the existing corporate finance, portfolio management and Islamic finance literature.

"The Big Typescript"

Infektionsschutz - Krebsabwehr - Hautheilung

Lost Shepherd

Die Bedeutung Ludwig Wittgensteins ist unbestritten, sein Einfluss auf die Philosophie unseres Jahrhunderts größer als der irgendeines anderen Denkers unserer Zeit, und das, obw seinen Lebzeiten nur einen einzigen philosophischen Text veröffentlicht hat, die "Logisch-philosophische Abhandlung", 1922. Das sogenannte "Big Typescript" von 1932–33 ist, seit Veröffentlichung des "Tractatus", Wittgensteins erster Versuch, seine neueren Gedanken in einem Buch zusammenzufassen. Äußerlich erscheint es das Fertigste unter seinen Schrif einem Inhaltsverzeichnis, unterteilt in 19 Kapitel mit 140 Sektionen. Doch ist es ein Fragment ohne Titel. Die umfangreichen Über- und Umarbeitungen, die Wittgenstein noch währe Schreibarbeiten beginnt, zeigen, dass das Typoskript auf dem Weg zum angestrebten Buch eher einen status nascendi darstellt, als, wie oft argumentiert, "a coherent stage of Wit thought". Band 11 der Wiener Ausgabe stellt das "Big Typescript", die Typoskripte TS 213 sowie die TSS 214–219, sachkundig ediert vor.

In democracies of advanced plurality, religion is a contested and powerful part of public discussions and practices. Today, religious difference is articulated and negotiated controv interaction with other spheres of society. While there are clear tendencies of increasing polarization, we also encounter moments of acknowledgement and appreciation of pluralit these complexities and challenges of our time, this volume scrutinizes contested practices where religious difference matters. Committed to an interdisciplinary exchange betweer the study of religion and political philosophy, this volume is grounded in the attention for concrete practices and phenomena as well as the conviction that difference is both a pro concept and an enriching experience. Exploring practices of shared places, sexuality, justice and the commitment to the human being in education, migration and violent conflicts, t as a whole contributes to the analysis of contested social and political practices in order to investigate the significance and role of religion in contemporary societies, and thus it develops theoretical reflection about religion in contemporary research.

Gatewatching and News Curation: Journalism, Social Media, and the Public Sphere documents an emerging news media environment that is characterised by an increasingly networ social structure. In this environment, professional journalists and non-professional news users alike are increasingly cast in the role of gatewatcher and news curator, and sometin these roles with considerable enthusiasm. A growing part of their everyday activities takes place within the spaces operated by the major social media providers, where platform f outside of their control affect how they can post, find, access, share, curate, and otherwise engage with news, rumours, analysis, comments, opinion, and related forms of informat current social media environment the majority of users are engaged in sharing news; if the networked structure of these platforms means that users observe and learn from each

sharing practices; if these practices result in the potential for widespread serendipitous news discovery; and if such news discovery is now overtaking search engines as the majo traffic to news sites--then gatewatching and news curation are no longer practiced only by citizen journalists, and it becomes important to fully understand the typical motivation and consequences of habitual news sharing through social media platforms. Professional journalism and news media have yet to fully come to terms with these changes. The first citizen media was normalised into professional journalistic practices--but this book argues that what we are observing in the present context instead is the normalisation of profe journalism into social media.

A new and challenging perspective on Nazi exhibition design In one of the most comprehensive analyses ever written on the subject, Michael Tymkiw reassesses the relationship between Nazi exhibition design and modernism. While National Socialist exhibitions are widely understood as platforms for attacking modern art, they also served as sites of surprising formal experimentation among artists, architects, and others, who often drew upon and reconfigured the practices and principles of modernism when designing exhibition spaces and the objects within. In this book, Tymkiw reveals that a central motivation behind such experimentation was the interest in provoking what he calls "engaged spectatorship"—attempts to elicit experiences among exhibition-goers that would pique their desire to become involved in wider processes of social and political change. For historians of art, architecture, performance, and other forms of visual culture, Nazi Exhibition Design and Modernism unravels long-held assumptions, particularly concerning the ideological stakes of participation.

Written by internationally revered clairvoyant counselor and educator Ellen Tadd, The Infinite View is a spiritual classic in the making. People often lean towards either trusting their gut or relying on their analytical mind, but Tadd urges readers to consider a new approach that allows both emotions and the intellect to be guided by wisdom. Through describing how the Spirit, soul, and personality are integrated, she guides readers in deepening and expanding their perceptions to discover practical solutions to everyday challenges. According to Tadd, Spirit is the God Force that animates and empowers us and suffuses everyone and everything. But while Spirit is conscious and communicative, we haven't been taught to look for or listen to it. In fact, most of us have been conditioned not to look or listen. When we choose to attune our conscious mind with Spirit, we find ourselves able to engage life with greater clarity--even when it tests us through illness, death, loneliness, anxiety, or fear. The Infinite View offers tools and insights needed to achieve this attunement. Drawing on her personal narrative, as well as the experiences of her students, Tadd helps readers transform their understanding of themselves and the world around them.

The authors of this volume discuss specific philosophical and theological ideas in view of Bonhoeffer's intellectual formation. As such, all the studies converge on the thought of Bonhoeffer as a whole in order to illuminate the growth and maturation of his theology. Contributors to this volume include: Barry Harvey, Wayne Floyd, Peter Frick, Geffrey Kelly, Wolf Krötke, Andreas Pangritz, Stephen Plant, Martin Rumscheidt, Christine Tietz, Ralf Wüstenberg, and Josiah Young.

The first book to explore two of the biggest names in modern and contemporary art side by side, Marcel Duchamp and Jeff Koons In the first half of the 20th century, Marcel Duchamp redefined what we consider art and what it means to be an artist. Many of his ideas return, transformed, in the work of Jeff Koons, born when Duchamp was 68 years old and whose own career lit up the art world of the late 20th and early 21st centuries. This is the first book to explore the affinities between these two highly influential artists, whose creative universes similarly question the function of objects and the allure of commodities. International art historians, writers, and curators contribute their expertise on topics such as each artist's persona, as well as reflecting on the influence of technology and sexuality on their work. The publication of this intriguing book coincides with an exhibition at the Museo Jumex in Mexico City, opening in May 2019. This book is a copublication with Fundación Jumex Arte Contemporáneo.
