Millions of readers throughout the world continue to enjoy Treasure Island, Dr. Jekyll and Mr. Hyde, A Child's Garden of Verses, and other books by Robert Louis Stevenson (1850-1894). A celebrated author in many different fields of literature, Stevenson is also recognized as a highly engaging and prolific correspondent: he penned over 2,800 letters, which are contained in eight critically acclaimed volumes published by Yale University Press. In this book, 317 of Stevenson's most interesting and revealing letters represent each stage of his mature life. With a linking narrative and full annotation, Ernest Mehew sets the letters in the context of Stevenson's remarkable life. Beginning with the days of his troubled youth in Edinburgh, Stevenson's letters go on to tell of his love for Frances Sitwell, a beautiful, older married woman; a reckless journey to California in pursuit of Fanny Osbourne, the woman who became his wife; their worldwide but vain search for a healthy place to live; and a period of adventure in the South Seas, where Stevenson wrote some of his best work and became passionately involved in Samoan life. The letters show the author's zest for living despite daunting illnesses, his struggles with his own writing, his literary tastes, and his affection for his friends. Stevenson writes in many moods, ranging from playful and witty to deeply serious. Better than any biography ever could, these letters in Stevenson's own words tell the real story of his life.

Neither older empiricist positions that genre is an abstract concept, useless for the study of individual works of literature, nor the recent (post) modern reluctance to subject literary production to any kind of classification seem to have stilled the discussion on the various aspects of genre in classical literature. Having moved from more or less essentialist and/or prescriptive positions towards a more dynamic conception of the generic model, research on genre is currently considering "pushing beyond the boundaries", "impurity", "instability", "enrichment" and "genre-bending". The aim of this volume is to raise questions of such generic mobility in Latin literature. The papers explore ways in which works assigned to a particular generic area play host to formal and substantive elements associated with different or even opposing genres; assess literary works which seem to challenge perceived generic norms; highlight, along the literary-historical, the ideological and political backgrounds to "dislocations" of the generic map. Deification in Russian Religious Thought considers the reception of the Eastern Christian (Orthodox) doctrine of deification by Russian religious thinkers of the immediate pre-revolutionary period. Deification is the metaphor that the Greek patristic tradition came to privilege in its articulation of the Christian concept of salvation: to be saved is to be deified, that is, to share in the divine attribute of immortality. In the Christian narrative of the Orthodox Church 'God became human so that humans might become gods'. Ruth Coates shows that between the revolutions of 1905 and 1917 Russian religious thinkers turned to deification in their search for a commensurate response to the apocalyptic dimension of the universally anticipated destruction of the Russian autocracy and the social and religious order that supported it. Focusing on major works by four prominent thinkers of the Russian Religious Renaissance—Dmitry Merezhkovsky, Nikolai Berdiaev, Sergei Bulgakov, and Pavel Florensky—Coates demonstrates the salience of the deification theme and explores the variety of forms of its expression. She argues that the reception of deification in this period is shaped by the discourse of early Russian cultural modernism, and informed not only by theology, but also by nineteenth-century currents in Russian religious culture and German philosophy, particularly as these are received by the novelist Fedor Dostoevsky and the philosopher Vladimir Soloviev. In the works that are analysed, deification is taken out of its original theological context and applied respectively to politics, creativity, economics, and asceticism. At the same time, all the thinkers represented in the book view deification as a project: a practice that should deliver the total transformation and immortalisation of human beings, society, culture, and the material universe, and this is what connects them to deification's theological source.

What does it mean to know something - scientifically, anthropologically, socially? What is the relationship between different forms of knowledge and ways of knowing? How is knowledge mobilised in society and to what ends? Drawing on ethnographic examples from across the world, and from the virtual and global 'places' created by new information technologies, Anthropology and Science presents examples of living and dynamic epistemologies and practices, and of how scientific ways of knowing operate in the world. Authors address the nature of both scientific and experiential knowledge, and look at competing and alternative ideas about what it means to be human. The essays analyze the politics and ethics of positioning 'science', 'culture' or 'society' as authoritative. They explore how certain modes of knowing are made authoritative and command allegiance (or not), and look at scientific and other rationalities - whether these challenge or are compatible with science.

In a hierarchy, every employee rises to the level of their own incompetence. This simple maxim, defined by this classic book over 40 years ago, has become a beacon of truth in the world of work. From the civil service to multinational companies to hospital management, it explains why things constantly go wrong: promotion up a hierarchy inevitably leads to over-promotion and incompetence. Through barbed anecdotes and wry humour the authors define the problem and show how anyone, whether at the top or bottom of the career ladder, can avoid its pitfalls. Or, indeed, avoid promotion entirely!

This title includes a Foreword by John W Bachman, Professor of Medicine, Mayo Clinic College of Medicine, Rochester, Minnesota. Mastering the art of medical practice management requires knowledge that most physicians don't learn in medical school, residency, and fellowship training. Successful practice management in the 21st century requires physicians to understand how to organize and manage a practice, manage their finances, recruit, work with, and manage people within and outside of the practice, improve healthcare delivery and clinical outcomes, and ensure compliance with federal, state, and local laws and regulations. "Medical Practice Management in the 21st Century: The Handbook" addresses multiple aspects of medical practice management. It offers both background information and practical tools. The workbook format, supported by web-based tools, allows busy physicians to gain a basic understanding of many topics, determine strategies for their practices, and seek additional information when they want it. This guide will be ideal for both physicians who need business guidance as they begin their careers and physicians who are already in practice and want to enhance their business skills. Many physicians can't afford or choose not to hire a professional practice administrator or manager; this book will help them assume managerial responsibilities with the same level of confidence that they bring to clinical care. Physicians in academic medical centers who manage departments, programs, or research studies will also benefit. "This book is essential for any clinician planning to open a new practice or attempting to improve the quality and efficiency of an existing practice. Read and learn." - John Bachman MD, in the Foreword. "Written for the busy practitioner - clear, concise, and practical without any wasted space. I wish I had had this resource when I was starting practice. It's the bible for practice management, just as the "Washington Manual" was in earlier years." - Robert S Galvin, MD, Director of Global Healthcare for General Electric. "Important. Crosses many boundaries, covering a wide variety of topics. Guides physicians in developing the infrastructure that they need to succeed." - John Fallon, MD, Chief Physician Executive, Blue Cross Blue Shield of Massachusetts. "There is no better book or resource to use to develop the necessary proficiency to run a first-class, stellar practice than this. All who read this book will be able to ensure that every patient has a positive experience with your practice and will not only enjoy the experience but will tell other physicians, their family and their friends about you and your practice and thus make your practice thrive and prosper." - Dr Neil Baum, Clinical Associate Professor of Urology, Tulane Medical School, New Orleans, Louisiana. "I love the chapter on financial management. It is very complete and gives a non-business major a good grasp of complicated information." - Allen R. Wenner, MD, family medicine practitioner, West Columbia Family Medicine, South Carolina. "I like the format of the exhibits. In the chapter on financial management, the side-by-side problem/solution approach is easily understandable and lends itself to a solution oriented approach. I can spot my own practice's issues and immediately understand what to do without searching through a lot of text." - Tom Sena, MD, President of Raleigh Children and Adolescents Medicine, Raleigh, North Carolina. "Full of good material which I am actively planning to use. Extremely helpful!" - Dr Damian McHugh, President, Raleigh Emergency Medicine Associates, Raleigh, NC.
