

Journeys In English

A delightfully discursive, Bill Bryson-esque and personal journey through the groves and the thickets of the English language, by our foremost scholar of the history and structure of the English language.

In this discursive jaunt through the groves and thickets of the English language, David Crystal creates a mesmerizing and entertaining narrative account of his encounters with the language and its speakers. Woven from personal reflections, historical allusions, and observations of travelers, this fascinating journey through the language we use every day will have readers thinking twice about each word they speak. Starting in Wales and moving from England to San Francisco by way of, yes, Poland, Crystal encounters numerous linguistic side roads that he cannot resist exploring, from pubs to trains to Tolkien. Walking English captures the seductive, quirky, teasing, tantalizing nature of the language itself—a Bill Bryson-esque exploration of language by our foremost expert on the subject.

The author retains the style of J.B. Priestly while retracing the steps of his 1933 "English Journey" to capture the changes that half a century has brought to their native land

Why is the word madre, "mother," so complicated in Spanish—especially in Mexico? Leaping off the page with energy, insight, and attitude, Liza Bakewell's exploration of language is anything but "just semantics." Why does me vale madre mean worthless, while lqué padre! means fabulous, she asks? And why do one hundred madres disappear when one padre enters the room, converting the group to all its color: weddings, dinner parties, an artist's studio, heart-stopping taxi rides, angry journalists, corrupt politicians, Blessed Virgins, and mothers both sacred and profane. Along the way, a reader discovers not only an invaluable lexicon of Mexican slang (to be used with caution or not at all) but also thought-provoking reflections on the evolution of language: its winding path through culture, threatens—to be a creative female, a madre.

De proprietatibus rerum, 'On the properties of things', has long been referred to by scholars as a medieval encyclopedia, but evidence suggests that it has been many things to many people. The sheer number of extant manuscript copies and printed editions, along with translations, adaptations, and mentions in poems and sermons, testify to its continuous significance for Europeans of all estates. While first compiled soon after the time of St Francis by a humble continental friar to meet the needs of his expanding religious brotherhood, by 1600 English men of letters had claimed Bartholomew as a noble compatriot and national treasure. What was it about the work that propelled it through a progression of medieval cultures and into an exalted position in the world of English letters? The centuries of social, political and religious change.

A collection of the great writer's observations, made during his travels across the Europe he loved so much When I am on a journey, all ties suddenly fall away. I feel myself quite unburdened, disconnected, free - There is something in it marvellously uplifting and invigorating. Whole past epochs suddenly return: nothing is lost, everything still full of inception, enticement. For the insatiably curious education and a personal balm for the depression he experienced when rooted in one place for too long. He spent much of his life weaving between the countries of Europe, visiting authors and friends, exploring the continent in the heyday of international rail travel. Comprising a lifetime's observations on Zweig's travels in Europe, this collection can be dipped into or savoured at length, and paired with other titles.

Tales of a Musical Journey

Examines the lives and times of famous English scientist (naturalist and "evolutionist") Charles Darwin (1809-1882), 18th c. American author of the classic Moby Dick, Herman Melville (1819-1891), England's "finest foreign ambassador of the English novel", Polish born, Joseph Conrad (1857-1924) and E.M. Forster (1879-1970), one of the most esteemed English novelists of his time. The "connection" between these four men is their descriptions in their writings of "exotic" places - e.g. Galapagos Islands, Tahiti, Malaysia, Congo, India or "foreign" locales for their protagonists - Florence, Italy. Each author is introduced by a biographical essay "The Writer's Life", other sections: "Reader's Guide" which outlines the plot of at least one work from each author, exploring the characters and/or ideas (as in Darwin's case) in the story and/or work and, within this section, a beautifully illustrated "Who's Who" which provides an essential guide to understanding the central characters in the story; "The Writer at Work" which draws the reader into the individual world of the writer, examining what each sought to achieve in both a literary (or in Darwin's case scientific) career and in life itself and, within this section, "Works in Outline" which summarizes, in words and pictures, other popular stories and/or works by the author and lastly, "Sources and Inspiration" which illuminates the relationships between the personal events which shaped the era, providing a historical backdrop for the works studied.

Leila Christenbury's Making the Journey has long been a beloved classic in English methods courses as well as with in-service English teachers whose dog-eared copies occupy a permanent place on their classroom desks. The Fourth Edition adds a fresh new voice from veteran English Education professor Ken Lindblom, whose expertise in writing instruction, teaching with technology, and teaching informational and nonfiction texts compliments Leila's love of literature and vast knowledge and experience across the field. You'll find brand new content on: - CCSS and other college-and career-ready standards and assessments - Genre studies, with special attention to informational nonfiction - Digital literacies and technologies for teaching - Classroom management and communicating with parents, administrators, and colleagues - Teaching ELLs and students with special needs. Leila and Ken's timeless advice, humorous anecdotes, and stories of successes and failures in the classroom infuse Making the Journey with life and light, and instill confidence in soon-to-be English teachers. Though ever reflective of the current realities of teaching, and chock full of stories about real students and their struggles and triumphs, the Fourth Edition remains a beacon of hope and optimism for all those willing to enter the greatest profession.

One of the hottest topics in education today is trauma-informed pedagogy. Much of what has been written in this area comes from counselors, therapists, and other experts in this field, but there is very little written specifically about the effects of trauma on English learners. This book has been written to address this need. The authors have sifted through the literature on trauma and social-emotional learning (SEL) to provide the material that applies directly to English learners. This book was written mainly for teachers of students with immigrant backgrounds and for the building administrators who support them, including counselors, paraprofessionals, and social workers. This book is designed to provide a practical resource to help educators better understand the possible traumatic backgrounds of their students and how that could be affecting their academic, social, and emotional lives. It also focuses on how school personnel can create a safe environment in schools and classrooms to help students recognize, nurture, and expand the internal resilience that has enabled them to weather past situations and that will allow them to continue the healing process. One chapter is devoted to the topic of self-care for educators who are working so hard to help students be resilient. An appendix features a list of recommended books on the topics of personal migration and resilience.

The winner of the prestigious Caldecott Honor, and described by the New York Times as 'a masterwork', Aaron Becker's stunning, wordless picture book debut about self-determination and unexpected friendship follows a little girl who draws a magic door on her bedroom wall. Through it she escapes into a world where wonder, adventure and danger abound. Red marker pen in hand, she creates a boat, a balloon and a flying carpet which carry her on a spectacular journey ... who knows where? When she is captured by a sinister emperor, only an act of tremendous courage and kindness can set her free. Can it also guide her home and to happiness? In this exquisitely illustrated book, an ordinary child is launched on an extraordinary, magical journey towards her greatest and most rewarding adventure of all...

More than a million words, weird spellings, words that are spelled the same but pronounced differently or vice versa. Where on Earth did the English language come from? The answer is that English isn ' t just the speech of one nation. It ' s the memory of thousands of years of history. It tracks the places people came from, the places they went, the adventures they had, the friends and enemies they made, the battles they won and lost. As English changed and grew, it became a jumble of sounds, words, and rules from countless languages and nations. And it ' s still changing and growing every day. More than seventy percent of all English words were born someplace other than England. That ' s why English can be so confusing and inconsistent. And that ' s why English is the richest, most international, and most versatile language in the world. This innovative book takes us on a journey through time to unravel and demystify the story of English. Word games, intriguing facts, and tricky quizzes add an element of fun while enriching readers ' knowledge and understanding.

With dazzling wit and astonishing insight, Bill Bryson—the acclaimed author of *The Lost Continent*—brilliantly explores the remarkable history, eccentricities, resilience and sheer fun of the English language. From the first descent of the larynx into the throat (why you can talk but your dog can't), to the fine lost art of swearing, Bryson tells the fascinating, often uproarious story of an inadequate, second-rate tongue of peasants that developed into one of the world's largest growth industries.

What makes a place so memorable that it survives forever in a word? In this captivating round-the-world tour, Paul Anthony Jones acts as your guide through the intriguing stories of how eighty places became immortalized in the English language. You'll discover why the origins of turkeys, limericks, Brazil nuts, and Panama hats aren't quite as straightforward as you might presume. If you've never heard of the tiny Czech mining town of Jáchymov—or Joachimsthal, as it was known until the late 1800s—you're not alone, which makes its claim to fame as the origin of the word "dollar" all the more extraordinary. The story of how the Great Dane isn't all that Danish makes the list, as does the Jordanian mountain whose name has become a byword for a tantalizing glimpse. We'll also find out what the Philippines has given to your liquor cabinet, and how a speech given by a bumbling North Carolinian gave us a word for impenetrable nonsense. Surprising, entertaining, and illuminating, this is essential reading for armchair travelers and word nerds. Our dictionaries are full of hidden histories, tales, and adventures from all over the world—if you know where to look.

The Journey of English

The book describes what goes on "behind the scenes" in undergraduate and postgraduate medical education, scientific research and general medical practice in the United Kingdom. It covers the years 1945 to 2012 and is an account of a unique medical journey. The author was brought up by parents who were general practitioners in Yorkshire. His upbringing was thoroughly middle class and his observations of his parents work and lifestyle resulted in his wanting to be a doctor. Medical student life at University College London was hard work. Several of his teachers were eminent and world famous. Two of them were Professors J Z Young (anatomy) and Andrew Huxley (Physiology and Nobel Prize winner). Life-long friendships were made with fellow students who worked together dissecting a human body. Experiments were performed on one another. The social life in the 1960s of a group of medical student friends is described. Studying octopuses and squid in Naples, Italy. Was part of an extra degree course which was undertaken before starting hospital clinical studies? These were at The London Hospital, Whitechapel, in the east end of London. There was so much to learn before being allowed to practice as a doctor. Clinical studies were undertaken at The London Hospital, Whitechapel. This is one of the oldest hospitals in the UK. There is a huge learning curve which resulted in a doctor just about able to deal with patients. A year of pre-registration work started on the medical wards at Mile End Hospital followed by a period in the Receiving Room (Accident and Emergency Department) at The London Hospital. The pre-registration house jobs sometimes involved working 100 hours a week. Nights in the accident emergency department were manned by one pre-registration house officer and a nurse. There is a description of what is involved undertaking research to PhD level in physiology. A new clinical thermometer was designed, tested and eventually manufactured and sold by the instrument developer Muirhead Ltd. So soon after being a student, the wheels had turned and the author was teaching students himself. There is an account of starting work as a General Practitioner in Cheltenham having not seen a single patient for the previous three years. After that he worked for a short time in a London practice and then in Castleford, West Yorkshire from 1978 to 2005. He and his wife build the practice up from a zero base to a thriving training practice housed in a large modern clinic. Doing this was financially risky as well as stressful. The development of postgraduate general practice education in Yorkshire in the last two decades of the twentieth century is described. There are descriptions of becoming a trainer of prospective GPs and then organising and managing trainers. The role of a GP tutor in the education of GPs was undertaken as a specific job. Work on the assessment of the competence of trainee GPs was overseen in the Yorkshire Deanery, based in Leeds, West Yorkshire. Work on the monitoring of the GP contract with the NHS and the GP appraisal scheme was undertaken by NHS Wakefield district, a Primary Care Trust. The author worked for both these bodies and what was involved in GP appraisal and inspection of practices' target achievements is examined in detail. Work with ill and underperforming general practitioners is described as well as mentoring GPs with problems and worries. Very few patient problems and cases are included in this book which rather tells of the work that went on in the background. It is that work that produces high quality doctors and also year on year improvement in patient care. The last chapter involved informal interviews in 2012 with people studying and working in the same fields experienced over the years by the author and outlined above. Readers are asked to judge whether the present day situation is an improvement on

Traveling Heavy is a deeply moving, unconventional memoir by the master storyteller and cultural anthropologist Ruth Behar. Through evocative stories, she portrays her life as an immigrant child and later, as an adult woman who loves to travel but is terrified of boarding a plane. With an open heart, she writes about her Yiddish-Sephardic-Cuban-American family, as well as the strangers who show her kindness as she makes her way through the world. Compassionate, curious, and unafraid to reveal her failings, Behar embraces the unexpected insights and adventures of travel, whether those be learning that she longed to become a mother after being accused of giving the evil eye to a baby in rural Mexico, or going on a zany pilgrimage to the Behar World Summit in the Spanish town of Béjar. Behar calls herself an anthropologist who specializes in homesickness. Repeatedly returning to her homeland of Cuba, unwilling to utter her last goodbye, she is obsessed by the question of why we leave home to find home. For those of us who travel heavy with our own baggage, Behar is an indispensable guide, full of grace and hope, in the perpetual search for connection that defines our humanity.

A Journey to the Center of the Earth was a science fiction novel written by Jules Verne in 1864. Jules Verne was considered by many to be a father of science fiction writing and incorporated the latest discoveries of the day into his work. As such, we are not surprised to find allusions to dinosaurs, natural gas, and ancient Scandinavian texts in this book. Equally, we also find the thorough respect that Verne has for the intellectual mind, both as a reckless force and as a tempering power.

In 1997, the biggest Labour victory in history swept England, ending eighteen years of Conservative government. Prime Minister Tony Blair — young, charismatic and complex — shaped the nation profoundly in the ten years that followed. From his work in Northern Ireland to the wars in Iraq and Afghanistan, few of his decisions were free from scrutiny and debate. Alternately beloved and reviled, he was an international figure to a degree matched by few British leaders — a role he continues in to this day through the Tony Blair Faith Foundation and his work in the Middle East. Now, for the first time, we see the fascinating journey and difficult choices of the prime minister through his own eyes. Grippingly candid and deeply intimate, A Journey is a must-read political memoir, full of startling insights into a host of world leaders, including George W. Bush and Bill Clinton. It is also a book that delves deeply and profoundly into what it means to be in a position of great power today, and its emotional and personal toll.

Madre: Perilous Journeys with a Spanish Noun

A historical exploration of the myths, legends, and events that have shaped the English identity examines the tales surrounding King Arthur, Robin Hood, Alfred the Great, and others to offer revealing insights about the beginnings of English culture.

This study of an ordinary town in Northern England is “a thoughtful, sympathetic portrait of white working-class life...essential reading” (Guardian). What do the English think? Every country has a dominant set of beliefs and attitudes concerning everything from how to live a good life, how we should organize society, and the roles of the sexes. Yet despite many attempts to define England’s national character, what might be called the nation’s philosophy has remained largely unexamined until now. Philosopher Julian Baggini pinpointed postcode S66 on the outskirts of Rotherham as England in microcosm—an area that reflected most accurately the full range of the nation’s inhabitants, its most typical mix of urban and rural, old and young, married and single. He then spent six months living there, immersing himself in this typical English Everytown, in order to get to know the mind of a people. It sees the world as full of patterns and order, a view manifest in its enjoyment of gambling. It has a functional, puritanical streak, evident in its notoriously bad cuisine. In the English mind, men should be men and women should be women (but it’s not sure what children should be). Sympathetic but critical, serious yet witty, Baggini’s account of the English as represented by this particular spot on its map is both a portrait of its people and a personal story about being an alien in your own land. “Baggini turns out to be a sensitive observer who takes people and places on their own terms. He is also good at examining his own prejudices and fears.”—Independent “An insightful and

often amusing investigation of what it means to be English.”—London Review of Books
