On April 26, 1937, a massive aerial attack by German and Italian forces reduced the Basque city of Gernika to rubble and left more than sixteen hundred people dead. Although

the assault was initiated as part of a terror bombing campaign by Francoists against Basque Republican forces during the Spanish Civil War, its main intent was to test the effectiveness of the rising German Luftwaffe's new equipment and strategies. To produce this detailed analysis of the political and military background of the attack and its subsequent international impact, Xabier Irujo examined archives and official government documents in several countries and conducted numerous interviews with Basques who survived. His account of the assault itself, based on eyewitness reports from both victims and attackers, vividly recalls the horror of that first example of the blitz bombing that served the Germans during the first years of World War II. He reveals the U.S. and British governments' reaction to the

bombing and also discusses efforts to prosecute the perpetrators for war crimes. Irujo relates the ways in which the massacre has been remembered and commemorated in Gernika and throughout the worldwide Basque diaspora. Gernika, 1937: The Market Day Massacre is an important contribution to the history of the Spanish Civil War and to our understanding of the military strategies and decisions that shaped this war and would later be employed by the Nazis during World War II.

This book offers the analysis of the relationship between the Cape Town Convention and national laws on secured transactions. The first part of the book considers why national implementation is so important in the case of the Cape Town Convention and identifies how innovative the Convention is as a uniform law instrument. The second part includes chapters on those states that are Parties to the Cape Town Convention, which analyse how the Convention is implemented under the domestic law. The third part includes chapters on those states that are not Parties to the

Convention, which compare their national laws and the Convention to find unique features of the Cape Town Convention's rules. The fourth part discusses the meaning of Protocols on aircraft, railway rolling stock and space assets from the practitioner's point of view. As a whole, the book offers insights into the new stage of uniform private law and shows the need for further examination of the subject, which will be essential for international and national legislators, academics of comparative and international private law as well as practitioners who are the users of the uniform law regime.

L ' atome de carbone a un rôle clé. Il peut former plusieurs types de liaisons chimiques mais également s ' auto- associer pour donner un squelette carboné, caractéristiques qui sont à la base de la chimie organique, de la biochimie et de la vie. Science et technique des carbones présente la progression des connaissances dans les solides carbonés à partir des découvertes et inventions successives depuis la préhistoire. Le rôle essentiel joué par l ' exploitation des mines de charbon au moment de la première révolution industrielle comme source d ' énergie primaire est un point crucial. L ' importance du carbone s ' est accrue par le

développement de la carbochimie pour créer des matériaux artificiels. Leurs utilisations comme matériaux traditionnels de transformation en sidérurgie et comme céramiques particulières, puis technologiques (charbons actifs, fibres de carbone...), sont successivement décrites. La découverte récente des carbones moléculaires, fleurons de la nanotechnologie, met en exergue l'avènement de la technoscience. Finalement, leur impact économique et sociétal est analysé en exposant l'existence de grandes transitions énergétiques associées aux cycles macro-économiques.

ne sont pas non plus, comme le veut la version officielle, les saboteurs de la paix européenne et la cause des deux Guerres mondiales du siècle dernier. Les atrocités qu'ils auraient soi-disant perpétrées durant ces conflits armés furent inventées de toute pièce par la propagande alliée afin d'obtenir l'appui de l'opinion publique. La propagande de la Shoah, qui est apparue après la Seconde Guerre mondiale, a par ailleurs grandement contribué à consolider cette haine du sale boche. Mais cette version officielle de l'histoire est-elle véridique ? L'Allemagne est-elle réellement l'incarnation du mal absolu ? Dans ce livre, l'auteur brosse un tableau différent. Il explique en effet que l'Allemagne n'était la cause ni de la Première ni de la

Seconde Guerre mondiale, mais dans les deux cas, la victime de l'agression des alliés. L'instabilité engendrée par la guerre 14-18 a permis la révolution bolchevique russe de 1917 à éclater, ce qui a apporté au monde le communisme. Or, Hitler et l'Allemagne ont tout de suite compris que le communisme international, de sa base en Union soviétique, était une menace existentielle non seulement pour l'Occident, mais pour toute la civilisation chrétienne. L'Allemagne hitlérienne a dès lors amorcé une lutte mortelle contre cette idéologie sanguinaire. Loin d'être le saboteur de la paix européenne, l'Allemagne, en s'érigeant en rempart, a donc empêché la révolution bolchevique de s'étendre toute l'Europe. Il est dommage que les alliés

n'aient pas vu la Russie communiste sous le mme jour que l'Allemagne. Cette alliance entre les pays occidentaux et le communisme a eu des consequences dsastreuses sur la civilisation occidentale chrtienne. L'auteur se dit convaincu que la France, la Grande-Bretagne et les tats-Unis se sont battus du mauvais ct. The twenty-five crisp and amusing short stories in this collection prove that elementary readings in French can also be entertaining. Some are original anecdotes and others adaptations of traditional French or French-Canadian stories, some are from anonymous sources, and some by acknowledged masters such as LaFontaine. All are distinguished by the classic literary

virtue of the French—precision, economy, and the traditional Gallic twist. A delightful series of line drawings by Antje Lingner aptly reflects the spirit of the book. This collection is designed for reading in Grades XI and XII, and for introductory courses at the University or Extension course level. To encourage a quick response and facility in reading, the stories emphasize the idiomatic and rely heavily on dialogue, avoiding as much as possible an over-literary syntax. The text employs elementary vocabulary and constructions throughout and is representative in all respects of the spoken language today. The emphasis on conversational organization in the stories will be immediately apparent, and it is this

feature that should be exploited in the classroom and other group situations. On a series of four long-playing records the entire text has been transcribed for use in oral and phonetics classes. The readings are given slowly but naturally and with a relish which catches the drama and humour of the material. The combination of text and recordings offers a most valuable method of acquiring aural familiarity with spoken French. The stories are supplemented with vocabulary, notes and exercises. For each story there is supplied a series of questions that lend themselves to oral answers and discussion; in addition there is a short exercise reviewing grammatical forms, with special emphasis on the verb,

Mediterranean basin as such, includes not a single provision for the defining of specific relations with that region as a whole. There are only, as a hang-over from the French and Italian colonialist past, certain Declarations, in the Appendices, regarding a possible association of Tunis, Morocco, Libya with the new undertaking. And, of course, there is Article 113 prescribing, at the end of the Community's transition period, the common trade policy - plus the Article (238) giving blanket authorisation for association agreements. These legal prescriptions were duly implemented in the Association Agreements with Greece (1961) and Turkey (1963) and have supplied the basis for bilateral

instruments in respect of other Mediterranean lands - ad hoc, pragmatic arrangements. In the circumstances the Community could scarcely have proceeded otherwise. Yet the outlines of a European economic policy with regard to the countries of the Mediterranean basin were there from the beginning - limited, however, over the years by the internal development of the Community itself. One is reminded in this connection of sundry invocations by European and Mediterranean personalities and members of the European Commission - and, specifically, of a Memorandum presented by Italy to the Council of Ministers in 1964.
