Precalculus is adaptable and designed to fit the needs of a variety of precalculus cours: comprehensive text that covers more ground than a typical one- or two-semester coll precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessil Coverage and Scope Precalculus contains twelve chapters, roughly divided into three g Chapters 1-4 discuss various types of functions, providing a foundation for the remain course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Ra Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and unit circle, as opposed to the right triangle approach more commonly used in College A and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Fun Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on t introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in thes chapters, but few include all. Instructors can select material as needed from this group chapters, since they are not cumulative. Chapter 9: Systems of Equations and Inequali Chapter 10: Analytic Geometry Chapter 11: Sequences, Probability and Counting Theory Chapter 12: Introduction to Calculus

Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.
Essentials of geometry -- Reasoning and proof -- Parallel and perpendicular lines -- Congruent triangles -- Relationships within triangles -- Similarity -- Right triangles and trigonometry -- Quadrilaterals -- Properties of transformations -- Properties of circles --

Measuring length and area -- Surface area and volume of solids.
