

Miss Nike Ajax

As the Cold War gripped the world with fear of espionage and nuclear winter, everyday Wisconsinites found themselves embroiled in the struggle. For decades, the state's nuclear missiles pointed to the skies, awaiting Soviet bombers. Joseph Stalin's daughter sought refuge in the small town of Richland Center. With violence in Vietnam about to peak, a cargo ship from Kewaunee sparked a new international incident with North Korea. Manitowoc was ground zero for a Sputnik satellite crash, and four ordinary Madison youths landed on the FBI's most wanted list after the Sterling Hall Bombing. Local author and chairman of the Midwest Chapter of the Cold War Museum Chris Sturdevant shares the tales of the Badger State's role in this titanic showdown between East and West.

The Army in Space and Missile Defense

Desperados and cowgirls, magical beatniks and Hollywood hucksters and galaxy-crossed young lovers and jet-winged hotshots, lost souls and unexpected angels. These are intertwined short stories of not-so-ordinary people caught in the great UFO scare during the summer of 1952, when America was riveted by nationwide reports of strange flying lights and objects. The stories range from the deadly serious, to the lighthearted to deep mystery noir—all in the mood and tenor of mid-century America. From a lonely road through the Arizona desert to Santa Monica Boulevard, midnight Michigan highways to Everglades mangroves, drag strips out on the Kansas prairie to the skies above the Chesapeake Bay, the people in *The Lights* will all be forever changed by something that is miraculous, spellbinding and unexplainable.

The Winged and Garlanded Nike

"God help the SOB who tries to come through that door tonight." Ruby Danes is at an airport motel with a bottle of scotch and a .32 special, spinning Jack Kerouac's fountain pen on the nightstand and wondering how the last three weeks happened. She's on a cross-continent roll that began in the dust hills of New Mexico, across the Great Plains and the wide Mississippi, to the Tidewater of Old Virginia. Along the way she's fallen in with one Charlie Mint, a St. Louis pickpocket who's just pinched a too-hot wallet hiding a mystery key, a key that just might open a chance for a new life, that is if she and Charlie and everyone else can survive the crisis that's exploding in the Cuban jungles. Oh yeah, Elvis's blue Cadillac is parked right outside Ruby's door.

What We Have, We Shall Defend

"[Seize the high ground is a] narrative history of the Army's aerospace experience from the 1950s to the present. The focus is on ballistic missile defense, from the early NIKE-HERCULES missile program through the SAFEGUARD acquisition site allowed by the 1972 ABM Treaty to the more advanced 'Star Wars' concepts studies toward the end of the century. [What is] covered is not only the technological response to the threat but the organizational and tactical development of the commands and units responsible for the defense mission"--CMH website.

Progress U.S. Army 1961

This history traces the evolution of the armaments and fortifications that came under the command of Fort MacArthur,

with a focus on those that dotted the coastal hillsides of the Palos Verdes Peninsula and San Pedro, California. It also provides precise locations of the remnants of these fortifications to help readers explore for themselves. This 4th edition corrects minor errors, provides additional information on many of the weapons described, especially the Nike Hercules missile, and includes new photographs and drawings throughout. The Absaroka incident material has been expanded and the Battle of Los Angeles has been added. There are now short biographies of the Army officers after whom many of the batteries were named. Finally, there is a journal article describing the journey of one of Fort MacArthur's railway guns across country prepared by the captain responsible for the shipment. Book format is 8.5" x 11," B&W interior.

A Novel

Hearings Before the Committee on Armed Services and the Subcommittee on Department of Defense of the Committee on Appropriations, Eighty-ninth Congress, First Session, on S. 800, Department of Defense Programs, and Authorization of Appropriations During Fiscal Year 1966 for Procurement, Research, Development, Test, and Evaluation of Aircraft, Missiles, and Naval Vessels for the Armed Forces, February 24-26; March 2-4, 8-10, 12, 15, 1965

"Make sure you're not cuttin' through the plate. See, Sonny, sometimes the barnacles are the only things holding these old tubs together." The old man lowered his goggles and danced a finger on the steel. "Of course, busting through the hard stuff is the only way to find out." Detective Patricia Wiacek has one last chance. She's down on the southern reaches of the Elizabeth River, trapped by a gang of killers desperate to get the bricks of uncut heroin she's hauling through the snowbound woods. Her only hope is to make for the creosoted deadlands of Money Point, where ghosts are waiting. Money Point is a tale of crime and redemption set along the Norfolk waterfront in 1973. From beat-down shipyard bars like the Tip Top and One Eyed Jack's, to the steamy depths of freighters riding anchor out along Thimble Channel, to the dark passages of creeks and rivers that cut through a land that can be at once so hard and yet so tender. With characters like Easy Pete, Sugarboy, Sweet Vonnie Harp, Chicazola, Catpaw and Chinese Billy, Money Point sails back through a time of drugs, war, disco, rationed gasoline, diminished faith. And it carries Pat Wiacek to that place of a rather simple question: what is justice? Money Point is pure crime noir set in Virginia's Tidewater. It continues with places and characters from Will Hopkins's previous novels, Willowood, Full Fathom Five and Miss Nike Ajax, and introduces a new character in Pat Wiacek, a veteran Chicago Police detective who has come to Norfolk because she is, in a dark way, another casualty of the Viet Nam war. Local lore says that Money Point is haunted by the ghost of Blackbeard, who was rumored to have buried his treasure there. How will Wiacek confront her own ghosts and demons out on those shores?

Cold War Wisconsin

Progress, U.S. Army 1961

Similar in dynamics to California's Gold Rush were demographic, environmental and financial impacts from the trillions of dollars the Department of Defense disbursed into California during the Cold War. While the gold rush era was a frenzy of exploitation, the defense rush was the opposite for a tidal wave of fortune poured into the State, and it became emblematic of what President Eisenhower called the Military-Industrial Complex. This novel links these two exploitative times through Fernville, a town whose roots are from the 19th-century gold rush, but its sustenance is the 20th-century missile rush and its characters, despite distractions of romance and mystery over thirty years, cannot ignore the glint from gold and the shadow cast by uranium. The novel takes place in 1955 and 1986, two watershed years of the Cold War. If whimsy and a slight parody tend to intrude in the distant narratives of 1955, they are brought up short by the hard edge of reality in those of 1986. The characters find their relationships drastically change over those years, through the pitfalls of sex and uranium. NIKE, an easy read in spite of its troll through the ugly years of the Cold War, gives a slanted and wicked portrayal of life inside the secret missile industry in 1955. A murder mystery parallels a more serious narrative that greed, hubris and character flaw, along with the playing out of those dark and lurking contingencies, can potentially visit disaster upon both an individual and a society.
