*In this deeply researched and vividly written volume, Melvyn Stokes illuminates the origins, production, reception and continuing history of this ground-breaking, aesthetically brilliant, and yet highly controversial movie. By going back to the original archives, particularly the NAACP and D. W. Griffith Papers, Stokes explodes many of the myths surrounding The Birth of a Nation (1915). Yet the story that remains is fascinating: the longest American film of its time, Griffith's film incorporated many new features, including the first full musical score compiled for an American film. It was distributed and advertised by pioneering methods that would quickly become standard. Through the high prices charged for admission and the fact that it was shown, at first, only in "live" theaters with orchestral accompaniment, Birth played a major role in reconfiguring the American movie audience by attracting more middle-class patrons. But if the film was a milestone in the history of cinema, it was also undeniably racist. Stokes shows that the darker side of this classic movie has its origins in the racist ideas of Thomas Dixon, Jr. and Griffith's own Kentuckian background and earlier film career. The book reveals how, as the years went by, the campaign against the film became increasingly successful. In the 1920s, for example, the NAACP exploited the fact that the new Ku Klux Klan, which used Griffith's film as a recruiting and retention tool, was not just anti-black, but also anti-Catholic and anti-Jewish, as a way to mobilize new allies in opposition to the film. This crisply written book sheds light on both the film's racism and the aesthetic brilliance of Griffith's filmmaking. It is a must-read for anyone interested in the cinema.*

While Kierkegaard is perhaps known best as a religious thinker and philosopher, there is an unmistakable literary element in his writings. He often explains complex concepts and ideas by using literary figures and motifs that he could assume his readers would have some familiarity with. This dimension of his thought has served to make his writings far more popular than those of other philosophers and theologians, but at the same time it has made their interpretation more complex. Kierkegaard readers are generally aware of his interest in figures such as Faust or the Wandering Jew, but they rarely have a full appreciation of the vast extent of his use of characters from different literary periods and traditions. The present volume is dedicated to the treatment of the variety of literary figures and motifs used by Kierkegaard. The volume is arranged alphabetically by name, with Tome I covering figures and motifs from Agamemnon to Guadaluquivir.

Offers a variety of entries on the cultural, military, and political history, as well as geography, biography, and philosophy, of this period. This work also offers detailed information on the major events, places, battles, figures, technologies, and ideas behind six centuries of global conflicts.

From an evolutionary perspective, individuals have a vi- tal interest in the reproduction of their genes. Yet this interest is overlooked by social and political theory at a time when we need to steer an adaptive course through the unnatural modern world of uneven population growth and decline, global mobility, and loss of family and communal ties. In modern Darwinian theory, bearing children is only one way to reproduce. Since we share genes with our families, ethnic groups, and the species as a whole, ethnocentrism and humanism can be adaptive. They can also be hazardous when taken to extremes. On Genetic Interests canvasses strategies and ethics for conserving our genetic interests in an environmentally sustainable manner sensitive to the interests of others.

The purpose of this book is to describe the Duke of Rohan's role as a political leader of the Huguenot party from 1621 to 1629 placing somewhat less emphasis on his military achievements. It makes no claim to biographical completeness. The narrative is based on con temporary books and pamphlets and on manuscripts in the Biblio theque nation ale, the British Museum, and the Public Record Office. Research was also done at the Newbery Library, the Library of Congress, and at the University of Wisconsin's Memorial Library, notably in its Montauban, Tank, and French Pamphlet collections. In the preparation of this book I have received advice and assistance from many people. Personal thanks are due to William P. Kadis, Jack Ray Thomas, and Howard S. Miller for reading the manuscript and to my wife Anna for typing several drafts of it. Marguerite Kutz tensen, reference librarian at the University of Wisconsin, helped me secure a number of rare volumes on interlibrary loan. I would also like to thank Cynthia Kaldis for translating a large number of diplo matic letters from Seventeenth century Latin.

Few thought systems have been as distorted and sometimes misconstrued as those of Marx and Hegel. Philosophy and Revolution, presented here in a new edition, attempts to save Marx from interpretations which restrict the revolutionary significance of the philosophy behind his theory. Developing her breakthrough on Hegel's Absolute Idea, Raya Dunayevskaya, who died in the June of 1987, aims at a total liberation of the human person—not only from the ills of a capitalist society, but also from the equally oppressive state capitalism of established communist governments. She assumes within her theory of class struggle issues as diverse as feminism, black liberation, and even the new nationalism of third world countries. Moreover, Dunayevskaya combines within herself an incorruptible objectivity with a passionate political attitude, making this work a vibrant and concrete discussion of the vicissitudes of society, justice, equality, and existence.

*Using psychodynamic theory and riveting case material, this book dissects the figure of the malignant narcissist leader (MNL). Across the world today, individuals and societies are impacted by unprecedented disruptive influences. From globalization and climate change to economic uncertainty and mass migration. The rise of populists and would-be saviors has promised certainty for anxious populations, but how far are such leaders suffering from the MNL pathology? Through the psychoanalytic lens of Otto Kernberg, the authors explain the etiology of the charismatic MNL's clinical features: charisma, grandiosity, sadism, and paranoia. The book outlines the limitations and complexity of diagnosis, contextualizing the MNL within the transcendental and millenarian movements, and discusses the patho-dynamics of high-pressure groups and totalitarian regimes, including types of groups, methods of mind control, categories of constituents, the corporate totalitarian state, and the authoritarian demagogue. The book looks at a wide range of leaders including Donald Trump, Bhagwan Shree Rajneesh, Roger Ailes, Keith Ranier, Jan of Leiden, and Credonia Mwerinde. Distinguishing the disordered personality of the MNL from other personality disorders, and presenting a new model of overlapping descriptors to categorize high-pressure group types and identifying types of followers as well, this book represents essential reading for psychodynamically minded psychologists, psychiatrists, social workers, sociologists, political scientists, and those working in organizational development.*

This series focuses on the Jewish textual tradition as well as the ways it evolves in response to new intellectual, historical, social and political contexts. Fostering dialogue between literary, philosophical, political and religious perspectives, this series, which consists of original scholarship and proceedings of international conferences, reflects contemporary concerns of Jewish Studies in the broadest sense.

Anthropologists have long sought to engage and describe foreign or "alien" societies, yet few have considered the fluid communities centered around a shared belief in alien beings and UFO sightings and their effect on popular and expressive culture. Opening up a new frontier for anthropological study, the contributors to E.T. Culture take these communities seriously. They demonstrate that an E.T. orientation toward various forms of visitation—including alien beings, alien technologies, and uncanny visions—engages primary concepts underpinning anthropological research: host and visitor, home and away, subjectivity and objectivity. Taking the point of view of those who commit to sci-fi as sci-fact, contributors to this volume show how discussions and representations of otherworldly beings express concerns about racial and ethnic differences, the anxieties and fascination associated with modern technologies, and alienation from the inner workings of government. Drawing on social science, science studies, linguistics, popular and expressive culture, and social and intellectual history, the writers of E.T. Culture unsettle the boundaries of science, magic, and religion as well as those of technological and human agency. They consider the ways that sufferers of "unmarked" diseases such as Chronic Fatigue Syndrome come to feel alien to both the "healthy" world and the medical community incapable of treating them; the development of alien languages like Klingon; attempts to formulate a communications technology—such as that treated for the spaceship Voyager—that will reach alien beings; the pilgrimage spirit of UFO seekers; the out-of-time experiences of Nobel scientists; the embrace of the alien within Japanese animation and fan culture; and the physical spirituality of the Raëlian religious network.
