

## National Nurses Assistant Week 2014 Clip Art

Master the essential skills of today ' s nursing assistant! Mosby's Textbook for Nursing Assistants, 9th Edition prepares you to work in long-term care, acute care, and subacute care settings. Known for its comprehensive coverage and an easy-to-read, visual approach, this book includes step-by-step instructions for over 100 nursing assistant procedures. New to this edition is a practice scenario in each chapter to help you develop problem solving and critical thinking skills, as well as Focus on Math boxes that highlight common calculations done on the job. Written by well-known educator Sheila Sorrentino and expert co-author Leighann Remmert, this market-leading text emphasizes the importance of teamwork and communication — two elements critical to being an effective nursing assistant.

A nurse inserts an I.V. A personal care attendant helps a quadriplegic bathe and get dressed. A nanny reads a bedtime story to soothe a child to sleep. Every day, workers like these provide critical support to some of the most vulnerable members of our society. Caring on the Clock provides a wealth of insight into these workers, who take care of our most fundamental needs, often at risk to their own economic and physical well-being. Caring on the Clock is the first book to bring together cutting-edge research on a wide range of paid care occupations, and to place the various fields within a comprehensive and comparative framework across occupational boundaries. The book includes twenty-two original essays by leading researchers across a range of disciplines—including sociology, psychology, social work, and public health. They examine the history of the paid care sector in America, reveal why paid-care work can be both personally fulfilling but also make workers vulnerable to burnout, emotional fatigue, physical injuries, and wage exploitation. Finally, the editors outline many innovative ideas for reform, including top-down and grassroots efforts to improve recognition, remuneration, and mobility for care workers. As America faces a series of challenges to providing care for its citizens, including the many aging baby boomers, this volume offers a wealth of information and insight for policymakers, scholars, advocates, and the general public.

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

This insightful Research Agenda presents the foundations of employee engagement, providing a framework for future research to serve as an evidence-based guide to practice. Offering an overview of contemporary engagement theory and research, it addresses important new directions for expanding our current understanding of the meaning, focus, development and outcomes of engagement.

**Cancer care delivery refers to the multiple layers of the health care system that interact to affect outcomes for patients with cancer and the quality of that care. The factors included in the care delivery system that potentially alter outcomes include social dynamics, financing systems, organizational structures and processes, health technologies, provider and individual behaviors. Because women's health care has its own unique challenges, the intersection between cancer care delivery and women's health is to be examined in this Frontiers in Oncology issue. The unique opportunities and challenges of improving the health care system for women with breast and gynecologic cancers are to be explored in depth. We will visit many topics of cancer care delivery with the unique perspective geared towards the care of women's malignancies.**

**Employing a unique case-based approach, Ham's Primary Care Geriatrics continues to be your comprehensive source of clinical solutions for this challenging population. This gerontology medical reference book features an interdisciplinary perspective that empowers you with team-oriented knowledge on the best diagnosis, treatment, and management strategies available to address the complex needs of older adults."Overall this is a useful, well written, practical elderly medicine book, ideal for use in primary care. It is reasonable priced and an excellent addition to the bookshelf, virtual or real". Reviewed by: Dr Harry Brown, July 2014 Effectively treat your geriatric patients, and provide helpful guidance to their families, through engaging geriatric case studies that illustrate the principles and key clinical information you need. Form a definitive diagnosis and create the best treatment plans possible using the evidence-based medicine guidelines throughout. Find the information you need quickly and efficiently with a 2-color layout and consistent format, and test your knowledge with USMLE-style questions in every chapter. Offer your geriatric patients the most up-to-date treatment options available with six new chapters addressing Principles of Primary Care of Older Adults, Interprofessional Team Care, Billing and Coding, Frailty, Pressure Ulcers, and Anemia. Access the complete geriatric text online anytime, anywhere at Expert Consult, along with an online Cognitive Status Assessment with four tests and patient teaching guides, a dermatology quiz, and informative videos on Gait and Balance and Dizziness.**

By utilizing a review of case-based studies and providing concise management recommendations from leaders in the field, this book provides essential knowledge for those practicing in a dynamic specialty. In the rapidly developing field of Neurocritical Care, Advanced Practice Clinicians have become an integral component of the multi-disciplinary team. This essential volume provides a frame of reference for advanced practice nurses, physician assistants, physicians, and students on a wide range of common Neuro ICU diagnoses and management strategies.

Building on the revolutionary Institute of Medicine reports To Err is Human and Crossing the Quality Chasm, Keeping Patients Safe lays out guidelines for improving patient safety by changing nursesâ€™ working conditions and demands. Licensed nurses and unlicensed nursing assistants are critical participants in our national effort to protect patients from health care errors. The nature of the activities nurses typically perform â€™ monitoring patients, educating home caretakers, performing treatments, and rescuing patients who are in crisis â€™ provides an indispensable resource in detecting and remedying error-producing defects in the U.S. health care system. During the past two decades, substantial changes have been made in the organization and delivery of health care â€™ and consequently in the job description and work environment of nurses. As patients are increasingly cared for as outpatients, nurses in hospitals and nursing homes deal with greater severity of illness. Problems in management practices, employee deployment, work and workspace design, and the basic safety culture of health care organizations place patients at further risk. This newest edition in the groundbreaking Institute of Medicine Quality Chasm series discusses the key aspects of the work environment for nurses and reviews the potential improvements in working conditions that are likely to have an impact on patient safety.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

150 Great Tech Prep Careers

The Cambridge Handbook of the Global Work–Family Interface

Cancer Care Delivery and Women's Health

Journal of the Senate of the United States of America

"Binding: PB"--

Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of Medicine (IOM) released the report The Future of Nursing: Leading Change, Advancing Health, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP Future of Nursing: Campaign for Action and others in implementing the recommendations from the 2010 report and identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.

Advanced Practice Nursing: Contexts of Care is a robust collection of practice focused case studies which address current issues in the evolving nursing profession, targeting concerns of the advanced practice nurse. Throughout the text actual cases are used for the illustration and analysis of practice contexts, which include organizational structure, managed care, inter- and intra-professional issues, politics, power, finance, planning, regulation, ethics, law, quality, and patient safety. Discussion around opportunities for nursing to extend practice into new forms and environments is also covered. Advanced Practice Nursing: Contexts of Care is a very valuable tool for case-based teaching format around policy issues that directly impact practice and Master's-prepared nurses. Each case is interspersed with discussion questions which guide case discussions in both specific and global issues within the case. In addition, each case has a list of references that can be used to guide the cases. Unlike other health policy texts, this text focuses on cases that bring application to those health policy issues. This text is also a solid resource for practitioners interested in keeping current on issues that guide clinical practice. Key Objectives: Appreciate the regulatory and legal environment that surrounds practice Analyze the influences of the working and regulatory contexts upon nursing practice Integrate an understanding of history and development of trends and issues into contemporary practice Provide a differential diagnosis among political, policy, regulatory, legal, and professional causes of contextual problems Propose solutions to contextual problems Value experience as data

Social and Administrative Aspects of Pharmacy in Low- and Middle-Income Countries: Present Challenges and Future Solutions examines the particularities of low- and middle-income countries and offers solutions based on their needs, culture and available resources. Drawing from the firsthand experience of researchers and practitioners working in these countries, this book addresses the socio-behavioral aspects of pharmacy and health, pharmacoeconomics, pharmaceutical policy, supply management and marketing, pharmacoepidemiology and public health pharmacy specific to low- and middle-income countries. While some practices may be applied appropriately in disparate places, too often pharmacy practice in low- and middle-income countries is directly copied from successes in developed countries, despite the unique needs and challenges low- and middle-income countries face. Examines key issues and challenges of pharmacy practice and the pharmaceutical sector specific to low- and middle-income countries Compares pharmacy practice in developed and developing countries to highlight the unique challenges and opportunities of each Provides a blueprint for the future of pharmacy in low- and middle-income countries, including patient-centered care, evidence-based care and promoting the role of the pharmacist for primary health care in these settings

This volume presents the proceedings of the CLAIB 2014, held in Paran á , Entre R í os, Argentina 29, 30 & 31 October 2014. The proceedings, presented by the Regional Council of Biomedical Engineering for Latin America (CORAL) offer research findings, experiences and activities between institutions and universities to develop Bioengineering, Biomedical Engineering and related sciences. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies and bringing together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth. The Topics include: - Bioinformatics and Computational Biology - Bioinstrumentation; Sensors, Micro and Nano Technologies - Biomaterials, Tissue Engineering and Artificial Organs - Biomechanics, Robotics and Motion Analysis - Biomedical Images and Image Processing - Biomedical Signal Processing - Clinical Engineering and Electromedicine - Computer and Medical Informatics - Health and home care, telemedicine - Modeling and Simulation - Radiobiology, Radiation and Medical Physics - Rehabilitation Engineering and Prosthetics - Technology, Education and Innovation

A brand new, fully updated edition of the most widely-used, frequently-cited, and critically acclaimed multicultural text in the mental health field This fully revised, 8th edition of the market-leading textbook on multicultural counseling comprehensively covers the most recent research and theoretical formulations that introduce and analyze emerging important multicultural topical developments. It examines the concept of "cultural humility" as part of the major characteristics of cultural competence in counselor education and practice; roles of white allies in multicultural counseling and in social justice counseling; and the concept of "minority stress" and its implications in work with marginalized populations. The book also reviews and introduces the most recent research on LGBTQ issues, and looks at major research developments in the manifestation, dynamics, and impact of microaggressions. Chapters in Counseling the Culturally Diverse, 8th Edition have been rewritten so that instructors can use them sequentially or in any order that best suits their course goals. Each begins with an outline of objectives, followed by a real life counseling case vignette, narrative, or contemporary incident that introduces the major themes of the chapter. In-depth discussions of the theory, research, and practice in multicultural counseling follow. Completely updated with all new research, critical incidents, and case examples Chapters feature an integrative section on "Implications for Clinical Practice," ending "Summary," and numerous "Reflection and Discussion Questions" Presented in a Vital Source Enhanced format that contains chapter-correlated counseling videos/analysis of cross-racial dyads to facilitate teaching and learning Supplemented with an instructor's website that offers a power point deck, exam questions, sample syllabi, and links to other learning resources Written with two new coauthors who bring fresh and first-hand innovative approaches to CCD Counseling the Culturally Diverse, 8th Edition is appropriate for scholars and practitioners who work in the mental health field related to race, ethnicity, culture, and other sociodemographic variables. It is also relevant to social workers and psychiatrists, and for graduate courses in counseling and clinical psychology related to working with culturally diverse populations.

Praise for Educating Nurses "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, From Detached Concern to Empathy: Humanizing Medical Practice "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, Journal of Nursing Education "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York University

This textbook for nursing assistants will prepare students not only to function in the traditional nursing assistant role in nursing homes, hospitals, and home health, but also will prepare students to advance their careers. A nursing assistant student who uses this text will have a firm foundation by which to transition to an LPN and ultimately an RN role. The text offers a compelling art program, a direct, conversational writing style, and an emphasis on professionalism and humanism. A back-of-book CD-ROM includes an audio glossary.

The Complexities and Contradictions of Paid Care Work

Ageing and end-of-life care of the elderly

Ham's Primary Care Geriatrics E-Book

Profiles careers that do not require a four-year degree, giving a general description of the job or career field, educational requirements, salary statistics, work environment, future outlook for the field, and sources for more information.

Ideal for shorter, more focused courses, this concise text provides coverage of the concepts and skills that are essential for becoming a nursing assistant. It clearly and logically presents the responsibilities of the nursing assistant in a readable, highly visual format that appeals to learners of all levels. - Focus On the Pride boxes emphasize Personal and professional responsibility, Rights and respect, Independence and social interaction, Delegation and teamwork, and Ethics and Laws providing a convenient overview of key elements of the nursing assistant's responsibilities in providing competent patient care, and reminds readers that this caregiver role is one they can take pride in performing. - Focus on Communication boxes includes guidelines for how to communicate most clearly to residents/patients and how to avoid making them feel uncomfortable emphasizing the importance of good communication while providing practical tips. - Key Abbreviations are now listed at the beginning of each chapter to help familiarize readers with commonly used abbreviations. - Includes three new chapters on Preventing Falls; Safely Handling, Moving, and Transferring the Person; and Mental Health Problems.

Most aged in India are experiencing a highly protracted death in hospitals, entangled in tubes and machines. Such 'medicalised death' entails huge psychological, social and financial costs for both patients and their caregivers. There are also many who are dying in abject neglect. However, Government response to end-of-life care has been almost negligible and there is an acute information deficit on dying matters. This book examines different settings where elderly die, including hospitals, family homes and palliative set-ups. The discourse is set in the backdrop of international attempts to restructure and reconfigure the health delivery system for ageing population. It makes critical commentaries on global developments, offers state-of-art reviews of recent advances, substantiates and corroborates facts by personal narratives and case histories. The book overcomes a segmental understanding of the field by weaving various sociological, medical, legal and cultural issues together. Finally, the authors critically examine biomedicine's potential to meet the complex needs of the dying elderly. In an attempt to bring cultural sensitivity in end-of-life care, they explore the lost Indic 'art of dying' which has the potential to de- medicalise death. Increasing public sensitivity to poor dying conditions of the elderly in India and facilitating changes to improve care systems, this book also demonstrates the limitations of the western specialization of death. It will be of interest to academics in the field of Medical Sociology/Anthropology, Medicine, Palliative care, Public Health and Social Work, Social Policy and Asian Studies.

Every day for the next twenty years, more than 10,000 people in the United States will turn 65. With life expectancies increasing as well, many of these Americans will eventually require round-the-clock attention—and we have only begun to prepare for the challenge of caring for them. In Labors of Love, Jason Rodriguez examines the world of the fast-growing elder care industry, providing a nuanced and balanced portrait of the day-to-day lives of the people and organizations that devote their time to supporting America's aging population. Through extensive ethnographic research, interviews with staff and management, and analysis of internal documents, Rodriguez explores the inner workings of two different nursing homes—one for-profit and one non-profit—to understand the connections among the administrative regulations, the professional requirements, and the type of care provided in both types of facilities. He reveals a variety of challenges that nursing home care workers face day to day: battles over the budget; the administrative hurdles of Medicaid and Medicare; the employees' struggle to balance financial stability and compassionate care for residents. Yet, Rodriguez argues, nursing home workers give meaning and dignity to their work by building emotional attachments to residents and their care. An unprecedented study, Labors of Love brings new insight into the underlying structures of a crucial and expanding sector of the American health care system.

As featured on The Today Show! 12,500 entries. 196 countries. 365 days. Find out what's going on any day of the year, anywhere across the globe! If you're looking to tie a promotional event to a special month, create a suggested reading list based on a literary birth anniversary, travel to a music festival halfway around the world, blog about a historical milestone or do a celebrity birthday round-up on your radio show or Twitterfeed, Chase's Calendar of Events is the one resource that has it all. For broadcasters, journalists, event planners, public relations professionals, librarians, editors, writers or simply the curious, this is one reference you can't do without! Chase's Calendar of Events 2014 brings you: Major sporting events such as the Games of the XXII Winter Olympiad at Sochi, Russia (Feb 7-23), and the FIFA World Cup in Brazil (June 12-July 13). Milestones such as the 450th birth anniversary of William Shakespeare; the 200th anniversary of "The Star-Spangled Banner"; the 100th anniversaries of the beginning of World War I and the opening of the Panama Canal; the 75th anniversary of the beginning of World War II; the 50th anniversaries of the Civil Rights Act of 1964 and Beatlemania and much more. New birthday entries for sports stars such as Mo'Nique (Mar 23), Ryan Lochte (Aug 3) and Gabrielle Douglas (Dec 31); actors such as Kerry Washington (Jan 31), Lena Dunham (May 13) and Mads Mikkelsen (Nov 22); musical artists such as Carly Rae Jepsen (Nov 21) and Psy (Dec 31); and authors such as Téa Obreht (Sept 30) and Ann Patchett (Dec 2) and many others. Special days such as National Ferret Day (Apr 2), World Lindy Hop Day (May 26), Extra Mile Day (Nov 1), Lost and Found Day (Dec 12) and more. Search Chase's Any Way You Want! Whether you want to target a specific date, location or subject, our fully searchable CD-ROM (PC and MAC-compatible) makes your research quick and easy. Also included is a free installer, so you can load Chase's directly to your hard drive.

The Cambridge Handbook of the Global Work-Family Interface is a response to growing interest in understanding how people manage their work and family lives across the globe. Given global and regional differences in cultural values, economies, and policies and practices, research on work-family management is not always easily transportable to different contexts. Researchers have begun to acknowledge this, conducting research in various national settings, but the literature lacks a comprehensive source that aims to synthesize the state of knowledge, theoretical progression, and identification of the most compelling future research ideas within field. The Cambridge Handbook of the Global Work-Family Interface aims to fill this gap by providing a single source where readers can find not only information about the general state of global work-family research, but also comprehensive reviews of region-specific research. It will be of value to researchers, graduate students, and practitioners of applied and organizational psychology, management, and family studies.

Includes history of bills and resolutions.

Oakwood Magazine

Are you ready to go beyond advising and planning to actively advocating the interests of your elderly clients? You can be, with this two-volume handbook from two veteran elder law advocates. In a systematic and practical fashion, the authors address each key practice issue and provide an overview of the basic rules and guiding statutes/regulations, in-depth analysis of elder law practice together with guiding case law, and step-by-step explanation of the advocacy process, revealing how law operates in the real world and where things can go wrong. Plus you'll get their practice-tested minisystem for effective advocacy. After an introductory section explores basic principles, Representing the Elderly Client: Law and Practice addresses the six areas you'll encounter most often: Medicaid Special Needs Trusts Medicare and Managed Care Elder Abuse Nursing Home and LTC Facilities Intra-family and Postmortem Advocacy for Elderly Clients and Heirs. Practice forms, flowcharts, and tables put all essential information at your fingertips. The forms contained in the Author's Advocacy Mini-systems will save you hours of preparation time. Start finding effective solutions to your elderly clients' problems with Representing the Elderly Client: Law and Practice. Along with your Representing the Elderly Client two-volume print set, you'll receive a FREE CD-ROM containing word processing documents used in handling some of elder law's most complex concerns.

Preparing for the Occupational Therapy Assistant Board Exam: 45 Days and Counting provides a comprehensive overview for occupational therapy assistant students preparing to take the Certified Occupational Therapy Assistant (COTA) exam. Each new print copy includes Navigate 2 Preferred Access that unlocks a complete eBook, Study Center, Homework and Assessment Center, Navigate 2 TestPrep with over 500 practice questions.

Replete with vital information, the second edition of this authoritative women's health text provides graduate nursing students and nurse practitioners with the resources to deliver optimal health to women of all ages. Edited by a team of highly distinguished clinicians, scholars, and educators, chapters retain a distinctive sociocultural lens that gives a view of women's health as it relates to women's lives and identities. Eighteen new chapters address clinical primary care topics, genetics, environmental and occupational health promotion, health considerations for female caregivers, transgender care, urologic health concerns, dementia care, and more. An instructor's toolkit includes multiple resources to enhance critical thinking, and case studies engage critical thinking skills to apply the multidimensional content in context. This uniquely comprehensive resource examines women's health through a variety of clinical practice and theoretical frameworks such as feminism, feminist theory, and globalization. The second edition retains the important focus on prevention, managing symptoms, and health problems that are unique to women. Chapters address relevant legal issues, health throughout the life span, nutrition and exercise, sleep difficulties, mental health, LGBTQ health, fertility, substance abuse, violence against women, and dozens of specific health disorders. NEW TO THE SECOND EDITION: Updated to include the most current evidence-based, primary care management guidelines in women's health Includes 18 new chapters addressing health promotion and symptom management Provides a robust instructor's toolkit to foster critical thinking Organized to enhance easy retrieval of numerous clinical topics Includes theoretical frameworks for women's health, health promotion and prevention, and women's health management Presents brand-new information on genetics, transgender health, endocrine-related problems, health considerations for caregivers, and dementia care KEY FEATURES: Distills cutting-edge information on women's health issues through a sociocultural framework Offers a comprehensive investigation of key topics in women's health Edited by renowned scholar/educators for advanced practice nursing students

This volume explores different angles of sustainability, university corporate social responsibility, and the role of civil society in the context of education, with a focus on curriculum development and teaching.

Educating Nurses

VI Latin American Congress on Biomedical Engineering CLAIB 2014, Paraná, Argentina 29, 30 & 31 October 2014

Nursing Quality Indicators

Counseling the Culturally Diverse

Representing the Elderly Client

Keeping Patients Safe

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
