Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are completely revised to reflect the shifting experiences of cultural groups in our society.

The Routledge Handbook of Transformative Global Studies provides diverse and cutting-edge perspectives on this fast-changing field. For 30 years the world has been caught in a long 'global interregnum,' plunging from one crisis to the next and witnessing the emergence of new, vibrant, multiple, and sometimes contradictory forms of popular resistance and politics. This global 'interregnum' – or a period of uncertainty where the old hegemony is fading and the new ones have not yet been fully realized – necessitates critical self-reflection, brave intellectual speculation and (un)learning of perceived wisdoms, and greater transdisciplinary collaboration across theories, localities, and subjects. This Handbook takes up this challenge by developing fresh perspectives on globalization, development, neoliberalism, capitalism, and their progressive alternatives, addressing issues of democracy, power, inequality, insecurity, precarity, wellbeing, education, displacement, social movements, violence and war, and climate change. Throughout, it emphasizes the dynamics for system change, including bringing post-capitalist, feminist, (de)colonial, and other critical perspectives to support transformative global praxis. This volume brings together a mixture of fresh and established scholars from across disciplines and from a range of both Northern and Southern contexts. Researchers and students from around the world and across the fields of politics, sociology, international development, international relations, geography, economics, area studies, and philosophy will find this an invaluable and fresh guide to global studies in the 21st century.

The originality of this book rests in the application of the human security framework to analyze sexual and gender-based violence in conflict. The human security paradigm is concerned and centered on the individual's security threats holistically and is inclusive of both men and women in its agenda. The author argues that making a balanced narrative of sexual violence that includes both men and women as both victims and perpetrators could be a more effective means of preventing conflict-related sexual violence than when men are excluded. Another positive feature of the book rests in its analysis of the plights of victims and survivors of sexual violence during conflict and post-conflict situations. The author describes the devastating emotional and traumatic pain, the psychological agony, the health problems, stigmatization, and impoverishment that sexual violence causes victims and survivors. Moving beyond victims and survivors, the book also examines perpetrators of sexual violence and the questionable part played by a range of social actors. This book has taken on the challenge of interdisciplinary studies that draws upon and integrates evidence and concepts from peace and conflict studies, gender studies, law and human rights as well as sociology and psychology to offer a balanced and elucidatory narrative of the occurrence, perpetrations, impacts, as well as responses and actions required of the international community. It makes a convincing argument that sexual violence in conflict is prevalent and persistent, and that it is a global threat to human security. The subject matter is timely and the author's writing style is easy to follow without taking down the reader, making this book a suitable reading for students, academics as well as practitioners. REVIEWS and WORDS OF PRAISE Rev. Abara has produced a critically reflective and thought-provoking text documenting how and when sexual violence is used as a strategic weapon of war and poses a real threat to global security. This is an important book in ensuring that the mental, physical and economic health and diversity of the victims of sexual violence in conflict are central to developments in human security. --Professor Amanda J. Broderick, Vice-Chancellor & President, University of East London, UK Francis has taken on the challenge of writing an interdisciplinary book that draws upon and integrates evidence and concepts from peace and conflict studies, gender studies, law and human rights as well as sociology and psychology to offer a balanced and elucidatory narrative of the occurrence, perpetrations, impacts, as well as responses and actions required of the international community. --Professor Giorgia Donà, Co-director of the Centre for Migration, Refugees and Belonging, University of East London A highly relevant book that underlines contemporary issues facing the world today. In a clear and easy to follow style, the author provides a brilliantly insightful engagement in this complex topic. --Professor Wilson Ozuem, Arden University, UK Rev Francis Abara provides a fresh and comprehensive analysis into one of the greatest afflictions of our times – sexual violence in conflict. The horrific, long-term effects of the physical, emotional, economic, social and mental damage of sexual violence are laid bare. Importantly this book takes a gender inclusive approach and analyses the victimization of both women and men. --Dr Edna Maeyen Solomon, Senior Lecturer in Economics, University of Greenwich, London This book comprehensively presents a systematic analysis of sexual violence in conflict as a threat to global security which Rev. Abara has drawn from a wide range of sources and synthesized into cogent, coherent, and urgent arguments of global importance. Remarkably, this book is distinctive because it is devoid of prolixity and rhetoric but plainly expresses the social and political upheavals within which sexual violence is unleashed. --Dr Moses Itene, Doctor of International Law and Jurisprudence, University of Huddersfield

Despite modern technology and the focus on international business striving to make the world a smaller place, many organizations still struggle with the need for diversity and multiculturalism. This issue is also present in academia, as women of color and those previously perceived to be in the ethnic minority continue the journey to become the educators and leaders that universities need. Supporting Multiculturalism and Gender Diversity in University Settings examines the experiences of some of these female leaders and what they learned in their rise through education and academia. Highlighting stories of feminism, race, and what it means to use these life lessons in the classroom, this book is a valuable resource for higher education administrators, policymakers, and women professionals everywhere.
