In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

I'm told the dead are all around us. I wouldn't know about that, I see only the violently slain. They can be victims of hit-and-run, innocents caught in a cross-fire, the murdered. They whisper to me and they never, ever, forget the face of their killer. I've learned to live with my uncanny ability, in fact I've made a career out of it. The departed aren't the only supernaturals I see. No, they're not vampires or werewolves or fae - those things don't exist. We live side by side with what some call the Otherworldy. That's too much of a mouthful for me, I call them demons. If you saw them as I do, you'd know why. Right now I'm trying to track down a missing six year-old boy whose mother was murdered. Or maybe she wasn't. To further complicate the case, Clarion PD gave me a partner I'd rather shoot than work with. I can't tell them he's a demon. They'd think I'm crazy. I'm Tiff Banks. Welcome to my world.

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

The Twilight of Constitutionalism?

The Book of Squares

The concepts and values that underpin traditional constitutionalism are increasingly being challenged by political realities that place substantial power beyond the state. Among the few certainties of a global economy is the growing incongruity between the political (the world of things that need to be ordered collectively in order to sustain society) and the state (the major institution of authoritative political decision-making during modern times). The consequences, and possible remedies, of this double disjunction of politics and state and of state and constitution form the centre of an open debate about 'constitutionalism beyond the state'. The essays gathered in this collection explore the range of issues raised by this debate. The effects of recent changes on two of the main building blocks of constitutionalism - statehood and democracy - are examined in Parts I and II. Since the movement of overcoming statehood has, arguably, been advanced furthest in the European context, the question of the future of constitutionalist ideas in the framework of the EU provides the key theme of Part III. The remaining parts consider possible transformations or substitutes. The engagement of constitutions with international law offers one line of transmutation of constitutionalism (Part IV) and the diffusion of constitutionalism into separate social spheres provides an alternative way of pursuing constitutionalism in a new key (Part VI). Finally, the ability of the theory of global administrative law (examined in Part V) to offer an alternative account of the potential of jurisdictional control of global governing processes is examined. Through these explorations, the book offers cross-disciplinary insights into the impact of recent political and economic changes on modern constitutionalism and an assessment of the prospects for constitutionalism in a transnational environment.

A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...

"The modern mind: We live in a wonderful era of abundance, high-speed information and hyper-connection, but it also faces us with the challenges of mass-distraction, negative stress and analysis paralysis. This is the first English translation of an award winning book published in Afrikaans in 1989. It engages critically and creatively with a key moment of colonial history—the time Lady Anne Barnard spent at the Cape of Good Hope, from 1797 to 1802. Antjie Krog powerfully brings together the historical and the poetic in a turbulent South Africa.

Advanced Web-Based Training Strategies fills the gap in the literature available on this topic by offering a volume that includes meaningful, applicable, and proven strategies that can take the experienced instructional designer to the next level of web-based training. Written by Margaret Driscoll and Saul Carliner -- internationally acclaimed experts on e-learning and information design-- Advanced Web-Based Training Strategies provides instructional designers, e-learning developers, technical communicators, students, and others with strategies for addressing common challenges that arise when designing e-learning. Balancing educational theory with the practical realities of implementation, Driscoll and Carliner outline the benefits and limitations of each strategy, discuss the issues surrounding the implementation of these strategies, and illustrate each strategy with short scenarios drawn from real-world online learning programs representing a wide variety of fields including technology, financial services, health care, and government.

*** Collection of the most innovative and incisive writing on the environmental policies of the EU * Essential reference and course book for environmental politics and European politics courses**

*** Emphasizes how policy is a dynamic process and examines the roles of the main actors and institutions The European Union has come to dominate the way environmental policy is thought about, developed and implemented throughout Europe. It is also a guide and benchmark for policy elsewhere in the world. This Guide brings together the best and most influential work on the full range of EU environmental policy. Incorporating a range of case studies, it draws out the links between levels of governance and the role of environment in other policy areas such as agriculture, trade and transport. The editor's introduction explores the important theoretical and empirical questions raised by the development of EU policy and the challenges of the new sustainability agenda. The result is a highly useful primer and source book for all those involved or studying environmental politics and policy, not just in Europe but in other regions too.**

By embracing a rapidly changing digital world, the so-called millennial adolescent is proving quite adept at breaking down age-old distinctions among disciplines, between high- and low-brow media culture, and within print and digitized text types. Adolescents and Literacies in a Digital World explores the significance of digital technologies and media in youth's negotiated approaches to making meaning within a broad array of self-defined literacy practices. Organized around a series of case studies, this book blends theories of an attention economy, generational differences, communication technologies, and neoliberal enactive texts with actual accounts of adolescents' use of instant messaging, shape-shifting portfolios, critical inquiry, and media production.
