A Fast Track Course in MENTAL ABILITY

Such is the pressure on teaching time in schools and universities that students are taught less and less of the diversity that is life on the planet. Most students, and indeed most professional biologists that these students become, know far more of cell function than of biology. This text is a profusely illustrated, quick-reference guide to all types of living organisms, from the single-celled prokaryotes and eukaryotes to the multicellular fungi, plants and animals. All surviving phyla and their component classes are characterised and described, as are their lifestyles, ecology, relationships, and within-group diversity (with orders displayed in list form). Overall, the book's aim is to provide biologists and others with a clear, concise picture of the nature of all groups of organisms with which they may be unfamiliar.

The book contains Completely New 10 Sample Papers designed on the latest pattern (All MCQs) issued by CBSE Dated 2nd Sep 2021 as per the Term I syllabus provided by CBSE Board Dated 28th July 2021.
