In 1893, the 27.5 million visitors to the Chicago World's Fair feasted their eyes on the impressive architecture of the White City, lit at night by thousands of electric lights. In addition to marveling at the revolutionary exhibits, most visitors discovered something else: beyond the fair's 633 acres lay a modern metropolis that rivaled the world's greatest cities. The Columbian Exposition marked Chicago's arrival on the world stage, but even without the splendor of the fair, 1893 would still have been Chicago's greatest year. An almost endless list of achievements took place in Chicago in 1893. Chicago's most important skyscraper was completed in 1893, and Frank Lloyd Wright opened his office in the same year. African American physician and Chicagoan Daniel Hale Williams performed one of the first known open-heart surgeries in 1893. Sears and Roebuck was incorporated, and William Wrigley invented Juicy Fruit gum that year. The Field Museum, the Art Institute of Chicago, and the Museum of Science and Industry all started in 1893. The Cubs' new ballpark opened in this year, and an Austro-Hungarian immigrant began selling hot dogs outside the World's Fair grounds. His wares became the famous "Chicago hot dog." "Cities are not buildings; cities are people," writes author Joseph Gustaitis. Throughout the book, he brings forgotten pioneers back to the forefront of Chicago's history, connecting these important people of 1893 with their effects on the city and its institutions today. The facts in this history of a year range from funny to astounding, showcasing innovators, civic leaders, VIPs, and power brokers who made 1893 Chicago about so much more than the fair.

Beginning with a bit of wheat grass in his backyard, a baker goes through the process of making bread, from threshing and grinding to mixing and baking, and also offers at-home activities like making chewing gum and baking your own loaf.

Char-grilled or boiled? Sauerkraut or chili? Mustard or ketchup? Vienna Beef or Sabrett? Only these questions could be raised about one of the world's favorite backyard, picnic, ballgame, and street foods—the hotdog. Though nearly two billion hot dogs are consumed by Americans annually in the month of July alone, there is absolutely no consensus on which is the right way to serve up a hotdog. In Hot Dog, well known food historian Bruce Kraig recounts the history of this popular "tube steak" from the origin of the sausage 20,000 years ago to its central place in American culture today. Kraig discusses the many brands, including Hebrew National, Pearl, Sabrett, and Vienna Beef, and the regional variations that go along with them—like kosher-style New York dogs loaded with mustard and sauerkraut, New England dogs with Boston Baked Beans, and fully-loaded Chicago style hotdogs, complete with mustard, onion, relish, sport peppers, a dill pickle spear, a dash of celery salt, and tomato slices (but never, ever ketchup). Hot Dog covers the other international sausages, like bologna and bockwurst, as well, and explores some of the apocryphal tales of the hotdog in history—like the origin of its name and whether Queen Elizabeth II was truly served hotdogs on a visit to the White House. Packed with tasty facts and recipes, Hot Dog reveals the rich history and passionate opinions about this seemingly ordinary food.

The nostalgic vision of a rural Midwest populated by independent family farmers hides the reality that rural wage labor has been integral to the region's development, says Deborah Fink. Focusing on the porkpacking industry in Iowa, Fink investigates the experience of the rural working class and highlights its significance in shaping the state's economic, political, and social contours. Fink draws both on interviews and on her own firsthand experience working on the production floor of a pork-processing plant. She weaves a fascinating account of the meatpacking industry's history in Iowa—a history, she notes, that has been experienced differently by male and female, immigrant and native-born, white and black workers. Indeed, argues Fink, these differences are a key factor in the ongoing creation of the rural working class. Other writers have denounced the new meatpacking companies for their ruthless destruction of both workers and communities. Fink sustains this criticism, which she augments with a discussion of union action, but also goes beyond it. She looks within rural midwestern culture itself to examine the class, gender, and ethnic contradictions that allowed—indeed welcomed—the meatpacking industry's development.

This reference text provides detailed information on the world's 1200 largest and most influential companies. Each entry contains details such as: company's legal name; mailing address; ownership; sales and market value; stock index; and principal subsidiaries. Each two to four page entry is detailed with facts gathered from popular magazines, academic periodicals, books, annual reports and the archives of the companies themselves. Information is also provided about founders, expansions and losses, and labour/management actions. Entries are arranged alphabetically by industry name, and there is a cumulative index to companies and personal names.

Offering a panoramic view of the history and culture of food and drink in America with fascinating entries on everything from the smell of asparagus to the history of White Castle, and the origin of Bloody Marys to jambalaya, the Oxford Companion to American Food and Drink provides a concise, authoritative, and exuberant look at this modern American obsession. Ideal for the food scholar and food enthusiast alike, it is equally appetizing for anyone fascinated by Americana, capturing our culture and history through what we love most—food! Building on the highly praised and deliciously browseable two-volume compendium the Oxford Encyclopedia of Food and Drink in America, this new work serves up everything you could ever want to know about American consumables and their impact on popular culture and the culinary world. Within its pages for example, we learn that LifeSavers candy owes its success to the canny marketing idea of placing the original flavor, mint, next to cash registers at bars. Patrons who bought them to mask the smell of alcohol on their breath before heading home soon found they were just as tasty sober and the company began producing other flavors. Edited by Andrew Smith, a writer and lecturer on culinary history, the Companion serves up more than just trivia however, including hundreds of entries on fast food, celebrity chefs, fish, sandwiches, regional and ethnic cuisine, food science, and historical food traditions. It also dispels a few commonly held myths. Veganism, isn't simply the practice of a few "hippies," but is in fact wide-spread among elite athletic circles. Many of the top competitors in the Ironman and Ultramarathon events go even further, avoiding all animal products by following a strictly vegan diet. Anyone hungering to know what our nation has been cooking and eating for the last three centuries should own the Oxford Companion to American Food and Drink.
