*This new collection examines the emergence of the Bharatiya Janata Party (BJP) in India and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government. Religious influence in contemporary politics offers a fertile ground for political-sociological analysis, especially in societies where religion is a very important source of collective identity. In South Asian societies religion can, and often has, provided legitimacy to both governments and those who oppose them. This book examines the emergence of the BJP and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government. The impacted authors take stock of the party's first full term in power, presiding over the diverse forces of the governing NDA coalition, and the 2004 elections. They assess the BJP's performance in relation to its stated goals, and more specifically how it has fared in a range of policy fields - centre-state relations, foreign policy, defence policies, the 'second generation' of economic reforms, initiatives to curb corruption and the fate of minorities. Explicitly linking the volume to literature on coalition politics, this book will be of great importance to students and researchers in the fields of South Asian studies and politics.*

New York Times bestselling author Rachel Gibson returns with this dazzling love story filled with sizzle, sass, and just a bit of southern charm . . . "Hello, Ms. Vivian . . . it's been a long time." And with those words, Vivian Leigh Rochet nearly melted. It's been years since she last saw Harrison Whitley-Shuler. She was a teenager scrubbing houses for a living. He was the gorgeous son of rich parents, not fit for the likes of her. Vivian had vowed to get out of Charleston, become a big Hollywood star, and stick it to the snooty girls who made her cry. She got what she wanted—and more—but why does her glamorous life seem so trivial? Harrison got out too . . . making it all the way to Wall Street, until a heart attack forced him to trade in his cufflinks for a good set of hand tools. Making furniture soothes his soul, but escaping the Whitley-Shuler heritage is nearly impossible. And now he's come face-to-face with the one who got away. He's not looking for love. He's not even looking for sex . . . so why is resisting her the hardest thing he's ever done?

With an outward gaze focused on a better future, Between Good and Ghetto reflects the social world of inner city African American girls and how they manage threats of personal violence. Drawing on personal encounters, traditions of urban ethnography, Black feminist thought, gender studies, and feminist criminology, Nikki Jones gives readers a richly descriptive and compassionate account of how African American girls negotiate schools and neighborhoods governed by the so-called "code of the street" if the form of street justice that governs violence in distressed urban areas. She reveals the multiple strategies they use to navigate interpersonal and gender-specific violence and how they reconcile the gendered dilemmas of their adolescence. Illuminating struggles for survival within this group, Between Good and Ghetto encourages others to move African American girls toward the center of discussions of "the crisis" in poor, urban neighborhoods.

*Structural mechanics is an important field of engineering. The main goal of structural mechanics is to ensure that structures are safe and durable so that catastrophic situations can be prevented, which can otherwise cause loss of life, environmental pollution and financial losses. Depending on the uses of the structure and the conditions that the structure is subjected to, special treatment may be required for the analysis. Specifically, marine structures are subjected to harsh environmental conditions due to the marine environment, which can cause several different damage mechanisms including fatigue and corrosion. This book on "Marine structures" considers a wide range of areas related to marine structures and provides a compilation of numerical and experimental studies related to "Marine structures" research.*

*Getting someone to tell the truth is an essential skill that very few people possess. In the boardroom, classroom, or our own homes, every day we interact with others and try to get the truth from them. People are often untruthful out of fear of negative consequences associated with divulging information. But if a person is made to forget the long-term outcomes of lying, he or she can be influenced to disclose sensitive information that's being withheld. The aim is to encourage the person to remain in short-term thinking mode, shifting focus away from the long-term ramifications of telling the truth. As former CIA agents and bestselling authors of Spy the Lie, Philip Houston, Mike Floyd, and Susan Carnicero are among the world's best at detecting deceptive behavior and eliciting the truth from even the most accomplished liars. Get the Truth is a step-by-step guide that empowers readers to elicit the truth from others. It also chronicles the fascinating story of how the authors used a methodology Houston developed to elicit the truth in the counterterrorism and criminal investigation realms, and how these techniques can be applied to our daily lives. Using thrilling anecdotes from their careers in counterintelligence, and with easy-to-follow instructions, the authors provide a foolproof means of getting absolutely anybody to give an honest answer. Get the Truth is the easy and effective way to learn how to get the truth every time.*

*Today, there are over 40 million conflict-induced internally displaced persons (IDPs) globally, almost double the number of refugees. Yet, IDPs are protected only by the soft-law Guiding Principles on Internal Displacement at the global level. Instead of a dedicated international organization, IDPs receive protection and assistance only through the UN's cluster approach. Orchard argues that while an international IDP protection regime exists, many aspects of it are informal, with IDP issues bound up in a humanitarian regime complex that divides the mandates of key organizations and even the question of IDP status itself. While the Guiding Principles mark an important step forward, implementation of laws and policies based on them at the domestic level remains haphazard. Action at the international level similarly reflects an all-too-often ad hoc approach to IDP issues. Through an in-depth examination of IDP efforts at the international level and across the forty states which have adopted IDP laws and policies, Orchard argues that while progress has been made, new and greater monitoring and accountability mechanisms at both the domestic and international levels are critical. This work will be valuable to scholars, students, and practitioners of forced migration, international relations theory, and the Responsibility to Protect doctrine.*
