the Otavalo and Cotacachi areas of northern Andean Ecuador's Imbabura province. Otavaleños are a unique group in that they maintain their traditional identity but also cultivate a cosmopolitanism through frequent international travel. Rituals have persisted among this ethnic community as important processes for symbolically capturing and critically assessing cultural changes in the face of modern influences. Ritual Encounters thus offers an appreciation of the modern and mythic community as a single and emergent condition. ### Recent Developments in Sequential Art

Julius was born in a mansion on Salaverry Avenue, directly across from the old San Felipe Hippodrome. Life-size Disney characters and cowboy movie heroes romp across the walls of his nursery. Out in the carriage house, his great-grandfather's ornate, moldering carriage takes him on imaginary adventures. But Julius's father is dead, and his beautiful young mother passes through her children's lives like an ephemeral shooting star. Despite the soft shelter of family and money, hard realities overshadow Julius's expanding world, just as the rugged Andes loom over his home in Lima. This lyrical, richly textured

novel, first published in 1970 as *Un mundo para Julius*, opens new territory in Latin American literature with its focus on the social elite of Peru. In this postmodern novel Bryce Echenique incisively charts the decline of an influential, centuries-old aristocratic family faced with the invasion of foreign capital in the 1950s. Winner of the Outstanding Translation Award of the American Literary Translators Association and the Columbia University Translation Center Award. During the first six years of life the child's brain has a potential that will never have again. This does not mean that we should try to turn children into little geniuses, because besides being impossible, a brain developed under pressure is likely to miss a great part of

The groundbreaking bestseller that redefines intelligence and success Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the
