Focuses on organisational goals and those of other stakeholders and society at large. This book provides an insight into the potential benefits and pitfalls, expectations and concerns of advancing a critical view of HRD in practice. It is intended for lecturers, students and practitioners who are aching for a critical analysis.

Beyond Orthodoxy

Offering over 2000 useful references and more than 200 helpful tables, equations, drawings, and photographs, this book

presents research on food phosphates, commercial starches, antibrowning agents, essential fatty acids, and fat substitutes, as well as studies on consumer perceptions of food additives. With contributions from nearly 50 leading international authorities, the Second Edition of Food Additives details food additives for special dietary needs, contemporary studies on the role of food additives in learning, sleep, and behavioral problems in children, safety and regulatory requirements in the U.S. and the European Union, and methods to determine hypersensitivity.

Forecasting the Environmental Fate and Effects of Chemicals
Forecasting the Environmental Fate and Effects of Chemicals is the first book to address specifically the issue of forecasting in environmental toxicology and

chemistry from a methodological, regulatory and practical perspective. It is becoming increasingly important for environmental toxicologists and chemists to be able to forecast the fate and effects of chemicals by using existing information to predict the future. Providing a unique and timely opportunity for active researchers and students to obtain in a single volume the 'state of the art' in this expanding field, this text discusses how forecasts can be made by: * using ecotoxicological endpoints at different levels of biological organisation * measuring and modelling chemical fate in biotic and abiotic environments * adopting difference quantitative frameworks Written by an international team of scientists, this text will be
