In 2007, a twelve-day trip to Ireland—my ancestors' homeland—turned out to be the most significant turning point in my life. I never dreamed when I embarked on my adventure it would lead to me becoming a genealogist, meeting dozens of Irish rellies, writing two fiction book series set in Ireland,

and buying a renovated 1887 schoolhouse in my Coffey ancestors' townland. Since that trip, I've researched more than twenty-five of my maternal and paternal Irish lines as well as several Scottish ones. I've also assisted friends and family members with ancestry research in Austria, Canada, England, Germany, Hungary, and the US. Besides conducting online research, I have visited numerous historical archives, traipsed through hundreds of cemeteries (many now situated in sheep-filled fields), and located several family homesteads. In 2018, I began writing a genealogy column for my monthly author newsletter about my personal research experiences. Because I was writing articles faster than I was publishing

This book investigates the acquisition of pronominal elements by monolingual children acquiring English and Brazilian Portuguese as their native languages. Previous studies have found non-adult behavior in children's use and comprehension of pronouns in two syntactic contexts: resumptive pronouns in relative clauses and anaphoric pronouns bound by argumental noun phrases. Children perform similarly on both contexts, incorrectly accepting these cases at chance level. The age-range when this chance performance is detected is the same in both cases, around 4 and 5 years. The present study offers a unifying account for such behavior, assuming that bound pronouns are

always last resort, whose use requires trans-derivational comparison. Along the lines of previous work done by Grodzinsky and Reinhart (1993), it is claimed that such a comparison is too demanding for young children, as their limited working memory cannot handle complex computations. Two sets of experiments were carried out, testing the same children on both contexts. The results show that those behaving at chance in one context had the same behavior in the other. They also showed that children had chance level performance not only with pronouns bound by referential antecedents, but also with quantified ones. These results are compatible with the

view that children's problems with bound pronouns are related to processing difficulties rather than to the lack of some linguistic knowledge.

Detailing the adventures of a supernatural clan of vampires, witches, and assorted monstrosities, Ray Bradbury ' s Elliott family stories are a unique component of his extensive literary output. Written between 1946 and 1994, Bradbury eventually quilted the stories together into a novel, *From the Dust Returned* (2001), making it a creative project that spanned his adult life. Not only do the stories focus on a single familial unit, engaging with overlapping twentieth-century themes of family, identity and belonging, they were also unique in their time, interrogating

It shows that children's needs and wishes have often been neglected in the social sciences, especially in the areas of law, social policy and sociology. The authors present empirical research on children and young people in contemporary family settings and offer theoretical insights which challenge existing thinking on modern childhood. They draw on international comparisons between the condition of childhood and children's welfare, putting forward an argument for future research and policy initiatives needing to concentrate on, and even privilege, children.*

sexuality (including sexual behavior, sexual orientation, and the role of pornography in shaping sexuality), on the family (including both same-sex and single-parent families), and on the proper role of law in these areas. The essayists are all fiercely independent thinkers and offer the reader a range of bold and thought-provoking proposals. Susan Moller Okin argues, for instance, that gender ought to be done away with--that differences in biological sex ought to have "no more social relevance than one's eye color or the length of one's toes"--and she urges that we look to same-sex couples as a model for households and families in a gender-free society. And Cass Sunstein suggests that the Supreme Court case

Loving vs. Virginia (which overthrew the ban on interracial marriages in Virginia) might be a precedent for overturning laws that bar same-sex marriage: just as Loving overturned miscegenation laws because they were at the service of white supremacy, Sunstein shows, the laws against same-sex marriages and homosexuality are at the service of male supremacy, and might also be overturned. Of vital importance to anyone interested in sexuality, homosexuality, gender, feminism, and the family. *Sex, Preference, and the Family* both clarifies the current debate and points the way toward a less divisive future.

from grace because of his involvement with another woman, and he had the audacity to bring the other woman to live in the house with his wife, Emma Burns, and their children. The next twelve chapters depict the lives of the twelve children—nine boys and three girls. Since all of them are deceased, their stories were written by their children as they remember their parents and their own childhoods. These stories give a picture of life in a less sophisticated time in the rural south when people lived off the land and had none of the modern conveniences that we enjoy today. Nalley, *A Southern Family Story* chronicles 170 years in the life of a family. In one chapter, the dates of births, marriages and deaths of this line of the family are interwoven into national and
