the stranger she married is as cold as the marble floors of the Dhanraj mansion. Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.sion.

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the

Dear Friend, You Must Change Your Life'

Raised in a family of four, Kylila thinks she has the most ideal family. After her village has been burnt down, her deep, dark secret in her life begins to unfold. Having the powers to save or destroy the world, which would Kylila choose? Sitting on pins and needles, anxiously waiting to see what will happen next, horror audiences crave the fear and exhilaration generated by a terrifying story; their anticipation is palpable. But they also breathe a sigh of relief when the

action is over, when they are able to close their books or leave the movie theater. Whether serious, kitschy, frightening, or ridiculous, horror not only arouses the senses but also raises profound questions about fear, safety, justice, and suffering. From literature and urban legends to film and television, horror's ability to thrill has made it an integral part of modern entertainment. Thomas Fahy and twelve other scholars reveal the underlying themes of the genre in The Philosophy of Horror. Examining the evolving role of horror, the contributing authors investigate works such as Mary Shelley's Frankenstein (1818), horror films of the 1930s, Stephen King's novels, Stanley Kubrick's adaptation of The Shining (1980), and Alfred Hitchcock's Psycho (1960). Also examined are works that have largely been ignored in philosophical circles, including Truman Capote's In Cold Blood (1965), Patrick Süskind's Perfume (1985), and James Purdy's Narrow Rooms (2005). The analysis also extends to contemporary forms of popular horror and "torture-horror" films of the last decade, including Saw (2004), Hostel (2005), The Devil's Rejects (2005), and The Hills Have Eyes (2006), as well as the ongoing popularity of horror on the small screen. The Philosophy of Horror celebrates the strange, compelling, and disturbing elements of horror, drawing on interpretive approaches such as feminist, postcolonial, Marxist, and psychoanalytic criticism. The book invites readers to consider horror's various manifestations and transformations since the late 1700s, probing its social,

***cultural, and political functions in today's media-hungry society.

Gas Turbine Theory

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and

suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the

landscape and demography of Arakan?- Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at

critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

In *Dear Friend, you must change your life*, we see some of the most fascinating thinkers in history at their most private and profound, reaching out to a friend, sharing, testing, confirming discoveries about the complexity of life, how to rise above its hardships and enjoy its pleasures. We see writers embrace the roots of philosophical thought afresh, by grappling with real, lived experience, giving us unique insight into their ideas and worldviews that their more polished, public work often does not provide. We see artists sound the foundations of their artistic and moral integrity. Ranging from Seneca and Marcus Aurelius to Flora Tristan and Walter Benjamin, to Elizabeth of Bohemia and Giacomo Leopardi, to Mahatma Gandhi and Maurice B ejart, we see how the philosophical letter as a form of thinking, and thinking freely, spans across the ages and often forms some of the most interesting and lively of philosophical writings. Each letter is given a contextualising preface by an expert that brings out the reason this particular letter is a philosophical letter for life. As such, *Dear Friend, you must change your life* provides a unique introduction to an array of thinkers throughout history as well as an argument for philosophy as conversation, a conversation which has been ongoing for centuries.

The Knight of the Lion

After a decade of making documentaries about offbeat characters on the fringes of US society, Louis had the urge to return to America and track down the people who most fascinated him. It would be a reunion tour, but this time without the cameras and the sense of performance being filmed inevitably brings. It would allow him to get closer to people, to discover what really motivated them and what had happened to the assorted dreamers, outlaws and eccentrics since he last saw them. On a journey that took him from the porn sets of Los Angeles to the gangsta rappers of Memphis, from a convention of UFO contactees in Arizona to Northern Idaho for a festive get-together of neo-Nazis, he asked what 'weird people' have to tell us about our own secret natures. Had he learned anything about himself by being among them? Do we choose our beliefs or do our beliefs choose us? Louis Theroux's first book is a hilarious, thought-provoking and at times surreal voyage into the heart of weirdness.

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first

time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

"Havill's problem-driven approach introduces algorithmic concepts in context and motivates students with a wide range of interests and backgrounds." -- Janet Davis, Associate Professor and Microsoft Chair of Computer Science, Whitman College "This book looks really great and takes exactly the approach I think should be used for a CS 1 course. I think it really fills a need in the textbook landscape." -- Marie desJardins, Dean of the College of Organizational, Computational, and Information Sciences, Simmons University "Discovering Computer Science is a refreshing departure from introductory programming texts, offering students a much more sincere introduction to the breadth and complexity of this ever-growing field." -- James Deverick, Senior Lecturer, The College of William and Mary "This unique introduction to the science of computing guides students through broad and universal approaches to problem solving in a variety of contexts and their ultimate implementation as computer programs." -- Daniel Kaplan, DeWitt Wallace Professor, Macalester College "Discovering Computer Science: Interdisciplinary Problems, Principles, and Python Programming is a problem-oriented introduction to computational problem solving and programming in Python, appropriate for a first course for computer science majors, a more targeted disciplinary computing course or, at a slower pace, any introductory computer science course for a general audience. Realizing that an organization around language features only resonates with a narrow audience, this textbook instead connects programming to

students' prior interests using a range of authentic problems from the natural and social sciences and the digital humanities. The presentation begins with an introduction to the problem-solving process, contextualizing programming as an essential component. Then, as the book progresses, each chapter guides students through solutions to increasingly complex problems, using a spiral approach to introduce Python language features. The text also places programming in the context of fundamental computer science principles, such as abstraction, efficiency, testing, and algorithmic techniques, offering glimpses of topics that are traditionally put off until later courses. This book contains 30 well-developed independent projects that encourage students to explore questions across disciplinary boundaries, over 750 homework exercises, and 300 integrated reflection questions engage students in problem solving and active reading. The accompanying website — <https://www.discoveringcs.net> — includes more advanced content, solutions to selected exercises, sample code and data files, and pointers for further exploration.

Hanon Revisited: Contemporary Piano Exercises

In Stillness and Speed, one of football's most enigmatic stars finally opens up about his life and career, revealing the things that motivate and inspire him. Viewed by many as one of the most influential figures in Premier League history, and scorer of the goal that Arsenal fans voted the best in the club's history, Dennis Bergkamp is a true giant of the game. As a youngster, Bergkamp learned from the Dutch master Johan Cruyff. By the time the pupil was ready to graduate from Ajax and move abroad, he was ready to spread the word, but in Italy he found few willing listeners. It was only when he moved to Arsenal and linked up with Arsene Wenger that he met someone else who shared his vision for football's possibilities. Bergkamp became central to everything the club did: now he had become the teacher, their creative genius, and the one who inspired some of the wayward old guard to new heights, helping them to seven major trophies. Few footballers' books make you think anew, but in Stillness and Speed Bergkamp presents a new vision for the game and how it might be played. He was a player like no other; his story is told like no other. It is a book that will inspire football fans everywhere, whatever their allegiance.

Artist Bernard Maisner is one of the finest illuminators of manuscripts at work today. His remarkable ability to work in miniature, as well as in grand scale paintings, combines with his love and mastery of historical and modern painting techniques to create an unusual and visually stunning body of work, thoroughly documented here. Maisner's search for meaning takes him in the direction of the infinite, of

opposites, in reverence of nature, and of things mystical and unanswerable. This book brings together 25 years of work by Maisner and reveals in depth the correlation and interrelation between his long-standing use of abstract symbols, written language, the art of illumination, and the language of painting. Art historian Dore Ashton provides an essay in which she reflects on Maisner's quest to "grasp the passage of time in living metaphors" through the craft of the illuminator.
