

S Entraa Ner A L Analyse Transactionnelle Au Quot

Combining anthropological methods and theories with political philosophy, Sian Lazar analyzes everyday practices and experiences of citizenship in a satellite city to the Bolivian capital of La Paz: El Alto, where more than three-quarters of the population identify as indigenous Aymara. For several years, El Alto has been at the heart of resistance to neoliberal market reforms, such as the export of natural resources and the privatization of public water systems. In October 2003, protests centered in El Alto forced the Bolivian president to resign; in December 2005, the country's first indigenous president, Evo Morales, was elected. The growth of a strong social justice movement in Bolivia has caught the imagination of scholars and political activists worldwide. El Alto remains crucial to this ongoing process. In El Alto, Rebel City Lazar examines the values, practices, and conflicts behind the astonishing political power exercised by El Alto citizens in the twenty-first century. Drawing on ethnographic fieldwork conducted between 1997 and 2004, Lazar contends that in El Alto, citizenship is a set of practices defined by one's participation in a range of associations, many of them collectivist in nature. Her argument challenges Western liberal notions of the citizen by suggesting that citizenship is not only individual and national but in many ways communitarian and distinctly local, constituted through different kinds of affiliations. Since in El Alto these affiliations most often emerge through people's place of residence and their occupational ties, Lazar offers in-depth analyses of neighborhood associations and trade unions. In so doing, she describes how the city's various collectivities mediate between the state and the individual. Collective organization in El Alto and the concept of citizenship underlying it are worthy of attention; they are the basis of the city's formidable power to mobilize popular protest.

Tikal, Copán, Uaxactún - ancient Maya cities whose names conjure up romance, mystery, and science all at once. Joyce Kelly's clear descriptions and captivating photographs of these and many other sites will make you want to pack your bags and head for Central America. And down. It covers 38 sites and 25 museums - more than any other guidebook - in Belize, Guatemala, Honduras, and El Salvador. Kelly's information is accurate and up to date: she has visited every site personally. The descriptions include all the major, well-known sites and many no each site and museum, from its pyramids and temples to its hieroglyphic stairways and "eccentric flints." She includes many site plans, and her description of each site includes its ancient history as well as its recent archaeological activity. Equally important, Kelly describes exact written directions include the distance (in miles and kilometers) and the driving time required for each segment of the trip. If you need a four-wheel-drive vehicle to negotiate rutted dirt roads, Kelly tells you. If you need a guide, she tells you where to find one.

Where on Earth is it like Mars? How were the Apollo astronauts trained to be geologists on the Moon? Are volcanoes on Earth just like the ones on other planets? The exploration of our solar system begins in our own backyard. Discoveries on other planetary bodies cannot always be easily explained. Therefore, geologic sites on this planet are used to better understand the extraterrestrial worlds we explore with humans, robots, and satellites. Analogs for Planetary Exploration is a compilation of historical accounts of astronaut geology training, overviews of planetary geology research on Mars, educational field trips to analog sites, plus concepts for future human missions to the Moon. This Special Paper provides a great overview of the science, training, and planning related to planetary exploration for students, educators, researchers, and geology enthusiasts. After all, as we learn about the solar system we can better understand our own planet Earth.
