*What does it mean for Christ to be the "image of God"? And, if Christ is the "image of God," can the human person also unequivocally be understood to be the "image of God"? Augustine's Early Theology of Image examines Augustine's conception of the imago dei and makes the case that it represents a significant departure from the Latin pro-Nicene theologies of Hilary of Poitiers, Marius Victorinus, and Ambrose of Milan only a generation earlier. Augustine's predecessors understood the imago dei principally as a Christological term designating the unity of divine substance. But, Gerald P. Boersma argues, Augustine affirms*

*that Christ is an image of equal likeness, while the human person is an image of unequal likeness. Boersma's careful study thus argues that a Platonic and participatory evaluation of the nature of "image" enables Augustine's early theology of the image of God to move beyond that of his Latin predecessors and affirm the imago dei both of Christ and of the human person.*

*Narrowing the focus of his Soundings in St. Augustine's Imagination (1994) O'Connell (philosophy, Fordham U.) analyzes three decisive conversions portrayed in the Confessions: the youthful reading of Cicero, that sparked by the platonist books, and the final capitulation in the Milanese garden. He also compares the conversion imagery with that in the Dialogues of Cassiciacum to shed light on the question of two Augustines. Annotation copyrighted by Book News, Inc., Portland, OR*

Brown's reflections on the significance of these exciting new documents are contained in two chapters of a substantial Epilogue to his biography (the text of which is unaltered). He also reviews the changes in scholarship about Augustine since the 1960s. A personal as well as a scholarly fascination infuse the book-length epilogue and notes that Brown has added to his acclaimed portrait of the bishop of Hippo.***

Although it has often been suggested that Augustine in some way inaugurated the Western tradition of inwardness, this is the first study to pinpoint what was new about Augustine's philosophy of inwardness and situate it within a narrative of his intellectual development and his relationship to the Platonist tradition. Augustine invents the inner self, Cary argues, in order to solve a particular conceptual problem. Augustine is attracted to the Neoplatonist inward turn, which located God within the soul, yet remains loyal to the orthodox Catholic teaching that the soul is not divine. ***to turn "in then up"--to enter the inner world of the self before gazing at the divine Light above the human mind. Cary situates Augustine's idea of the self historically in both the Platonist and the Christian traditions. The concept of private inner self, he shows, is a development within the history of the Platonist concept of intelligibility or intellectual vision, which establishes a kind of kinship between the human intellect and the divine things it sees. Though not the only Platonist in the Christian tradition, Augustine stands out for his devotion to this concept of intelligibility and his willingness to apply it even to God. This leads him to downplay the doctrine that God is incomprehensible, as he is***

indigenous uprisings in the Americas. This rebellion, known by the name of its leader, TƉpac Amaru, ignited in colonial Cuzco near the former Inca capital during the late eighteenth century (1780?83) and spread rapidly throughout much of the Andes. Led by the descendant of the last Inca ruler, the rebellion severely disrupted the colonial economy and proved to be the most serious challenge to Spanish authority in Latin America since the sixteenth century. Focusing on the Cuzco provinces of Quispicanchis and Canas y Canchis, which were the wellspring of the rebellion, Ward Stavig examines the issues, values, and themes central to the lives of ordinary Andean women and men?senses of identity,

conceptions of sexuality and gender, the threat of crime, the value placed on work, competition for land and its relation to cultural identity, and the impact of forced labor. Stavig interweaves an intimate and richly textured portrait of the lives of Native villagers with an analysis of economic and political colonial institutions to show not only how Native peoples in Cuzco made sense of their lives but also how their strategies of survival shaped colonial society.

Augustine's vision at Ostia is one of the most influential accounts of mystical experience in the Western tradition, and a subject of persistent interest to Christians, philosophers and historians. This book explores Augustine's account of his experience as set down in the Confessions and considers his mysticism in relation to his classical Platonist philosophy. John Peter Kenney argues that while the Christian contemplative mysticism created by Augustine is in many ways founded on Platonic thought, Platonism ultimately fails Augustine in that it cannot retain the truths that it anticipates. The Confessions offer a response to this impasse by generating two critical ideas in medieval and modern religious

In Augustine and the Trinity, Lewis Ayres offers a new treatment of this important figure, demonstrating how Augustine's writings offer one of the most sophisticated early theologies of the Trinity developed after the Council of Nicaea (325). Building on recent research, Ayres argues that Augustine was influenced by a wide variety of earlier Latin Christian traditions which stressed the irreducibility of Father, Son and Spirit. Augustine combines these traditions with material from non-Christian Neoplatonists in a very personal synthesis. Ayres also argues that Augustine shaped a powerful account of Christian ascent toward understanding of, as well as participation in the divine life, one that begins in faith and models itself on Christ's*

Augustine of Hippo, indisputably one of the most important figures for the study of memory, is credited with establishing memory as the inner source of selfhood and locus of the search for God. Yet, those who study memory in Augustine have never before taken into account his preaching. His sermons are the sources of memory's greatest development for Augustine. In Augustine's

preaching, especially on the Psalms, the interior gives way to communal exterior. Both the self and search for God are re-established in a shared Christological identity and the communal labors of remembering and forgetting. This book opens with Augustine's early works and Confessions as the beginning of memory and concludes with Augustine's Trinity and preaching on Psalm 50 as the end of memory. The heart of the book, the work of memory, sets forth how ongoing remembering and forgetting in Christ are for Augustine are foundational to the life of grace. To that end,

Augustine and his congregants go leaping in memory together, keep festival with abiding traces, and become forgetful runners like St. Paul.

Remembering and forgetting in Christ, the ongoing work of memory, prove for Augustine to be actions of reconciliation of the distended experiences of human life-of praising and groaning, labouring and resting, solitude and communion. Augustine on Memory presents this new communal and Christological paradigm not only for Augustinian studies, but also for theologians, philosophers, ethicists, and interdisciplinary scholars of memory.

The first fruits of the literary career of St Augustine, the great theologian and Christian philosopher par excellence, are the dialogues he wrote at Cassiciacum in Italy following his famous conversion in Milan in AD 386. These four little books, largely neglected by scholars, take up the ancient philosophical project of identifying the principles and practices that heal human desires in order to attain happiness, renewing this philosophical endeavour with insights from Christian theology. Augustine's later books, such as the Confessions, would continue this project of

healing desire, as would the writings of others including Boethius, Anselm, and Aquinas. Mark J. Boone's *The Conversion and Therapy of Desire* investigates the roots of this project at Cassiciacum, where Augustine is developing a Christian theology of desire, informed by Neoplatonism but transformed by Christian teaching and practices. *L'État de l'Église gallicane sous le règne de Louis XIV. et sous la minorité de Louis XV.* [By J.
