First published in Great Britain in 2016 by Elliott and Thompson Limited as: **Worth dying for: the power and politics of flags.**

In 16th century England many loyal subjects to the crown were asked to make a terrible choice: to follow their monarch or their God. The era was one of unprecedented authoritarianism: England, it seemed, had become a police state, fearful of threats from abroad and plotters at home. This age of terror was also the era of the greatest creative genius the world has ever known: William Shakespeare. How, then, could such a remarkable man born into such violently volatile times apparently make no comment about the state of England in his work? He did. But it was hidden. Revealing Shakespeare's sophisticated version of a forgotten code developed by 16th-century dissidents, Clare Asquith shows how he was both a genius for all time and utterly a creature of his own era: a writer who was supported by dissident Catholic aristocrats, who agonized about the fate of England's spiritual and political life and who used the stage to attack and expose a regime which he believed had seized illegal control of the country he loved. Shakespeare's plays offer an acute insight into the politics and personalities of his era. And Clare Asquith's decoding of them offers answers to several mysteries surrounding Shakespeare's own life, including most notably why he stopped writing while still at the height of his powers. An utterly compelling combination of literary detection and political revelation, *Shadowplay* is the definitive expose of how Shakespeare lived through and understood the agonies of his time, and what he had to say about them.

In the second decade of each century, a new global order commonly starts to assert itself. In the 19th, Napoleon's defeat gave birth to the world of rivalrous European powers. In the 20th, the First World War triggered a wave of revolutions that cleared a path for the American era. Ours appears to be no different. The world is once again on the move: China extends its influence across the globe; Europe is struggling to maintain unity and the United States looks hollowed out by its own past adventures. Meanwhile Russia is up to a lot of startlingly bold new tricks. In this expanded new edition of *The World in Conflict*, John Andrews tackles head-on the reasons why global violence is ever-present in our lives. He analyses every single one of today's major conflicts region by region, considering the causes, contexts, participants, impacts and likely outcomes. He looks at recently-ended wars that still spawn intermittent fighting. And he considers where, why and how new conflicts might erupt. This is a must-read for our interesting times, a guide to our new world of terrorism, kompromat and cyber war, shifting powers and enduring strife. If you want to know who is fighting where, for what, and whether they can win, *The World in Conflict* is indispensable.

"An engagingly written, veritable page-turner. Whether the topic is ethnic identity, Japanese imperialism, Panamanian shipping law or the defeat of Nazism, flags speak volumes about our human condition" -- Lawrence Joffe, *Jewish Chronicle* "A fascinating tour of the world's ensigns, their histories and meanings ... a sobering lesson in just how silly we human beings can be" --Daily Mail "Insightful and entertaining ... a truly fascinating book that feels all the more considered and urgent in today's world of Brexit, Trump, China and ISIS"--Dan Lewis, *Wanderlust* magazine For thousands of years flags have represented our hopes and dreams. In nine chapters (covering the USA, UK, Europe, Middle East, Asia, Africa, Latin America, international flags and flags of terror), Tim Marshall draws on more than twenty-five years of global reporting experience to reveal the histories, the power and the politics of the symbols that unite us - and divide us.

**The Inside Story of Europe's Last War**

The massacre at Srebrenica of between 3000 and 5000 Muslim prisoners by Bosnian Serbs is one of the most horrifying tales to emerge from the bitter conflict in Bosnia. It changed the course of the war and led to the deployment of US ground troops in the area. It also became the first atrocity in modern times where the well-intentioned but ineffectual Western involvement contributed directly to the mass executions.

Tim Marshall, the New York Times bestselling author of *Prisoners of Geography*, offers "a readable primer to many of the biggest problems facing the world" (*Daily Express*, UK) by examining the borders, walls, and boundaries that divide countries and their populations. The globe has always been a world of walls, from the Great Wall of China to Hadrian's Wall to the Berlin Wall. But a new age of isolationism and economic nationalism is upon us, visible in Trump's obsession with building a wall on the Mexico border, in Britain's Brexit vote, and in many other places as well. China has the great Firewall, holding back Western culture. Europe's countries are walling themselves against immigrants, terrorism, and currency issues. South Africa has heavily gated communities, and massive walls or fences separate people in the Middle East, Korea, Sudan, India, and other places around the world. In fact, more than a third of the world's nation-states have barriers along their borders. Understanding what is behind these divisions is essential to understanding much of what's going on in the world today. Written in Tim Marshall's brisk, inimitable style, *The Age of Walls* is divided by geographic region. He provides an engaging context that is often missing from political discussion and draws on his real life experiences as a reporter from hotspots around the globe. He examines how walls, borders, and barriers have been shaping our political landscape for hundreds of years, and especially since 2001, and how they figure in the diplomatic relations and geo-political events of today. "Marshall is a skilled explainer of the world as it is, and geography buffs will be pleased by his latest" (*Kirkus Reviews*). "Accomplished, well researched, and pacy...*The Age of Walls* is for anyone who wants to look beyond the headlines and explore the context of some of the biggest challenges facing the world today, it is a fascinating and fast read" (*City AM*, UK).

Perfect for fans of original and engaging sports writing, this is the first intelligent and accessible history of soccer chants in the UK "The tales we tell each other on the terraces create something you cannot see, only feel, but it is very real and it goes very deep. . ." Soccer chants—spontaneous, witty, tribal, and, sometimes, downright offensive—are the grassroots of the game, from the Premiership all the way down to the Conference, and the sentiments behind the roar when the "Dirty northern b\*st\*rds!" meet the "Soft southern b\*st\*rds!" follow the divisions and the history of modern Britain. No other sport has a culture quite like it. In this witty and insightful narrative, Tim Marshall explores this powerful and passionate weekly ritual from the industrial revolution to the sexual revolution, touching on issues of race, class, and regional identity. Telling stories of the deep-rooted, tribal rivalries between the great industrial cities, via Elgar's chant for Wolverhampton Wanderers, to the moving origins of Captain John Currie Lauder's "Keep Right on to the End of the Road," now sung by thousands of Birmingham City fans, this book brings to life the love, hate, passion—and humor—that are the spirit of British soccer.

Laura Lam's adult sci-fi debut *False Hearts*: Two formerly conjoined sisters are ensnared in a murderous plot involving psychoactive drugs, shared dreaming, organized crime, and a sinister cult. Raised in the closed cult of Mana's Hearth and denied access to modern technology, conjoined sisters Taema and Tila dream of a life beyond the walls of the compound. When the heart they share begins to fail, the twins escape to San Francisco, where they are surgically separated and given new artificial hearts. From then on they pursue lives beyond anything they could have previously imagined. Ten years later, Tila returns one night to the twins' home in the city, terrified and covered in blood, just before the police arrive and arrest her for murder—the first homicide by a civilian in decades. Tila is suspected of involvement with the Ratel, a powerful crime syndicate that deals in the flow of Zeal, a drug that allows violent minds to enact their darkest desires in a terrifying dreamscape. Taema is given a proposition: go undercover as her sister and perhaps save her twin's life. But during her investigation Taema discovers disturbing links between the twins' past and their present. Once unable to keep anything from each other, the sisters now discover the true cost of secrets.

What the Map Tells Us About Coming Conflicts and the Battle Against Fate

The last of the devastating series of conflicts resulting from the breakup of Yugoslavia in the early 1990s, the Kosovo War saw more than 13,500 fatalities, with reports of atrocities, amid controversial intervention and bombing by NATO. Twenty years have passed since the war's end on 11 June 1999, yet Kosovo's status remains uncertain and questions remain about the possibility of future conflict on European soil. Tim Marshall, then diplomatic editor at Sky News, was on the ground covering the war. This is his captivating account of how events unfolded, exploring the inside story of the way MI6 and the CIA helped the Serbian people to overthrow Slobodan Milosevic, the president of Yugoslavia. It is also a thrilling journalistic memoir, revealing key strategic insights that went on to shape the ideas behind the million-copy international and no.1 Sunday Times bestseller *Prisoners of Geography*. Drawing on personal experience, eyewitness accounts, and interviews with intelligence officials from five countries, this is the definitive account of one of the major events in recent geopolitical history, the repercussions of which continue to be felt today.

***Routledge International Handbook of Irish Studies begins with the reversal in Irish fortunes after the 2008 global economic crash. The chapters included address not only changes in post-Celtic Tiger Ireland but also changes in disciplinary approaches to Irish Studies that the last decade of political, economic, and cultural unrest have stimulated. Since 2008, Irish Studies has been directly and indirectly influenced by the crash and its reverberations through the economy, political landscape, and social framework of Ireland and beyond. Approaching Irish pasts, presents, and futures through interdisciplinary and theoretically capacious lenses, the chapters in this volume reflect the myriad ways Irish Studies has responded to the economic precarity in the Republic, renewed instability in the North, the complex European politics of Brexit, global climate and pandemic crises, and the intense***

Just as Irish society has had to dramatically reconceive its economic and global identity after the crash, Irish Studies has had to shift its theoretical modes and its objects of analysis in order to keep pace with these changes and upheavals. It will appeal to students and scholars of Irish studies, sociology, cultural studies, history, literature, economics, and political science.**

*New from the No. 1 Sunday Times We feel more divided than ever. This riveting analysis tells you why. Walls are going up. Nationalism and identity politics are on the rise once more. Thousands of miles of fences and barriers have been erected in the past ten years, and they are redefining our political landscape. There are many reasons why we erect walls, because we are divided in many ways: wealth, race, religion, politics. In Europe the ruptures of the past decade threaten not only European unity, but in some countries liberal democracy itself. In China, the Party's need to contain the divisions wrought by capitalism will define the nation's future. In the USA the rationale for the Mexican border wall taps into the fear that the USA will no longer be a white majority country in the course of this century. Understanding what has divided us, past and present, is essential to understanding much of what's going on in the world today. Covering China; the USA; Israel and Palestine; the Middle East; the Indian Subcontinent; Africa; Europe and the UK, bestselling author Tim Marshall presents a gripping and unflinching analysis of the fault lines that will shape our world for years to come.*

From the assassination that triggered World War I to the ethnic warfare in Serbia, Bosnia, and Croatia, the Balkans have been the crucible of the twentieth century, the place where terrorism and genocide first became tools of policy. Chosen as one of the Best Books of the Year by The New York Times, and greeted with critical acclaim as "the most insightful and timely work on the Balkans to date" (The Boston Globe), Kaplan's prescient, enthralling, and often chilling political travelogue is already a modern classic. This new edition of *Balkan Ghosts* includes six opinion pieces written by Robert Kaplan about the Balkans between 1996 and 2000 beginning just after the implementation of the Dayton Peace Accords and ending after the conclusion of the Kosovo war, with the removal of Slobodan Milosevic from power. When a jealous witch curses her family's well, it's up to Vonceil to set things right in an epic journey that will leave her changed forever. When Vonceil's older brother, Elber, comes home to their family's Oklahoma farm after serving on the front lines of World War I, things aren't what she expects. His experiences have changed him into a serious and responsible man who doesn't have time for Vonceil anymore. He even marries the girl he had left behind. Then a mysterious and captivating woman shows up at the farm and confronts Elber for leaving her in France. When he refuses to leave his wife, she puts a curse on the family well, turning the entire town's water supply into saltwater. Who is this lady dressed all in white, what has she done to the farm, and what does Vonceil's old uncle Dell know about her? To find out, Vonceil will have to strike out on her own and delve deep into the world of witchcraft, confronting dangerous relatives, shapeshifting animals, a capricious Sugar Witch, and the Lady in White herself--the foreboding Salt Witch. The journey will change Vonceil, but along the way she'll learn a lot about love and what it means to grow up. Hope Larson is the author and illustrator of the Eisner Award nominated *All Summer Long* and the illustrator of the Eisner Award winning *A Wrinkle in Time: The Graphic Novel*. *Salt Magic* is an utterly unique graphic fairy tale complete with striking illustrations by Rebecca Mock. Ante Pavelic was the leader of the fascist party of Croatia (the Ustaše), who, on Adolf Hitler's instruction, became the leader of Croatia after the Nazi invasion of 1941. Pavelic? was an extreme Croatian nationalist who believed that the Serbian people were an inferior race - he would preside over a genocide that ultimately killed an estimated 390,000 Serbs during World War II. *Croatia under Ante Pavelic?* provides the full history of this period, with a special focus on the United States' role in the post-war settlement. Drawing on previously unpublished documents, Robert McCormick argues that President Harry S. Truman's Cold War priorities meant that Pavelic? was never made to answer for his crimes. Today, the Ustaše remains difficult legacy within Croatian society, partly as a result of Pavelic?' political life in exile in South America. This is a new account of US foreign policy towards one of the Second World War's most brutal dictators and is an essential contribution to Croatian war-time history.

**Throughout history, the Balkans have been a crossroads, a zone of endless military, cultural and economic mixing and clashing between Europe and Asia, Christianity and Islam, Catholicism and Orthodoxy. Subject to violent shifts of borders, rulers and belief systems at the hands of the world's great empires--from the Byzantine to the Habsburg and Ottoman--the Balkans are often called Europe's tinderbox and a seething cauldron of ethnic and religious resentments. Much has been made of the Balkans' deeply rooted enmities. The recent destruction of the former Yugoslavia was widely ascribed to millennial hatreds frozen by the Cold War and unleashed with the fall of**

**communism. In this brilliant account, acclaimed historian Mark Mazower argues that such a view is a dangerously unbalanced fantasy. A landmark reassessment, The Balkans rescues the region's history from the various ideological camps that have held it hostage for their own ends, not least the need to justify nonintervention. The heart of the book deals with events from the emergence of the nation-state onward. With searing eloquence, Mazower demonstrates that of all the gifts bequeathed to the region by modernity, the most dubious has been the ideological weapon of romantic nationalism that has been used again and again by the power hungry as an acid to dissolve the bonds of centuries of peaceful coexistence. The Balkans is a magnificent depiction of a vitally important region, its history and its prospects.**

**A fascinating insight into the untold story of how British-French rivalry drew the battle-lines of the modern Middle East. In 1916, in the middle of the First World War, two men secretly agreed to divide the Middle East between them. Sir Mark Sykes was a visionary politician; François Georges-Picot a diplomat with a grudge. They drew a line in the sand from the Mediterranean to the Persian frontier, and together remade the map of the Middle East, with Britain's 'mandates' of Palestine, Transjordan and Iraq, and France's in Lebanon and Syria. Over the next thirty years a sordid tale of violence and clandestine political manoeuvring unfolded, told here through a stellar cast of politicians, diplomats, spies and soldiers, including T. E. Lawrence, Winston Churchill and Charles de Gaulle. Using declassified papers from the British and French archives, James Barr vividly depicts the covert, deadly war of intrigue and espionage between Britain and France to rule the Middle East, and reveals the shocking way in which the French finally got their revenge. I found the entire book most horribly addictive' Independent 'One of the unexpected responses to reading this masterful study is amazement at the efforts the British and French each put into undermining the other' The Spectator**

Yugoslavia: A Concise History surveys the whole turbulent course of the country's history, in the context of the struggles between great powers for control of the Balkans. Torn apart by nationalist rivalries, the first Yugoslavia lapsed into paralysis and dictatorship. Axis occupation in 1941 unleashed a murderous civil war, in which the Communist Party emerged victorious. Tito's Yugoslavia appeared to the world as a peaceful, multi-national federation, but in the end disintegrated amid barbarism unknown in Europe for half a century. This revised and fully updated edition explains why, and takes the events up to the arrest of Milosevic in 2001 and beyond.

Combining keen analysis of current events with world history, Tim Marshall, author of the New York Times bestseller Prisoners of Geography, provides "an entertaining whistle-stop tour of world flags" (Library Journal)—how their power is used to unite and divide populations and intimidate enemies. For thousands of years flags have represented our hopes and dreams. We wave them. Burn them. March under their colors. And still, in the twenty-first century, we die for them. Flags fly at the UN, on Arab streets, from front porches in Texas. They represent the politics of high power as well as the politics of the mob. From the renewed sense of nationalism in China, to troubled identities in Europe and the USA, to the terrifying rise of Islamic State, the world is a confusing place right now and it's important to understand the symbols, old and new, that people are rallying around. In nine chapters (covering the USA, UK, Europe, Middle East, Asia, Africa, Latin America, international flags, and flags of terror), Tim Marshall's A Flag Worth Dying For is a "brisk, entertaining read... that successfully answers a puzzling question: how can a simple piece of cloth come to mean so much? Marshall presents an informative survey of these highly visible symbols of national or international pride" (Publishers Weekly), representing nation states and non-state actors (including ISIS, Hezbollah, and Hamas), and explains how they figure in diplomatic relations and events today. Drawing on more than twenty-five years of global reporting experience to reveal the true meaning behind the symbols that unite us—and divide us—Marshall "writes with the cool drollery that characterized the work of Christopher Hitchens or Simon Winchester" (USA TODAY). The "illuminating" (The New York Times) A Flag Worth Dying For is a winning combination of current affairs, politics,

and world history and “ a treasure vault for vexillologists, full of meaning beyond the hue and thread of the world ’ s banners ” (Kirkus Reviews).

Bestselling author Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the recent and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. He then applies the lessons learned to the present crises in Europe, Russia, China, the Indian Subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia, a visionary glimpse into a future that can be understood only in the context of temperature, land allotment, and other physical certainties.
