Katey is in elementary school. Her class has show and tell once a week. The kids usually bring in toys and other stuff from home. Katey decided she wanted all of her classmates to see that she has a cat named Old Man. She loves her cat which is why she wanted to show him off to everyone. Katey went to her teacher, Mrs. Twisdale, and asked if everyone can bring in their pets for show and tell. Mrs. Twisdale got the ok from the school principal. Permission slips were sent home with the children for the parents to sign plus a parent had to help each child bring in his/her pet. Since each child had a pet, it took several days for show and tell. Some of the children had dogs, cats, rabbits, etc. When it was Katey's day, Old Man was there. An unbelievably hilarious middle-grade true story from bestselling author Jordan Sonnenblick. In a typical school year, every kid has one or two things go wrong. But for Jordan, there's A LOT going wrong ALL THE TIME. Take this year. Here are some of the thing going wrong: -- His teacher hates him. Like, really hates him. Like, is totally out to get him even when he's trying to be good, and is willing to fail him on the simplest things, like show and tell. -- He has a slight breathing problem because of his asthma. And breathing is never really an optional activity. -- His pet snake has given birth to way, way, way too many baby snakes, all who need a home. -- He is finding that becoming The World's Best Drummer in no time whatsoever is maybe not the easiest goal. -- There are bullies ready to stomp him when all he has to defend himself with is a lunchbox. And all this doesn't even include the freak swing set accident, the fears inside his head, or the funniest class presentation ever. By keeping his cool (some of the time), banging on the drums (a lot), and keeping his sense of humor (all the time), Jordan's going to try to make it through the year... and grow up to write a book about it!

Requirements by Collaboration: Workshops for Defining Needs focuses on the human side of software development--how well we work with our customers and teammates. Experience shows that the quality and degree of participation, communication, respect, and trust among all the stakeholders in a project can strongly influence its success or failure. Ellen Gottesdiener points out that such qualities are especially important when defining user requirements and she shows in this book exactly what to do about that fact. Gottesdiener shows specifically how to plan and conduct requirements workshops. These carefully organized and facilitated meetings bring business managers, technical staff, customers, and users into the setting where, together, they can discover, evolve, validate, verify, and agree upon their product needs. Not only are their requirements more effectively defined through this collaboration, but the foundation is laid for good teamwork throughout the entire project. Other books focus on how to build the product right. Requirements by Collaboration focuses instead on how to build what must come first--the right product to build.
