'Somewhere in the cosmos there are happier places,' muses Martin Vrána, the hero of Jan Balabán's novel *Where was the Angel Going?*. 'People are transported to the planet Earth for punishment. Part of the punishment is their ignorance of the fact. We've forgotten that we've forgotten.' Yet, as this very reflection implies, in Martin's case, part of his 'punishment' is his ever-present memory of an Eden from which he had been expelled. The prototypical outsider, a member of a minority community within a minority community (a Protestant in the overwhelmingly agnostic Czech Republic), Martin, like the survivor of a shipwreck, strives to shore up his vital resources amidst the billows of an inimical world, which constantly advance and threaten to wash away everything he holds dear. *Where was the Angel Going?* is a novel made up of forty-six linked stories. As always, Balabán's prose is so vivid that the reader can practically taste the 'honey and dust,' which are the characteristic flavours of Ostrava. And yet, in its lyrical message of love and friendship as basic human needs no less critical than

air and water, Where was the Angel Going is nonetheless an eminently universal novel. Everyone will find him or herself in these pages, as we are all of us descended from that first pair of exiles, Adam and Eve. Translation of this book was supported by the Ministry of Culture of the Czech Republic.

Barbara Kingsolver In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. . While he did all this, he carefully constructed an image of himself as a deeply feeling humanitarian. Winner of the Duff Cooper Prize in 1999, *King Leopold's Ghost* is the true and haunting account of this man's brutal regime and its lasting effect on a ruined nation. It is also the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity.

A decade ago, it was difficult to imagine parents-to-be jumping from planes or dyeing their hair to publicly declare the sex of their unborn children. Yet gender-reveal parties have rapidly grown in popularity, saturating the public imagination surrounding pregnancy and parenthood. As a highly visible trend, gender-reveals correlate with our increased digital capacity for sharing, competitive consumerism, ritualized communitas, and social media currency. At the roots of this trend, there may be motivations to reassert binary identities against a climate of acceptance and progression surrounding gender fluidity. To analyze the divisive discourse surrounding this phenomenon, this book explores issues including technologies of reproduction and media; community and competition; visibility and signifying the unborn; consumerist imperatives; and those uninvited from this trend. In the process of selecting costumes of gender before birth, Gieseler argues, parents-to-be appropriate the unborn body as a contested, discursive site.

Anyone with an understanding of art in general and a knowledge, however slight, of Indian things, will, on being shown a work of Indian sculpture, unfailingly label it Indian. Differences in age and origin, however clearly marked to the discerning eye, when pointed out to the outsider, will be apprehended only with more or less difficulty. There is something so strong, and at the same time unique, in any Indian work of art that its 'Indianness' is felt first of all, and what it is, is seen only on second thought. How this Indianness is expressed in terms of the relationship between line, surface, volume and other elements of visualisation is dealt with in this book. There are permanent qualities throughout the fabric of Indian sculpture which are discussed in detail. These essential qualities, all interrelated and inseparable, contain within their compass the life of Indian plastic art. The book surveys the structure of Indian sculpture in its relevant aspects. The underlying and essential qualities are viewed in their permanency throughout the

special conditions that the single monuments imply. Their outward connections, geographical and chronological, are seen to resolve themselves into ethical problems and those of the artistic process itself. While stylistic investigations are the basis of this book, Indian sculpture is dealt with as conditioned by the Indian craftsman. His consciousness makes him known to himself as a part of nature and his work in the form of this 'naturalism'. Its degree and aspects vary according to the levels of his consciousness.
