The Brueghel Splendours Of Europe Temporis Collec

Renaissance Theory presents an animated conversation among art historians about the optimal ways of conceptualizing Renaissance art, and the links between Renaissance art and contemporary art and theory. This is the first discussion of its kind, involving not only questions within Renaissance scholarship, but issues of concern to art historians and critics in all

fields. Organized as a virtual roundtable discussion, the contributors discuss rifts and disagreements about how to understand the Renaissance and debate the principal texts and authors of the last thirty years who have sought to reconceptualize the period. They then turn to the issue of the relation between modern art and the Renaissance: Why do modern art historians and critics so seldom refer to the Renaissance? Is the Renaissance our indispensable heritage, or are we cut off from it by the revolution of modernism? The

Between 1608 and 1610 the canopy of the night sky was ripped open by an object created almost by accident: a cylinder with lenses at both ends. Galileo's Telescope tells how this ingenious device evolved into a precision instrument that would transcend the limits of human vision and transform humanity's view of its place in the cosmos.

Born in Brussels and trained by his grandmother, Jan Brueghel the Elder (1568-1625) was called "Velvet Brueghel" for his skill at painting rich and delicate textures. The story of Noah's ark provided a subject well suited to Brueghel's abilities.

In his painting, a few curious villagers stand beside a stream, which foreshadows the coming deluge, and watch as Noah herds ostriches, goats, camels, and other exotic animals toward the ark. Next to a prancing white stallion, a lion and lioness chase each other's tails, while a pair of leopards frolic under the watchful eye of a bull. Brueghel has created a delightful scene celebrating the beauty and variety of creation. This monograph takes an interdisciplinary approach to the study of Brueghel's fascinating paradise landscape, exploring Renaissance zoology, religious

views on nature, and the culture of collecting and cataloguing animals and natural specimens. The volume is brilliantly illustrated with paintings of landscapes and animals by artists such as Albrecht Dürer, Peter Paul Rubens, and Lucas Cranach the Elder as well as by Brueghel himself. It presents an overview of the tradition of this type of painting and discusses both the cultural context and the artist's background, crucial to understanding Brueghel's approach to nature.

Although war is a heterogeneous assemblage of the human and nonhuman, it nevertheless builds the illusion of human autonomy and singularity. Focusing on war and ecology, a neglected topic in early modern ecocriticism, Bestial Oblivion: War, Humanism, and Ecology in Early Modern England shows how warfare unsettles ideas

of the human, yet ultimately contributes to, and is then perpetuated by, anthropocentrism. Bertram's study of early modern warfare's impact on human-animal and human-technology relationships draws upon posthumanist theory, animal studies, and the new materialisms, focusing on responses to the Anglo-Spanish War, the Italian Wars, the Wars of Religion, the colonization of Ireland, and Jacobean "peace." The monograph examines a wide range of texts—essays, drama, military treatises, paintings, poetry, engravings, war

Joseph Koerner casts the paintings of Hieronymus Bosch and Pieter Bruegel in a completely new light, revealing how the painting of everyday life was born from what seems its polar opposite: the depiction of an enemy hell-bent on destroying us. Supreme virtuoso of the bizarre, diabolic, and outlandish, Bosch embodies the phantasmagorical force of painting, while Bruegel, through his true-to-life landscapes and frank depictions of peasants, is the artistic avatar of the familiar and ordinary. But despite their

differences, the works of these two artists are closely intertwined. Bruegel began his career imitating Bosch's fantasies, and it was Bosch who launched almost the whole repertoire of later genre painting. But Bosch depicts everyday life in order to reveal it as an alluring trap set by a metaphysical enemy at war with God, whereas Bruegel shows this enemy to be nothing but a humanly fabricated mask. Attending closely to the visual cunning of these two towering masters, Koerner uncovers art history's unexplored

underside: the image itself as an enemy. An absorbing study of the dark paradoxes of human creativity, Bosch and Bruegel is also a timely account of how hatred can be converted into tolerance through the agency of art. It takes readers through all the major paintings, drawings, and prints of these two unforgettable artists—including Bosch's notoriously elusive Garden of Earthly Delights, which forms the core of this historical tour de force. Elegantly written and abundantly illustrated, the book is based on

"The difference between the Parthenon and the World Trade Center, between a French wine glass and a German beer mug, between Bach and John Philip Sousa, between Sophocles and Shakespeare, between a bicycle and a horse, though explicable by historical moment, necessity, and destiny, is before all else a difference of imagination. The imagination is like the drunk man who has lost his watch, and must

Modernism spawned the greatest explosion of art, architecture, literature, painting, music, and dance of any era since the Renaissance. In its long unfolding, from Yeats, Pound and Eliot to Picasso and Matisse, from Diaghilev and Balanchine to Cunningham and Stravinsky and Cage, the work of Modernism has provided the cultural vocabulary of our time. One of the last pure Modernists, Guy

Davenport was perhaps the finest stylist and most protean craftsman of his generation. Publishing more than two dozen books of fiction, essays, poetry and translations over a career of more than forty years, he was awarded a MacArthur Fellowship in 1990. In poetry and prose, Davenport drew upon the most archaic and the most modern of influences to create what he called "assemblages"—lush experiments that often defy classification. Woven throughout is a radical and coherent philosophy of desire,

design and human happiness. But never before has Davenport's fiction, nonfiction, poetry and translations been collected together in one compendium. Eight years after his death, The Guy Davenport Reader offers the first true introduction to the far-ranging work of this neglected genius.
