Britain is home to fifteen species of breeding birds of prey, from the hedgerow-hopping Sparrowhawk to the breathtaking White-tailed Eagle. In this handsomely illustrated book, acclaimed British filmmaker and naturalist David Cobham offers unique and deeply personal insights into Britain's birds of prey and how they are faring today. He delves into the history of these magnificent birds and talks in depth with the scientists and conservationists who are striving to safeguard them. In doing so, he profiles the writers, poets and filmmakers who have done so much to change the public's perception of birds of prey. There are success stories—five birds of prey that were extinct have become reestablished with viable populations—but persecution is still rife. Featuring drawings by famed wildlife artist Bruce Pearson, this book reveals why we must cherish and celebrate our birds of prey, and why we neglect them at our peril.

This comprehensive monograph is a second edition of one of the most popular Poyser monographs; it covers all aspects of the spectacular eagle's biology and ecology, including a full review of the literature and incorporating the considerable new research on the species since the publication of the first edition in 1997. The late Jeff Watson was one of Scotland's eagle experts, with more than 20 years of research on the birds; following Jeff's untimely death, the book is being completed by his colleagues Des Thompson and Helen Riley. Scottish studies provide the foundation for a treatment that also includes up-to-date information from work in North America, continental Europe and elsewhere. This global view allows fascinating insights into the species' relationships with a variety of different habitats and leads to many new and important conclusions regarding its ecology. This highly readable and authoritative account is destined to become the standard reference on the species, both in Scotland and elsewhere in the world. The text is enriched with many superb pictures of this majestic bird. Additional wash landscapes capture the very special atmosphere of Scotland's Golden Eagle country.

A stunning homage in black and white to the sovereign of the skies.

This carefully crafted ebook: "Lawrence of Arabia: The Man Behind the Myth (Complete Autobiographical Works, Memoirs & Letters)" is formatted for your eReader with a functional and detailed table of contents. Thomas Edward Lawrence (1888-1935) was a British archaeologist, military officer, and diplomat. He was renowned for his liaison role during the Sinai and Palestine Campaign, and the Arab Revolt against Ottoman Turkish rule of 1916-18. The breadth and variety of his activities and associations, and his ability to describe them vividly in writing, earned him international fame as Lawrence of Arabia. Throughout his life, Lawrence was a prolific writer. A large portion of his output was epistolary; he often sent several letters a day. Seven Pillars of Wisdom is an account of his war experiences. In 1919 he had been elected to a seven-year research fellowship at Oxford, providing him with support while he worked on the book. In addition to being a memoir of his experiences during the war, certain parts also serve as essays on military strategy, Arabian culture and geography, and other topics. Lawrence re-wrote Seven Pillars of Wisdom three times; once "blind" after he lost the manuscript while changing trains at Reading railway station. The Mint is a memoir of his experiences as an enlisted man in the Royal Air Force (RAF). It concerns the period following the First World War when Lawrence decided to disappear from public view. He enlisted in RAF under an assumed name, becoming 352087 Aircraftman Ross. The book is a closely observed autobiographical account of his experiences. He worked from a notebook that he kept while enlisted, writing of the daily lives of enlisted men and his desire to be a part of something larger than himself: the Royal Air Force. The book's title likens the RAF training to a coin factory, with the men as 'The Raw Material' and life in the training camp as being 'In the Mill' that stamps the coins out of the blank metal.

'Now we are not two but one transparent thing, an octopus of light moving in the underwater darkness.' Set against the backdrop of the depraved and glamorous New York of the early 1970s, this is the story of Rose, a young girl who endures incest and violence at the hands of her father, and flees into a dangerous love affair with an older man. But Anton, son of a perished Nazi fighter pilot, has problems of his own. Together they experience both delicious thrills and frightening excesses: bliss and fear, sadness and loss, confusion and despair. The novel moves with great subtlety through time and space, blending elements of myth, story-telling, memory and alternate reality to create a powerful and kaleidoscopic world of its own. A book for the #metoo era, full of real insights into the horrors of physical and sexual abuse, as well as ferocious humour and an unquenchable spirit.

This book documents the case that World War II happened in such a different world that it has little relevance to today's policy, as well as the case that U.S. participation in WWII was not justifiable. Specifically, WWII was not fought to rescue Jews from persecution, was not necessary for defense, was the most damaging and destructive event yet to occur, and would not have happened had any one of these factors been missing: World War I, the manner in which WWI was ended, U.S. funding

arming of Nazis, a U.S. arms race with Japan, U.S. development of racial segregation, U.S. development of eugenics, U.S. development of genocide and ethnic cleansing, or the U.S. and British prioritization of opposing the Soviet Union at all costs. The author corrects numerous misconceptions about the most popular and misunderstood war in western culture, in order to provide a case for moving to a world beyond war.

When you're around him, you feel like a bit of a disciple. There are a few people in this world who revealed something important to know. People like Jacques Cousteau. He showed you the world beneath the sea and he made you fall in love with it. This is what Morley did with birds of prey. Roy Disney. "
