

## Yrg Below The Belt

Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day.

This book describes nitric oxide (NO) and hydrogen peroxide (H2O2) functions in higher plants. Much progress has been made in the field of NO and H2O2 research regarding the various mechanisms and functions of these two molecules, particularly regarding stress tolerance and signaling processes, but there are still gaps to be filled. NO and H2O2 are both crucial regulators of development, and act as signaling molecules at each step of the plant lifecycle, while also playing important roles in biotic and abiotic responses to environmental cues. The book summarizes key advances in the field of NO and H2O2 research, focusing on a range of processes including: signaling, metabolism, seed germination, development, sexual reproduction, fruit ripening, and defense.

Economic policymaking in Asia-Pacific developing countries has, understandably, long been focused on maximising economic growth, given the imperatives of poverty reduction and job creation. There is no gainsaying that there is a strong case for focusing on economic growth but when this comes at costs that undermine the sustainability of growth itself over the long term, it is time to ask questions. This is evident in the Asia-Pacific region, where decades of high growth have transformed the socioeconomic landscape - lifting a billion people out of extreme poverty and raising living standards of even greater numbers. However, such growth has been accompanied by growing inequality of income and opportunity and is beginning to breach planetary limits, endangering the well-being of future generations.

Indeed, according to the ESCAP 2019 report on SDG progress, the Asia-Pacific region is not on track to achieve any of the 17 Sustainable Development Goals by 2030 if we continue on our business-as-usual pathway, and the region has either stagnated or regressed in several environmental Goals. The largest regression is in Responsible Consumption and Production (Goal 12) and this calls for a rethink of the economic growth-centric development model. The 2020 Survey proposes a transition towards sustainable consumption and production, given consumption and production's fundamental role in economic activities and its broad link with social and environmental well-being. Such a transition calls for all stakeholders, namely governments, businesses and consumers, to urgently align their own goals with social and planetary goals through internalizing externalities linked to their actions. The 2020 Survey identifies the constraints that different stakeholders face and provides a holistic policy package to power through the challenges.

Voices of Resilience

From the first amateur leagues of the 1860s to the exploits of Liván and Orlando "El Duque" Hernández, here is the definitive history of baseball in Cuba. Roberto González Echevarría expertly traces the arc of the game, intertwining its heroes and their stories with the politics, music, dance, and literature of the Cuban people. What emerges is more than a story of balls and strikes, but a richly detailed history of Cuba told from the unique cultural perch of the baseball diamond. Filling a void created by Cuba's rejection of bullfighting and Spanish hegemony, baseball quickly became a crucial stitch in the complex social fabric of the island. By the early 1940s Cuba had become major conduit in spreading the game throughout Latin America, and a proving ground for some of the greatest talent in all of baseball, where white major leaguers and Negro League players from the U.S. all competed on the same fields with the cream of Latin talent. Indeed, readers will be introduced to several black ballplayers of Afro-Cuban descent who played in the Major Leagues before Jackie Robinson broke the color barrier once and for all. Often dramatic, and always culturally resonant, González Echevarría's narrative expertly lays open the paradox of fierce Cuban independence from the U.S. with Cuba's love for our national pastime. It shows how Fidel Castro cannily associated himself with the sport for patriotic p.r.--and reveals that his supposed baseball talent is purely mythical. Based on extensive primary research and a wealth of interviews, the colorful, often dramatic anecdotes and stories in this distinguished book comprise the most comprehensive history of Cuban baseball yet published and ultimately adds a vital lost chapter to the history of baseball in the U.S.

Psychosurgery, or the surgical treatment of mental disorders, has enjoyed a spectacular revival over the past ten years as new brain stimulation techniques have become available. Neuromodulation offers new possibilities for the treatment of psychiatric disorders such as depression, obsessive-compulsive disorder (OCD), addiction, eating disorders and autism. This work presents the history of this unique specialty and investigates current techniques and ethical challenges. With a wealth of illustrations and detailed anatomical diagrams, it provides essential information for medical practitioners, as well as anyone else interested in the fascinating advances being made in neuroscience today. « I like the book as it provides a very nice overview of psycho- surgery in general. It is easy to understand for any (para)medical practitioner, but even specialists in the field may learn new things. They may also enjoy looking the well-known and less-known figures which illustrate the book. » Professor Bart Nuttin « Reading this book is like reading an anthology, or rather an encyclopaedia of the field of psychiatric surgery, spanning more than a century. This is a work with an unprecedented degree of erudition and knowledge, and the subject is presented in a didactic, scholar, and scientific manner, and is extensively referenced and illustrated. If only one book is to be read by anybody interested in this field, regardless of specialty, this is The Book to read. » Professor Marwan Hariz

This book presents the results of a study that examined the multiple layers of stigma and discrimination experienced by women infected and affected by HIV/AIDS in a low socio-economic area of Mumbai, India. Using exploratory qualitative methods and underpinned by the psychosocial framework and gendered perspectives the study attempts to represent the voicesof affected and infected women. The book first focuses on a global overview of HIV,presents data on the Indian context and provides a synthesis of HIV in relation to stigma, discrimination and gender. The second part of the book probes the depth of impact on women’s lives using the lenses of gender, economic status, the environment and physical health. The framework was further modified and extended to include threats revealed by and strengths indentified in infected and affected women. The analysis revealed that strategies to address stigma and discrimination need to address the social, cultural, religious and systemic barriers to changing attitudes. The book portrays the resilience of each woman’s spirit and the unique capacity of the women to cope, to find strength, to pursue life and to maintain hope when their dreams and the dreams of their children have been shattered through HIV/AIDS.

*This volume explores the complex issue of religious minorities in India and how they are identified, defined, and categorized by legal and institutional processes. It questions the religious identification of groups and demonstrates problems with such categorization. This is the first volume in the new series, Oxford India Studies in Contemporary Society.*

*Published in 1963, this book about the famous accountant and bookkeeper Luca Paciolo explores his extraordinary contribution to the development of the accounting profession. Paciolo is the first known writer to publish a work describing the double entry process.*

*THE NEW YORK TIMES BESTSELLER “Entertaining . . .an insightful and funny observer of pro wrestling's universe.” - Publishers Weekly In this insightful, riveting book, Jericho takes us into WWE wrestling arenas around the world as he details his classic rivalries with The Rock, Steve Austin, HHH, Shawn Michaels, and John Cena, along with all the politics and backstage machinations he faced outside the ring. Chris recounts his hilarious escapades of breaking in with the Hollywood elite via doomed auditions, short-lived reality shows, made-for-television movies, and red-carpet interviewing fiascos. Jam packed with CJ's trademark self-effacing humor, one-of-a-kind writing style, and ridiculous random encounters with everyone from Arnold Schwarzenegger, Axl Rose, and Wayne Gretzky to Paul McCartney, and Howard Stern, UNDISPUTED is one of a rare breed-a sequel that might be better than the original.*

Myanmar's housing sector is struggling to cope with rapid urbanization, internal migration, and new demand from recent economic growth. These challenges are most apparent in the Yangon Region, where estimates suggest there will be a housing shortage of 1.3 million units by 2030. This publication assesses the current housing market situation in Yangon. It identifies reform options and offers practical recommendations to support the Yangon Region Government's implementation of its affordable housing agenda and related policies.

"The right and title to 'The Florida annual, 'of which four editions have been published, has been purchased, and the present handbook is designed to preserve its best features in a new form.'" Part I. The Altantic Coast.

If there's one obstacle to selling wellness books to guys, it's this: none of them are written by professional wrestlers.In the nick of time, the one and only DDP-Diamond Dallas Page-steps out of the ring and onto the mat to offer Yoga for Regular Guys. Most yoga books marketed to men are earnest and straightforward. Yoga for Regular Guys brims with guy humor, an extremely irreverant attitude but still manages to pack in a legitimate, comprehensive and rigorous introduction to real yoga practice. The foreword is written by Rob Zombie of the band White Zombie.

History of the County of Albany, N.Y., from 1609 to 1886

*Have you ever asked yourself how the inventions, gadgets, and devices that surround us actually work? Discover the hidden workings of everyday technology with this graphic guide. How Technology Works demystifies the machinery that keeps the modern world going, from simple objects such as zip fasteners and can openers to the latest, most sophisticated devices of the information age, including smart watches, personal digital assistants, and driverless cars. It includes inventions that have changed the course of history, like the internal combustion engine, as well as technologies that might hold the key to our future survival, including solar cells and new kinds of farming to feed a growing population. All the way through the book, step-by-step explanations are supported by simple and original graphics that take devices apart and show you how they work. The opening chapter explains principles that underpin lots of devices - from basic mechanics to electricity to digital technology. From there on, devices are grouped by application - such as the home, transport, and computing - making them easy to find and placing similar devices side by side. How Technology Works is perfect for anyone who didn't have a training in STEM subjects at school or is simply curious about how the modern world works.*

*This text, written by a leading researcher in the field, describes the origin and formation of lakes in order to give context to the question of how lacustrine deposits form. It explains the process of sedimentation in lakes and the chemistry of those deposits and describes how the age of lake deposits are determined. Additionally, this book shows how different groups of fossils are used in interpreting the paleontological record of lakes. In order to illustrate the more synthetic approaches to interpreting the history of lakes, the author also discusses such special topics as lake-level history, lake evolution, and the impact of environmental change on lakes.*

*The present dictionary is a practical exercise in word-compilation to facilitate the study of Sanskrit language. Based on Webster's complete English dictionary it includes general terms of all sciences and such technical terms as could be duly represented by Sanskrit equivalents actually existing in that language. Besides the general vocabulary quotations from the works of famous authors have been inserted to render the connotation of a word easily intelligible. It is also designed to help scholars translate any passage from English into Sanskrit. It covers a very large field-Epics such as the Ramayana and Mahabharata, Puranas and Upapuranas, Smrti and Niti literature, Darsanas or Systems of Philosophy, such as Nyaya, Vedanta, Mimamsa, Sankhya and Yoga, Grammar, Rhetoric, Poetry in all its branches, Dramatic and Narrative literature, Mathematics, Medicine, Botany, Astronomy, Music and other technical or scientific branches of learning. Thus, it embraces all words occurring in the general post-Vedic literature. It includes most of the important terms in Grammar. It gives quotations and references to the peculiar and remarkable meanings of words, especially such as occur in books prescribed for study in the Indian and foreign universities. It also renders explanation of important technical terms occurring in different branches of Sanskrit learning. To add to its usefulness the work includes three appendices.*

China's commercial ties with the outside world have long been symbolized by the ancient Silk Road, which began as a tortuous trading network of mountain paths and sea routes that provided a lifeline for the Chinese economy. Now the leadership in Beijing is reviving the concept with an ambitious plan to build and upgrade highways, railways, ports, and other infrastructure throughout Asia and Europe designed to enrich the economies of China and some 60 of its nearby trading partners. The so-called Belt and Road Initiative has generated enthusiasm and high hopes but also skepticism and wariness. And as big as China's ambitions are, many obstacles stand in the way. In this volume of essays edited by Sean Miner and Simeon Djankov, PIIIE experts analyze the initiative's opportunities for China and the world, along with the logistical problems and political, economic, and security implications that have generated concerns.

The Autobiography of Dusko Popov

*Algae have been used since ancient times as food, fodder, fertilizer and as source of medicine. Nowadays seaweeds represent an unlimited source of the raw materials used in pharmaceutical, food industries, medicine and cosmetics. They are nutritionally valuable as fresh or dried vegetables, or as ingredients in a wide variety of prepared foods. In particular, seaweeds contain significant quantities of protein, lipids, minerals and vitamins. There is limited information about the role of algae and algal metabolites in medicine. Only a few taxa have been studied for their use in medicine. Many traditional cultures report curative powers from selected alga, in particular tropical and subtropical marine forms. This is especially true in the maritime areas of Asia, where the sea plays a significant role in daily activities. Nonetheless, at present, only a few genera and species of algae are involved in aspects of medicine and therapy. Beneficial uses of algae or algal products include those that may mimic specific manifestations of human diseases, production of antibiotic compounds, or improvement of human nutrition in obstetrics, dental research, thallassotherapy, and forensic medicine.*

*Building upon Serway and Jewetta s solid foundation in the modern classic text, Physics for Scientists and Engineers, this first Asia-Pacific edition of Physics is a practical and engaging introduction to Physics. Using international and local case studies and worked examples to add to the concise language and high quality artwork, this new regional edition further engages students and highlights the relevance of this discipline to their learning and lives.*

*The World Social Report 2021 points to new directions in which rural development strategies need to be reconsidered. It offers strategic principles, programs of action, and a set of concrete policies that can be combined to devise effective strategies to help realize the potential of rural development and achieve the SDGs. Reexamining the narrow view of rural development, it expands the discussion to include the role of development in achieving the wider set of SDGs. In doing so, it pays particular attention to the interaction of rural development with SDG 6 (clean water and sanitation), SDG 8 (economic growth and decent work), SDG 9 (infrastructure), SDG 11 (sustainable communities), SDG 13 (climate change), SDG 14 (life below water) and SDG 15 (life on land). The interlinkages of all these Goals suggest that there exist potential synergies between rural development and sustainable efforts in many other directions.*

For the first time, a linguistic description of Old Turkic (7th to 13th centuries) is presented, dealing with phonology, morphophonology and subphonemic phenomena as reflected in numerous scripts, derivational and inflectional morphology, syntax and coherence, the lexicon and stylistic, dialect and diachronic variation.

The purpose of this document is to provide guidance to national AIDS programmes and partners on the use of indicators to measure and report on the country response. The 2016 United Nations Political Declaration on Ending AIDS, adopted at the United Nations General Assembly High-Level Meeting on AIDS in June 2016, mandated UNAIDS to support countries in reporting on the commitments in the Political Declaration. The Political Declaration on Ending AIDS built on three previous political declarations: the 2001 Declaration of Commitment on HIV/AIDS, the 2006 Political Declaration on HIV/AIDS and the 2011 Political Declaration on HIV and AIDS.

The author recalls the adventure and danger of his espionage activities during the Second World War as a British agent posing as a Nazi supporter.
